CES Student Spotlight - January, 2024

Brylee Culp

Brylee has been called a “little mother” by many adults at CES because she is often found caring for others. She is always there to listen and care for her classmates. She is a very attentive listener when someone needs a friend. She genuinely cares for others and helps them when she sees they are struggling. She will give up free time to sit with friends who are sad or hurt. She also celebrates with others when they win or succeed. She is one of the most empathetic students I have ever met.
