

Coastal Ecology II

Mobile County
PUBLIC SCHOOLS

Environmental
STUDIES CENTER

- Program duration: 8:30 until 1:30 including a break for lunch on the grounds.
- Emphasis on Standards # 3,10,16, and 17 for Environmental.
- Email scalderrone@mcps.com For availability

This field trip, which is funded by SEA Grant, is an opportunity for high school teachers and students to explore and observe the issues of marine plastic pollution, the harm caused by plastics to the environment and communities, and how we can properly deal with all the waste. Students observe and record plastic pollution on the grounds of ESC and discover where this pollution ultimately ends up. Emphasis is placed on effects of plastic pollution on our watersheds. Students will investigate local water samples to extract and measure microplastics from those water samples.
