Houston County CTAE: Working to Produce High Achievement for All Through Continuous Growth

Houston County High School

HCHS SkillsUSA Studio Team

The studio team at Houston County High School is an integral part of the school's SkillsUSA program. It is designed to bring career and technical skills to life. Students involved in the studio team are not only learning hands-on skills but are also applying those skills in real-world situations through the fine furniture and graphics programs. To make the most of their learning experience, these students are required to stay after school one day a week to "work", using the skills they've developed in class. Doing this provides them with a structured opportunity to reinforce their abilities while making tangible contributions to the community.

Through their participation, students earn community service hours by completing tasks that benefit local residents and organizations. This approach ensures that SkillsUSA's mission of preparing students for leadership in the workforce is fulfilled in a meaningful way. By working on projects like custom furniture and graphic designs, the students are not only developing technical skills but are also learning about time management, responsibility, and the importance of giving back to their community. This real-world application bridges the gap between classroom learning and practical experience.

Houston County High School is located at 920 Highway 96 in Warner Robins, Georgia. Dr. Jay Jones serves as Principal.
