

## Trinity Elementary School

The NCCTM Math Logo contest asks students to create a logo that shows what math means to them. The logo is used to promote interest in mathematics and the winner's design is used for the NCCTM annual t-shirt. There were over 500 submissions across the state of North Carolina for this year's contest.

Kathleen Olguin-Cuevas was selected as the winner for the 22-23 contest! Her logo was printed on shirts for this year's NCCTM Math Conference. Several Trinity Elementary staff members purchased the NCCTM Math conference t-shirt to support Kathleen. We are so proud of Kathleen!
