School Device for Glucose Monitoring Request

Dear Parent/Guardian:

I, Melanie Rhynes, the Director of Health Services, for Ada City Schools am requesting permission to use a school district electronic device to monitor your student's glucose levels during the school day.

The district does not permit the use of a school device during the school day, except by written permission from the parent/guardian. All glucose monitoring will be done by the school nurse, LPN, Health Aide, or other individuals designated by the district during the school year.

All individuals are aware there could be temporary interruptions in monitoring in areas without internet connection (eg: playground, dead zones in the site building) as well as during off campus activities/field trips.

A new form must be completed each school year.

I request the school nurse, or other designated person, to monitor my child's glucose using a district electronic device during the current school year.
