Independent Auditor's Report

To the Board of Directors
Macomb Academy

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of the governmental activities and each major fund of Macomb Academy (the "Academy") as of and for the year ended June 30, 2024 and the related notes to the financial statements, which collectively comprise Macomb Academy's basic financial statements, as listed in the table of contents.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and each major fund of Macomb Academy as of June 30, 2024 and the respective changes in its financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Academy and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Substantial Doubt about the Academy's Ability to Continue as a Going Concern

The accompanying financial statements have been prepared assuming that the Academy will continue as a going concern. As discussed in Note 11 to the financial statements, the Academy has suffered declines in enrollment, which will reduce funding for future years. The most recent appraisal of its facility is less than the outstanding balance on the bond, and the Academy has received financial assistance to fund operations. Management's evaluation of the events and conditions and management's plans regarding these matters are also described in Note 11. The financial statements do not include any adjustments that might result from the outcome of this uncertainty. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Academy's ability to continue as a going concern for 12 months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

To the Board of Directors
Macomb Academy

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and, therefore, is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Academy's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Academy's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and other required supplementary information, as identified in the table of contents, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

To the Board of Directors
Macomb Academy

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Macomb Academy's basic financial statements. The other supplementary information, as identified in the table of contents, is presented for the purpose of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplementary information is fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated October 25, 2024 on our consideration of Macomb Academy's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Macomb Academy's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Macomb Academy's internal control over financial reporting and compliance.

October 25, 2024

Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of
Financial Statements Performed in Accordance with *Government Auditing Standards*

Independent Auditor's Report

To Management and the Board of Directors
Macomb Academy

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities and each major fund of Macomb Academy (the "Academy") as of and for the year ended June 30, 2024 and the related notes to the financial statements, which collectively comprise the Academy's basic financial statements, and have issued our report thereon dated October 25, 2024.

Report on Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Academy's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Academy's internal control. Accordingly, we do not express an opinion on the effectiveness of the Academy's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the Academy's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that have not been identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Academy's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and, accordingly, we do not express such an opinion.

The results of our tests disclosed an instance of noncompliance or other matters that is required to be reported under *Government Auditing Standards* and is described as follows:

The Academy is currently in default on certain financial covenants associated with the bonded debt, as it relates to a missed principal payment from 2019, despite making required payments for the year ended June 30, 2024. As a result, the bond trustee could call the debt and force immediate payment. We recommend the Academy continue to work with legal counsel and the bond trustee to develop a long-term solution to ensure debt compliance and sufficient cash flows for operations going forward.

To Management and the Board of Directors
Macomb Academy

The Academy's Response to the Finding

Government Auditing Standards requires the auditor to perform limited procedures on the Academy's response to the previously mentioned finding. The Academy's management agrees with the comments and is working to resolve the Academy's noncompliance with certain debt covenants. The Academy's response was not subjected to the auditing procedures applied in the audit of the financial statements, and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Academy's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Academy's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Plante & Moran, PLLC

October 25, 2024

This section of the annual financial report for Macomb Academy (the "Academy") presents our discussion and analysis of the Academy's financial performance during the year ended June 30, 2024. Please read it in conjunction with the Academy's financial statements, which immediately follow this section.

Using This Annual Report

This annual report consists of a series of financial statements and notes to those financial statements. These statements are organized so the reader can understand Macomb Academy financially as a whole. The government-wide financial statements provide information about the activities of the whole Academy, presenting both an aggregate view of the Academy's finances and a longer-term view of those finances. The fund financial statements provide the next level of detail. For governmental activities, these statements tell how services were financed in the short term and what remains for future spending. The fund financial statements look at the Academy's operations in more detail than the government-wide financial statements by providing information about the Academy's two funds, the General Fund and the Debt Service Fund. This report is composed of the following elements:

Management's Discussion and Analysis (MD&A) (Required Supplementary Information)

Basic Financial Statements

Government-wide Financial Statements

Fund Financial Statements

Notes to Financial Statements

Required Supplementary Information

Budgetary Comparison Schedule - General Fund

Schedules of the Academy's Proportionate Share of the Net Pension and OPEB Liabilities (Asset)

Schedules of Pension and OPEB Contributions

Other Supplementary Information

Reporting the Academy as a Whole - Government-wide Financial Statements

One of the most important questions asked about the Academy is, "As a whole, what is the Academy's financial condition as a result of the year's activities?" The statement of net position and the statement of activities, which appear first in the Academy's financial statements, report information on the Academy as a whole and its activities in a way that helps you answer this question. We prepare these statements to include all assets, deferred outflows of resources, liabilities, and deferred inflows of resources using the accrual basis of accounting, which is similar to the accounting used by most private sector companies. All of the current year's revenue and expenses are taken into account, regardless of when cash is received or paid.

These two statements report the Academy's net position - the difference between assets plus deferred outflows of resources and liabilities plus deferred inflows of resources, as reported in the statement of net position - as one way to measure the Academy's financial health or financial position. Over time, increases or decreases in the Academy's net position, as reported in the statement of activities, are indicators of whether its financial health is improving or deteriorating. The relationship between revenue and expenses is the Academy's operating results. However, the Academy's goal is to provide services to our students, not to generate profits as commercial entities do. One must consider many other nonfinancial factors, such as the quality of the education provided and the safety of the schools, to assess the overall health of the Academy.

The statement of net position and the statement of activities report the governmental activities for the Academy, which encompass all of the Academy's services, including instruction and support services. State aid (foundation allowance revenue) and state and federal grants finance most of these activities.

Reporting the Academy's Fund Financial Statements

The Academy's fund financial statements provide detailed information about the most significant funds, not the Academy as a whole. Some funds are required to be established by state law and by bond covenants. However, the Academy establishes many other funds to help it control and manage money for particular purposes or to show that it is meeting legal responsibilities for using certain grants and other money as directed.

Governmental Funds

Governmental fund reporting focuses on showing how money flows into and out of funds and the balances left at year end that are available for spending. They are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the operations of the Academy and the services it provides. Governmental fund information helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the Academy's programs. We describe the relationship (or differences) between governmental activities (reported in the statement of net position and the statement of activities) and governmental funds in a reconciliation.

The Academy as a Whole

Recall that the statement of net position provides the perspective of the Academy as a whole. The following table provides a summary of the Academy's net position as of June 30, 2024 and 2023:

	Governmental Activities	
	2024	2023
(in thousands)		
Assets		
Current and other assets	\$ 956.3	\$ 705.5
Capital assets	724.1	739.6
Total assets	1,680.4	1,445.1
Deferred Outflows of Resources	511.1	464.7
Liabilities		
Current liabilities	74.6	69.3
Noncurrent liabilities	1,240.0	1,295.0
Net pension liability	1,014.0	1,019.1
Net OPEB liability	-	68.6
Total liabilities	2,328.6	2,452.0
Deferred Inflows of Resources	643.8	1,026.4
Net Position (Deficit)		
Net investment in capital assets	(515.9)	(555.4)
Restricted	258.7	323.6
Unrestricted	(523.7)	(1,336.8)
Total net position (deficit)	\$ (780.9)	\$ (1,568.6)

The above analysis focuses on net position. The change in net position (deficit) of the Academy's governmental activities is discussed below. The Academy's net position was \$(780.9) thousand at June 30, 2024. Net investment in capital assets, totaling \$(515.9) thousand, compares the original cost, less depreciation of the Academy's capital assets, to long-term debt used to finance the acquisition of those assets. The debt will be repaid through the receipt of unrestricted state aid, based on enrollment, to the extent cash flow is available. Restricted net position is reported separately to show legal constraints from debt covenants and enabling legislation that limit the Academy's ability to use that net position for day-to-day operations. The remaining amount of net position (deficit) \$(523.7) thousand was unrestricted.

The \$(523.7) thousand in unrestricted net position (deficit) of governmental activities represents the accumulated results of all past years' operations. The unrestricted net position (deficit) balance enables the Academy to meet working capital and cash flow requirements and to provide for future uncertainties. The operating results of the General Fund will have a significant impact on the change in unrestricted net position (deficit) from year to year.

The results of this year's operations for the Academy as a whole are reported in the condensed statement of activities below, which shows the changes in net position for the years ended June 30, 2024 and 2023:

	Governmental Activities	
	2024	2023
(in thousands)		
Revenue		
Program revenue - Operating grants	\$ 1,247.7	\$ 907.9
General revenue:		
State aid not restricted to specific purposes	364.4	366.9
Other	21.5	16.1
Total revenue	1,633.6	1,290.9
Expenses		
Instruction	121.8	(144.5)
Support services	621.8	555.1
Debt service	86.8	90.2
Depreciation expense (unallocated)	15.5	15.9
Total expenses	845.9	516.7
Change in Net Position	787.7	774.2
Net Position (Deficit) - Beginning of year	(1,568.6)	(2,342.8)
Net Position (Deficit) - End of year	\$ (780.9)	\$ (1,568.6)

As reported in the statement of activities, the cost of all of our governmental activities this year was \$845.9 thousand. Certain activities were partially funded by other governments and organizations that subsidized certain programs with grants and contributions (\$1,247.7 thousand). We paid for the remaining public benefit portion of our governmental activities with \$364.4 thousand in state foundation allowance and with other revenue (i.e., interest and general entitlements).

The Academy experienced an increase in net position (deficit) of \$787.7 thousand. Key reasons for the change in net position were due to the Academy placing an emphasis on reducing expenses in the current year, as well as some increased funding from the State, which may be one time in nature.

As discussed above, the net cost shows the financial burden that was placed on the State and the Academy's taxpayers by each of these functions. Since unrestricted state aid constitutes the vast majority of Academy operating revenue sources, the board of directors and administration must annually evaluate the needs of the Academy and balance those needs with state-prescribed available unrestricted resources.

The Academy's Funds

As we noted earlier, the Academy uses funds to help it control and manage money for particular purposes. Looking at funds helps the reader consider whether the Academy is being accountable for the resources taxpayers and others provide to it and may provide more insight into the Academy's overall financial health.

As the Academy completed this year, the governmental funds reported a combined fund balance of \$(362,541), which is an increase of \$281,687 from last year. The primary reason for the increase is a concerted effort to have expenditures less than revenue through revisions of operating expenses in the General Fund.

In the General Fund, our principal operating fund, fund deficit decreased by \$365,396 due to cost alignment with revenue and the partial waiver of the management fee that the Academy would normally pay to the Macomb Intermediate School District.

The fund balance of the Debt Service Fund decreased by \$83,709. The Debt Service Fund fund balance is restricted under the terms of the bond indenture agreement and can be used only to make required debt payments.

Budgetary Highlights

Over the course of the year, the Academy revises its budget as it attempts to deal with unexpected changes in revenue and expenditures. State law requires that the budget be amended to ensure that expenditures do not exceed appropriations. The final amendment to the budget was adopted in June 2024. A schedule showing the Academy's original and final budget amounts compared with amounts actually paid and received is provided in the required supplementary information of these financial statements.

Capital Assets and Debt Administration

Capital Assets

As of June 30, 2024, the Academy had \$724,068 invested in a broad range of capital assets, including land, buildings, vehicles, furniture, and equipment. This represents a net decrease (including additions, disposals, and depreciation) of \$15,543, or 2.1 percent, from last year.

	<u>2024</u>	<u>2023</u>
Buildings and improvements	\$ 718,214	\$ 732,652
Furniture and equipment	5,854	6,959
Total capital assets - Net of accumulated depreciation	<u>\$ 724,068</u>	<u>\$ 739,611</u>

There were no additions or disposals during the year, and there are no major capital projects planned for the 2024-2025 fiscal year.

Debt

At the end of this year, the Academy had \$1,240,000 in bonds outstanding. The outstanding debt is the result of the 2007 revenue bond issuance of \$1,800,000 used to finance the building purchase and renovation. See Note 8 for further details. As a result of noncompliance with debt covenants, the debt balance is classified as currently due and payable, although the bondholders have not yet formally called the debt.

Economic Factors and Next Year's Budgets and Rates

Our elected officials and administration consider many factors when setting the Academy's 2024-2025 fiscal year budget. One of the most important factors affecting the budget is our student count and financial support from the Macomb Intermediate School District (ISD). The state foundation revenue is determined by multiplying the blended student count by the foundation allowance per pupil. The 2024-2025 budget was adopted in June 2024 based on an estimate of students who will enroll in September 2024. Approximately 42.0 percent of total General Fund revenue is from the foundation allowance. Under state law, the Academy cannot assess additional property tax revenue for general operations. As a result, the Academy's funding is heavily dependent on the State's ability to fund local school operations. The amount of support needed from the ISD is determined during the year, depending on student enrollment data, and will be incorporated in amended budgets during the year.

Based on early enrollment data at the start of the 2024-2025 school year, we anticipate that the fall student count will be close to the estimates used in creating the 2024-2025 budget. Once the final student count and related per pupil funding are validated, state law requires the Academy to amend the budget if actual district resources are not sufficient to fund original appropriations.

Contacting the Academy's Management

This financial report is intended to provide our parents and investors with a general overview of the Academy's finances and to show the Academy's accountability for the money it receives. If you have any questions about this report or need additional information, we welcome you to contact the business office.

Debt service - Interest (Note 8)	-	87,412	87,412
Total expenditures	1,238,090	87,412	1,325,502
Excess of Revenue Over (Under) Expenditures	358,987	(77,300)	281,687
Other Financing Sources (Uses)			
Transfers in (Note 7)	192,661	186,252	378,913
Transfers out (Note 7)	(186,252)	(192,661)	(378,913)
Total other financing sources (uses)	6,409	(6,409)	-
Net Change in Fund Balances	365,396	(83,709)	281,687
Fund Balances (Deficit) - Beginning of year	(982,431)	338,203	(644,228)
Fund Balances (Deficit) - End of year	\$ (617,035)	\$ 254,494	\$ (362,541)

Governmental Funds

**Reconciliation of the Statement of Revenue, Expenditures, and Changes in
Fund Balances to the Statement of Activities**

Year Ended June 30, 2024

Net Change in Fund Balances Reported in Governmental Funds	\$ 281,687
Amounts reported for governmental activities in the statement of activities are different because:	
Governmental funds report capital outlays as expenditures; however, in the statement of activities, these costs are allocated over their estimated useful lives as depreciation:	
Depreciation expense	(15,543)
Revenue in support of pension contributions made subsequent to the measurement date	26,441
Interest expense is recognized in the government-wide statements when incurred; it is not reported in governmental funds until paid	619
Some employee costs (pension and OPEB) do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds	<u>494,502</u>
Change in Net Position of Governmental Activities	<u><u>\$ 787,706</u></u>

Note 1 - Nature of Business

Macomb Academy (the "Academy") was formed as a public school academy pursuant to the Michigan School Code of 1976, as amended by Act No. 362 of the Public Acts of 1993 and Act No. 416 of the Public Acts of 1994. The Academy filed articles of incorporation as a nonprofit corporation pursuant to the provisions of the Michigan Nonprofit Corporation Act of 1982, as amended, on July 28, 1995.

Macomb Academy operates under a contract with Central Michigan University (CMU) to charter a public school academy. The contract requires the Academy to act exclusively as a governmental agency and not undertake any action inconsistent with its status as an entity authorized to receive state school aid funds pursuant to the state constitution. CMU is a limited fiscal agent for the Academy and is responsible for overseeing the Academy's compliance with the contract and all applicable laws. The Academy's contract with CMU expires on June 30, 2025. The Academy is in regular contact with CMU on cash flow and enrollment projections, as well as other activities disclosed in Note 11, regarding its operations. The status and progress on these items is ongoing.

The Academy pays CMU 3 percent of its state aid revenue as administrative fees. The total administrative fee expense for the year ended June 30, 2024 paid to CMU was \$20,405.

The accompanying basic financial statements have been prepared in accordance with criteria established by the Governmental Accounting Standards Board for determining the various governmental organizations to be included in the reporting entity. These criteria include significant operational or financial relationships with the Academy. Based on application of the criteria, the Academy does not contain component units.

Note 2 - Significant Accounting Policies***Accounting and Reporting Principles***

Academy follows accounting principles generally accepted in the United States of America (GAAP), as applicable to governmental units. Accounting and financial reporting pronouncements are promulgated by the Governmental Accounting Standards Board. The following is a summary of the significant accounting policies used by the Academy:

Basis of Accounting

The governmental funds use the current financial resources measurement focus and the modified accrual basis of accounting. This basis of accounting is intended to better demonstrate accountability for how the government has spent its resources.

Expenditures are reported when the goods are received or the services are rendered. Capital outlays are reported as expenditures (rather than as capital assets) because they reduce the ability to spend resources in the future; conversely, employee benefit costs that will be funded in the future (such as pension and retiree health care-related costs or sick and vacation pay) are not counted until they come due for payment. In addition, debt service expenditures, claims, and judgments are recorded only when payment is due.

Revenue is not recognized until it is collected or collected soon enough after the end of the year that it is available to pay for obligations outstanding at the end of the year. For this purpose, the Academy considers amounts collected within 60 days of year end to be available for recognition.

Report Presentation

Governmental accounting principles require that financial reports include two different perspectives - the government-wide perspective and the fund-based perspective. The individual fund columns present their activities on the modified accrual basis of accounting, as discussed above, which demonstrates accountability for how the current resources have been spent. The government-wide columns are presented on the economic resources measurement focus and the full accrual basis of accounting in order to measure the cost of providing government services and the extent to which constituents have paid the full cost of government services.

Note 2 - Significant Accounting Policies (Continued)

Unrestricted state aid, intergovernmental grants, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenue of the current fiscal period. All other revenue items are considered to be available only when cash is received by the Academy.

Fund Accounting

The Academy accounts for its various activities in several different funds in order to demonstrate accountability for how we have spent certain resources; separate funds allow us to show the particular expenditures for which specific revenue was used.

Governmental Funds

Governmental funds include all activities that provide general governmental services that are not business-type activities. This includes the General Fund, special revenue funds, debt service funds, capital projects funds, and permanent funds. The Academy reports the following funds as major governmental funds:

- General Fund - The General Fund is the primary operating fund because it accounts for all financial resources used to provide services other than those specifically assigned to another fund.
- Debt Service Fund - The Debt Service Fund is used to record revenue and other financing sources and expenditures for the payment of interest, principal, and other expenditures for the 2007 bond issue.

Interfund Activity

During the course of operations, the Academy has activity between funds for various purposes. Any residual balances outstanding at year end are reported as due from/to other funds and advances to/from other funds. While these balances are reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements.

Furthermore, certain activity occurs during the year involving transfers of resources between funds. In fund financial statements, these amounts are reported at gross amounts as transfers in/out. While reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements.

Specific Balances and Transactions

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and demand deposits.

Receivables

Accounts receivable are shown net of an allowance for uncollectible amounts. The Academy considers all accounts receivable to be fully collectible. Accordingly, no allowance for uncollectible amounts is recorded.

Restricted Assets

Restricted assets exist when their use is constrained for a particular purpose. At June 30, 2024, this includes amounts segregated for the payment of debt based on bond covenant requirements.

Note 2 - Significant Accounting Policies (Continued)

Capital Assets

Capital assets, which include property, building, equipment, and vehicles, are reported in the applicable governmental column in the government-wide financial statements. Capital assets are defined by the Academy as assets with an initial individual cost of more than \$1,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated acquisition value at the date of donation. Costs of normal repair and maintenance that do not add to the value or materially extend asset life are not capitalized. The Academy does not have infrastructure-type assets.

Capital assets are depreciated using the straight-line method over the following useful lives:

	Depreciable Life - Years
Buildings and improvements	20-50
Furniture and equipment	5-20
Buses and other vehicles	7

Long-term Obligations

In the government-wide financial statements, long-term debt is reported as liabilities in the statement of net position. The face amount of debt, when issued, is reported as other financing sources in the governmental funds. As disclosed in Note 8, the Academy's debt is also recognized as a liability in the General Fund due to certain covenant violations, which has made the debt callable.

Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position and/or balance sheet will sometimes report a separate section for deferred outflows of resources. This separate financial statement element represents a consumption of net position that applies to a future period and will not be recognized as an outflow of resources (expenditure) until then.

The Academy reports deferred inflows related to revenue in support of pension contributions made subsequent to the measurement date and deferred pension and OPEB plan cost reductions.

In addition to liabilities, the statement of net position and/or balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element represents an acquisition of net position that applies to a future period and will not be recognized as an inflow of resources (revenue) until that time.

The Academy reports deferred inflows related to revenue in support of pension contributions made subsequent to the measurement date and deferred pension and OPEB plan cost reductions.

Net Position

Net position of the Academy is classified in three components. Net investment in capital assets consists of capital assets net of accumulated depreciation and is reduced by the current balances of any outstanding borrowings used to finance the purchase or construction of those assets. The restricted component of net position consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets. Unrestricted net position is the remaining net position that does not meet the definition of invested in capital or restricted.

Note 2 - Significant Accounting Policies (Continued)

Net Position Flow Assumption

The Academy will sometimes fund outlays for a particular purpose from both restricted (e.g., restricted grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted net position and unrestricted net position in the government-wide financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the Academy's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

Fund Balance Flow Assumptions

The Academy will sometimes fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the Academy's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Furthermore, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

Fund Balance Policies

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The Academy itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance).

The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority. The board of directors is the highest level of decision-making authority for the government that can, by adoption of an ordinance prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the ordinance remains in place until a similar action is taken (the adoption of another ordinance) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The Academy has, by resolution, authorized the finance director to assign fund balance. The board of directors may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally exist only temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

Grants and Contributions

From time to time, the Academy receives federal, state, and local grants, as well as contributions from individuals and private organizations. Revenue from grants and contributions (including contributions of capital assets) is recognized when all eligibility requirements, including time requirements, are met. Grants and contributions may be restricted for either specific operating purposes or for capital purposes. Amounts that are unrestricted or that are restricted to a specific operating purpose are reported as nonoperating revenue. Amounts restricted to capital acquisitions are reported after nonoperating revenue and expenses.

June 30, 2024

Note 2 - Significant Accounting Policies (Continued)**Pension and Other Postemployment Benefit (OPEB) Plans**

For purposes of measuring the net pension and net OPEB liabilities (asset), deferred outflows of resources and deferred inflows of resources related to each plan, and pension and OPEB expense, information about the fiduciary net position of the Michigan Public School Employees' Retirement System (MPSERS) and additions to/deductions from MPSERS fiduciary net position have been determined on the same basis as they are reported by MPSERS. MPSERS uses the economic resources measurement focus and the full accrual basis of accounting. Contribution revenue is recorded as contributions are due, pursuant to legal requirements. Benefit payments (including refunds of employee contributions) are recognized as expenses when due and payable in accordance with the plan benefit terms. Related plan investments are reported at fair value.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

Upcoming Accounting Pronouncements

In June 2022, the Governmental Accounting Standards Board issued Statement No. 101, *Compensated Absences*, which updates the recognition and measurement guidance for compensated absences under a unified model. This statement requires that liabilities for compensated absences be recognized for leave that has not been used and leave that has been used but not yet paid in cash or settled through noncash means and establishes guidance for measuring a liability for leave that has not been used. It also updates disclosure requirements for compensated absences. The provisions of this statement are effective for the Academy's financial statements for the year ending June 30, 2025.

In December 2023, the Governmental Accounting Standards Board issued Statement No. 102, *Certain Risk Disclosures*, which requires governments to assess whether a concentration or constraint makes the government vulnerable to the risk of a substantial impact. It also requires governments to assess whether an event or events associated with a concentration or constraint that could cause the substantial impact have occurred, have begun to occur, or are more likely than not to begin to occur within 12 months of the date the financial statements are issued. If certain criteria are met for a concentration or constraint, disclosures are required in the notes to the financial statements. The provisions of this statement are effective for the Academy's financial statements for the year ending June 30, 2025.

In April 2024, the Governmental Accounting Standards Board issued Statement No. 103, *Financial Reporting Model Improvements*, which establishes new accounting and financial reporting requirements or modifies existing requirements related to the following: management's discussion and analysis; unusual or infrequent items; presentation of the proprietary fund statement of revenue, expenses, and changes in fund net position; information about major component units in basic financial statements; budgetary comparison information; and financial trends information in the statistical section. The provisions of this statement are effective for the Academy's financial statements for the year ending June 30, 2026.

Subsequent Events

The financial statements and related disclosures include evaluation of events up through and including October 25, 2024, which is the date the financial statements were available to be issued.

Note 3 - Stewardship, Compliance, and Accountability

Budgetary Information

Annual budgets are adopted on a basis consistent with generally accepted accounting principles and state law for the General Fund. All annual appropriations lapse at fiscal year end. The budget document presents information by fund and function, which is a summarization of the Academy's line-item adopted budget. The legal level of budgetary control adopted by the governing body (i.e., the level at which expenditures may not legally exceed appropriations) is the function level. State law requires the Academy to have its budget in place by July 1. Expenditures in excess of amounts budgeted are a violation of Michigan law. State law permits districts to amend their budgets during the year. During the year, the budget was amended in a legally permissible manner. The Academy amended budgeted amounts during the year in response to changes in funding sources, changes from anticipated pupil counts, and changes in expenditure levels.

Excess of Expenditures Over Appropriations in Budgeted Funds

The Academy did not have significant expenditure budget variances.

Noncompliance with Legal or Contractual Provisions

The Academy is currently in default on the financial covenants associated with the bonded debt for the year ended June 30, 2024. The Academy did make the required principal payment for the year ended June 30, 2024; however, the fiscal year 2019 principal payment remains unpaid. The Academy also had an uncured financial covenant. As a result, the bond trustee could call the debt and force immediate payment. As of the report date, the covenants have not been waived, and, therefore, the entire outstanding debt obligation continues to be classified as current.

Note 4 - Deposits and Investments

State statutes and the Academy's investment policy authorize the Academy to make deposits in the accounts of federally insured banks, credit unions, and savings and loan associations that have offices in Michigan. The Academy is allowed to invest in U.S. Treasury or agency obligations, U.S. government repurchase agreements, bankers' acceptances, certificates of deposit, commercial paper rated prime at the time of purchase that matures no more than 270 days after the date of purchase, mutual funds, and investment pools that are composed of authorized investment vehicles. The Academy's deposits are in accordance with statutory authority.

The Academy has designated two banks for the deposit of funds.

The Academy's cash and investments are subject to custodial credit risk, which is examined in more detail below:

Custodial Credit Risk of Bank Deposits

Custodial credit risk is the risk that, in the event of a bank failure, the Academy's deposits may not be returned to it. The Academy does not have a deposit policy for custodial credit risk. At year end, the Academy's deposit balance of \$756,570 had bank deposits of 286,075 (checking accounts) that were uninsured and uncollateralized.

June 30, 2024

Note 5 - Unavailable/Unearned Revenue

Governmental funds report unavailable revenue in connection with receivables for revenue that is not considered to be available to liquidate liabilities of the current period. Governmental funds also report unearned revenue recognition in connection with resources that have been received but not yet earned.

At June 30, 2024, the Academy had no unavailable revenue and \$32,305 of unearned revenue related to grant payments received prior to meeting all eligibility requirements.

Note 6 - Capital Assets

Capital asset activity of the Academy's governmental activities was as follows:

	Balance July 1, 2023	Additions	Balance June 30, 2024
Capital assets being depreciated:			
Buildings and improvements	\$ 1,225,461	\$ -	\$ 1,225,461
Furniture and equipment	58,320	-	58,320
Buses and other vehicles	41,362	-	41,362
Subtotal	1,325,143	-	1,325,143
Accumulated depreciation:			
Buildings and improvements	492,809	14,438	507,247
Furniture and equipment	51,361	1,105	52,466
Buses and other vehicles	41,362	-	41,362
Subtotal	585,532	15,543	601,075
Net governmental activities capital assets	<u>\$ 739,611</u>	<u>\$ (15,543)</u>	<u>\$ 724,068</u>

Depreciation expense totaling \$15,543 was not charged to activities, as the Academy's assets benefit multiple activities and allocation is not practical.

Note 7 - Interfund Receivables, Payables, and Transfers

Interfund transfers reported in the fund financial statements are composed of the following:

Paying Fund (Transfer Out)	Receiving Fund (Transfer In)	Amount
General Fund	Debt Service Fund	\$ 186,252
Debt Service Fund	General Fund	192,661
	Total	<u>\$ 378,913</u>

Note 7 - Interfund Receivables, Payables, and Transfers (Continued)

The General Fund transfers 20 percent of state aid revenue to the Debt Service Fund each year for payment of principal and interest amounts owed on the bond payable. As the bonds are recognized as a liability in the General Fund, upon payment of principal, the Debt Service Fund recognizes a transfer out to the General Fund and the General Fund recognizes a transfer in to reduce the debt balance in the General Fund. The transfer during 2024 exceeded the current year principal payment as previous transactions were accounted for as interfund payables and receivable. The current year transfer settled these balances.

Note 8 - Long-term Debt

Long-term debt activity for the year ended June 30, 2024 can be summarized as follows:

	Beginning Balance	Additions	Reductions	Ending Balance	Due within One Year
Bonds payable	\$ 1,295,000	\$ -	\$ (55,000)	\$ 1,240,000	\$ 1,240,000

Revenue Bonds

The Academy issued revenue bonds to provide for the acquisition and construction of major capital facilities and the acquisition of certain equipment. Revenue bonds are full faith and credit obligations of the Academy, payable solely from the Academy's state aid school payments.

Revenue bonds consist of \$1,800,000 of 2007 serial bonds due in annual installments of \$55,000 to \$130,000 through May 1, 2037, with fixed interest at 6.75 percent.

Debt Service Requirements to Maturity

Annual debt service requirements to maturity for the above bonds and note obligations are as follows:

Year Ending June 30	Governmental Activities		
	Other Debt		
	Principal	Interest	Total
2025	\$ 1,240,000	\$ 81,000	\$ 1,321,000

Assets Pledged as Collateral

The Academy's outstanding revenue bonds are secured with collateral of the Academy's school facility.

Significant Terms

The outstanding revenue bonds secured by collateral contain certain covenants, including a debt service coverage ratio and a minimum fund balance covenant. At June 30, 2024, the Academy was not in compliance with the required covenants and also missed the required principal payment in fiscal year 2019. The Academy is working with the bank to resolve noncompliance with the covenants, but it has also remained current on payment requirements under the amortization schedule. To the extent the covenants cannot be waived or corrected, the bonded debt could be called for immediate payment. As of the report date, the covenants have not been waived, and, therefore, the entire outstanding debt obligation has been classified as current.

Note 9 - Risk Management

The Academy is exposed to various risks of loss related to property loss, torts, errors and omissions, and employee injuries (workers' compensation). The Academy has purchased commercial insurance for all claims. Settled claims relating to the commercial insurance have not exceeded the amount of insurance coverage since inception.

Note 10 - Michigan Public School Employees' Retirement System***Plan Description***

The Academy participates in the Michigan Public School Employees' Retirement System (the "System"), a statewide, cost-sharing, multiple-employer defined benefit public employee retirement system governed by the State of Michigan that covers substantially all employees of the Academy. Certain academy employees also receive defined contribution retirement and health care benefits through the System. The System provides retirement, survivor, and disability benefits to plan members and their beneficiaries. The System also provides postemployment health care benefits to retirees and beneficiaries who elect to receive those benefits.

The System is administered by the Office of Retirement Services (ORS). The Michigan Public School Employees' Retirement System issues a publicly available financial report that includes financial statements and required supplementary information for the pension and postemployment health care plans. That report is available on the web at <http://www.michigan.gov/orsschools>.

Benefits Provided

Benefit provisions of the defined benefit (DB) pension plan and the postemployment health care plan are established by state statute, which may be amended. Public Act 300 of 1980, as amended, establishes eligibility and benefit provisions for the defined benefit pension plan and the postemployment health care plan.

Depending on the plan option selected, member retirement benefits are calculated as final average compensation times years of services times a pension factor ranging from 1.25 percent to 1.50 percent. The requirements to retire range from attaining the age of 46 to 60 with years of service ranging from 5 to 30 years, depending on when the employee became a member. Early retirement is computed in the same manner as a regular pension but is permanently reduced by 0.50 percent for each full and partial month between the pension effective date and the date the member will attain age 60. There is no mandatory retirement age.

Depending on the member's date of hire, MPERS offers the option of participating in the defined contribution (DC) plan that provides a 50 percent employer match (up to 3 percent of salary) on employee contributions.

Members are eligible for nonduty disability benefits after 10 years of service and for duty-related disability benefits upon hire. Disability retirement benefits are determined in the same manner as retirement benefits but are payable immediately without an actuarial reduction. The disability benefits plus authorized outside earnings are limited to 100 percent of the participant's final average compensation, with an increase of 2 percent each year thereafter.

Benefits may transfer to a beneficiary upon death and are determined in the same manner as retirement benefits but with an actuarial reduction.

Benefit terms provide for annual cost of living adjustments to each employee's retirement allowance subsequent to the employee's retirement date. The annual adjustment, if applicable, is 3 percent. Some members who do not receive an annual increase are eligible to receive a supplemental payment in those years when investment earnings exceed actuarial assumptions.

MPERS provides medical, prescription drug, dental, and vision coverage for retirees and beneficiaries. A subsidized portion of the premium is paid by MPERS, with the balance deducted from the monthly pension of each retiree health care recipient. Depending on the member's date of hire, this subsidized portion ranges from 80 percent to the maximum allowed by the statute.

Note 10 - Michigan Public School Employees' Retirement System (Continued)

Contributions

Public Act 300 of 1980, as amended, required the Academy to contribute amounts necessary to finance the coverage of pension benefits of active and retired members. Contribution provisions are specified by state statute and may be amended only by action of the state Legislature. Under these provisions, each school district's contribution is expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance a portion of the unfunded accrued liability.

Under the OPEB plan, retirees electing this coverage contribute an amount equivalent to the monthly cost for Part B Medicare and 10 percent, or 20 percent for those not Medicare eligible, of the monthly premium amount for the health, dental, and vision coverage at the time of receiving the benefits. The MPSERS board of trustees annually sets the employer contribution rate to fund the benefits. Participating employers are required to contribute at that rate.

Under Public Act 300 of 2012, members were given the choice between continuing the 3 percent contribution to retiree health care and keeping the premium subsidy benefit described above or choosing not to pay the 3 percent contribution and, instead, opting out of the subsidy benefit and becoming participants in the Personal Healthcare Fund (PHF), a portable tax-deferred fund that can be used to pay health care expenses in retirement. Participants in the PHF are automatically enrolled in a 2 percent employee contribution into their 457 accounts as of their transition date, earning them a 2 percent employer match into a 401(k) account. Members who selected this option stopped paying the 3 percent contribution to retiree health care as of the day before their transition date, and their prior contributions were deposited into their 401(k) accounts.

The Academy's contributions are determined based on employee elections. There are multiple different pension and health care benefit options included in the plan available to employees based on date of hire and the elections available at that time. Contribution rates are adjusted annually by the ORS.

The ranges of rates are as follows:

	Pension	OPEB
October 1, 2022 - September 30, 2023	13.75% - 20.16%	7.21% - 8.07%
October 1, 2023 - September 30, 2024	13.90% - 23.03%	7.06% - 8.31%

Depending on the plan selected, member pension contributions range from 0 percent up to 7.0 percent of gross wages. For certain plan members, a 4 percent employer contribution to the defined contribution pension plan is required. In addition, for certain plan members, a 3 percent employer match is provided to the defined contribution pension plan.

The Academy's required and actual pension contributions to the plan for the year ended June 30, 2024 were \$172,749, which includes the Academy's contributions required for those members with a defined contribution benefit. For the year ended June 30, 2024, the Academy's required and actual pension contributions include an allocation of \$65,574 in revenue received from the State of Michigan and remitted to the System to fund the MPSERS unfunded actuarial accrued liability (UAAL) stabilization rate.

The Academy's required and actual OPEB contributions to the plan for the year ended June 30, 2024 were \$39,005, which includes the Academy's contributions required for those members with a defined contribution benefit.

Note 10 - Michigan Public School Employees' Retirement System (Continued)

Net Pension Liability

At June 30, 2024, the Academy reported a liability of \$1,014,009 for its proportionate share of the net pension liability. The net pension liability was measured as of September 30, 2023, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of September 30, 2022, which used update procedures to roll forward the estimated liability to September 30, 2023. The Academy's proportion of the net pension liability was based on a projection of its long-term share of contributions to the pension plan relative to the projected contributions of all participating reporting units, actuarially determined. At September 30, 2023 and 2022, the Academy's proportion was less than 0.01 percent.

Net OPEB Asset

At June 30, 2024, the Academy reported an asset of \$(18,218) for its proportionate share of the net OPEB asset. The net OPEB asset for fiscal year 2024 was measured as of September 30, 2023, and the total OPEB liability used to calculate the net OPEB asset was determined by an actuarial valuation as of September 30, 2022, which used update procedures to roll forward the estimated liability to September 30, 2023. The Academy's proportion of the net OPEB asset was based on a projection of its long-term share of contributions to the OPEB plan relative to the projected contributions of all participating reporting units, actuarially determined. At September 30, 2023 and 2022, the Academy's proportion was less than 0.01 percent.

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For 2024, the Academy recognized pension recovery of \$181,025, inclusive of payments to fund the MPSERS UAAL stabilization rate. At June 30, 2024, the Academy reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 32,009	\$ (1,553)
Changes in assumptions	137,403	(79,223)
Net difference between projected and actual earnings on pension plan investments	-	(20,750)
Changes in proportion and differences between the Academy's contributions and proportionate share of contributions	102,323	(205,263)
The Academy's contributions to the plan subsequent to the measurement date	134,886	-
Total	\$ 406,621	\$ (306,789)

The \$65,574 reported as deferred inflows of resources resulting from the pension portion of state aid payments received pursuant to the UAAL payment will be recognized as state appropriations revenue for the year ending June 30, 2025. Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Years Ending	Amount
2025	\$ (103,236)
2026	1,363
2027	68,451
2028	(1,632)
Total	\$ (35,054)

June 30, 2024

Note 10 - Michigan Public School Employees' Retirement System (Continued)

In addition, the contributions subsequent to the measurement date will be included as a reduction of the net pension liability in the next year.

OPEB Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

For the year ended June 30, 2024, the Academy recognized OPEB recovery of \$144,610.

At June 30, 2024, the Academy reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ -	\$ (137,661)
Changes in assumptions	40,556	(4,884)
Net difference between projected and actual earnings on OPEB plan investments	56	-
Changes in proportionate share or difference between amount contributed and proportionate share of contributions	38,713	(128,890)
Employer contributions to the plan subsequent to the measurement date	25,197	-
Total	<u>\$ 104,522</u>	<u>\$ (271,435)</u>

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows (note that employer contributions subsequent to the measurement date will reduce the net OPEB asset and, therefore, will not be included in future OPEB expense):

Years Ending	Amount
2025	\$ (103,729)
2026	(50,028)
2027	(21,393)
2028	(5,108)
2029	(7,151)
Thereafter	(4,701)
Total	<u>\$ (192,110)</u>

Actuarial Assumptions

The total pension liability and total OPEB liability as of September 30, 2023 are based on the results of an actuarial valuation as of September 30, 2022 and rolled forward. The total pension liability and OPEB liability were determined using the following actuarial assumptions:

Actuarial cost method		Entry age normal
Investment rate of return - Pension	6.00%	Net of investment expenses based on the groups
Investment rate of return - OPEB	6.00%	Net of investment expenses based on the groups
Salary increases	2.75% - 11.55%	Including wage inflation of 2.75%
Health care cost trend rate - OPEB	6.25% - 7.50%	Year 1, graded to 3.5% in year 15, 3.0% in year 120
Mortality basis		PubT-2010 Male and Female Employee Annuitant Mortality tables, scaled 100% (retirees: 116% for males and 116% for females) and adjusted for mortality improvements using projection scale MP-2021 from 2010
Cost of living pension adjustments	3.00%	Annual noncompounded for MIP members

Note 10 - Michigan Public School Employees' Retirement System (Continued)

Assumption changes as a result of an experience study for the periods from 2017 through 2021 have been adopted by the System for use in the annual pension and OPEB valuations beginning with the September 30, 2023 valuation.

Significant assumption changes since the prior measurement date, September 30, 2022, for the OPEB plan include a decrease in the health care cost trend rate of 0.25 percentage points for members under 65 and an increase of 1.0 percentage point for members over 65. There were no significant benefit terms changes for the pension or OPEB plans since the prior measurement date of September 30, 2022.

Discount Rate

The discount rate used to measure the total pension and OPEB liability was 6.00 percent as of September 30, 2023. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that academy contributions will be made at statutorily required rates.

Based on those assumptions, the pension plan's fiduciary net position and the OPEB plan's fiduciary net position were projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan and OPEB plan investments was applied to all periods of projected benefit payments to determine the total pension liability and total OPEB liability.

The long-term expected rate of return on pension plan and OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class	Target Allocation	Long-term Expected Real Rate of Return
Domestic equity pools	25.00 %	5.80 %
Private equity pools	16.00	9.60
International equity pools	15.00	6.80
Fixed-income pools	13.00	1.30
Real estate and infrastructure pools	10.00	6.40
Absolute return pools	9.00	4.80
Short-term investment pools	10.00	7.30
Real return/opportunistic pools	2.00	0.30
Total	100.00 %	

Long-term rates of return are net of administrative expense and inflation of 2.7 percent.

June 30, 2024

Note 10 - Michigan Public School Employees' Retirement System (Continued)

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the Academy, calculated using the discount rate depending on the plan option. The following also reflects what the Academy's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percentage Point Decrease (5.00%)	Current Discount Rate (6.00%)	1 Percentage Point Increase (7.00%)
Net pension liability of the Academy	\$ 1,369,924	\$ 1,014,009	\$ 717,698

Sensitivity of the Net OPEB Asset to Changes in the Discount Rate

The following presents the net OPEB asset of the Academy, calculated using the current discount rate. It also reflects what the Academy's net OPEB liability (asset) would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percentage Point Decrease (5.00%)	Current Discount Rate (6.00%)	1 Percentage Point Increase (7.00%)
Net OPEB liability (asset) of the Academy	\$ 18,886	\$ (18,218)	\$ (50,105)

Sensitivity of the Net OPEB Asset to Changes in the Health Care Cost Trend Rate

The following presents the net OPEB asset of the Academy, calculated using the current health care cost trend rate. It also reflects what the Academy's net OPEB (asset) liability would be if it were calculated using a health care cost trend rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percentage Point Decrease	Current Rate	1 Percentage Point Increase
Net OPEB (asset) liability of the Academy	\$ (50,184)	\$ (18,218)	\$ 16,381

Pension Plan and OPEB Plan Fiduciary Net Position

Detailed information about the plan's fiduciary net position is available in the separately issued MPSERS financial report.

Payable to the Pension Plan and OPEB Plan

At June 30, 2024, the Academy reported a payable of \$4,135 and \$1,049 for the outstanding amount of contributions to the pension plan and OPEB plan, respectively, required for the year ended June 30, 2024.

Note 11 - Going Concern

At June 30, 2024, the fund deficit in the General Fund was \$617,035. Based on the continued enrollment decline and due to the bond covenant violation, mentioned below, there is doubt as to whether the Academy will generate sufficient cash flow to service its bonds and be able to finance its operations. During the year ended June 30, 2024, the Macomb Intermediate School District paid expenditures of approximately \$496,000 on behalf of the Academy that will not be reimbursed. The Academy recorded this amount as interdistrict revenue during the year ended June 30, 2024 to reflect this activity.

June 30, 2024

Note 11 - Going Concern (Continued)

The Academy has filed a forbearance request with the bond trustee and is actively working with legal counsel and the bond representatives to determine possible solutions. The board of directors is also evaluating its operating structure and adjusting cash flow projections to address the decline in enrollment and its impact on cash flow.

The Academy continues to be in default on the financial covenants associated with the bonded debt. Although the required principal payment was made during 2024, the required payment for fiscal year 2019 remains unpaid. The bond trustee could call the debt and force immediate payment. If that were to occur, the Academy does not have sufficient cash flow to pay the bonds, and the current appraised value of the building is less than the outstanding balance on the bonds. Since the covenants have not been waived, the outstanding balance on the bonds has been classified as current. Given the current financial situation involving enrollment and the need to restructure expenditures, the Academy is working closely with its legal counsel on appropriate next steps.

Pension Information

Benefit Changes

There were no changes of benefit terms in for each of the reported plan years ended September 30.

Changes in Assumptions

There were no significant changes of assumptions for each of the reported plan years ended September 30 except for the following:

- 2023 - The valuation includes the impact of an updated experience study for periods from 2017 to 2022.
- 2022 - The discount rate and investment rate of return used in the September 30, 2021 actuarial valuation decreased by 0.80 percentage points.
- 2019 - The discount rate used in the September 30, 2018 actuarial valuation decreased by 0.25 percentage points.
- 2018 - The discount rate used in the September 30, 2017 actuarial valuation decreased by 0.45 percentage points. The valuation also includes the impact of an updated experience study for the periods from 2012 to 2017.
- 2017 - The discount rate used in the September 30, 2016 actuarial valuation decreased by 0.50 percentage points.

OPEB Information

Ultimately, 10 years of data will be presented in both of the OPEB-related schedules. The number of years currently presented represents the number of years since the accounting standard requiring these schedules first became applicable.

Benefit Changes

There were no changes of benefit terms in for each of the reported plan years ended September 30.

Changes in Assumptions

There were no significant changes of assumptions for each of the reported plan years ended September 30 except for the following:

- 2023 - The health care cost trend rate used in the September 30, 2022 actuarial valuation decreased by 0.25 percentage points for members under 65 and increased by 1.00 percentage point for members over 65. In addition, actual per person health benefit costs were lower than projected. The valuation includes the impact of an updated experience study for periods from 2017 to 2022.
- 2022 - The discount rate and investment rate of return used in the September 30, 2021 actuarial valuation decreased by 0.95 percentage points. This resulted in a lower than projected per person health benefit costs to reduce the plan's total OPEB liability by an additional \$1.1 billion in 2022.
- 2021 - The health care cost trend rate used in the September 30, 2020 actuarial valuation increased by 0.75 percentage points for members under 65 and decreased by 1.75 percentage points for members over 65. In addition, actual per person health benefit cost was lower than projected. This reduced the plan's total OPEB liability by \$1.3 billion in 2021.
- 2020 - The health care cost trend rate used in the September 30, 2019 actuarial valuation decreased by 0.50 percentage points. This, in addition to the actual per person health benefit cost being lower than projected, reduced the plan's total OPEB liability by an additional \$1.8 billion in 2020.

June 30, 2024

- 2019 - The discount rate used in the September 30, 2018 actuarial valuation decreased by 0.20 percentage points. The valuation also includes the impact of an updated experience study for the periods from 2012 to 2017. This resulted in a lower than projected per person health benefit cost to reduce the plan's total OPEB liability by an additional \$1.4 billion in 2019.
- 2018 - The discount rate used in the September 30, 2017 actuarial valuation decreased by 0.35 percentage points. The valuation also includes the impact of an updated experience study for the periods from 2012 to 2017. This resulted in a lower than projected per person health benefit cost to reduce the plan's total OPEB liability by \$1.4 billion in 2018.

To the Board of Directors
 Macomb Academy

We have recently completed our audit of the basic financial statements of Macomb Academy (the "Academy") as of and for the year ended June 30, 2024. In addition to our audit report, we are providing the following results of the audit and informational items that impact the Academy:

	<u>Page</u>
Results of the Audit	1-4
Informational Items	5-11

We are grateful for the opportunity to be of service to Macomb Academy. We would also like to extend our thanks to Cindy Schwark and the entire business office for their assistance and preparedness during the audit. We recognize that preparing for the audit is carried out in addition to your staff's normal daily activities. Should you have any questions regarding the comments in this report, please do not hesitate to call.

Plante & Moran, PLLC

October 25, 2024

Results of the Audit

October 25, 2024

To the Board of Directors
Macomb Academy

We have audited the financial statements of Macomb Academy (the "Academy") as of and for the year ended June 30, 2024 and have issued our report thereon dated October 25, 2024. Professional standards require that we provide you with the following information related to our audit.

Our Responsibility Under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated July 23, 2024, our responsibility, as described by professional standards, is to express an opinion about whether the financial statements prepared by management with your oversight are fairly presented, in all material respects, in conformity with U.S. generally accepted accounting principles. Our audit of the financial statements does not relieve you or management of your responsibilities. Our responsibility is to plan and perform the audit to obtain reasonable, but not absolute, assurance that the financial statements are free of material misstatement.

As part of our audit, we considered the internal control of the Academy. Such considerations were solely for the purpose of determining our audit procedures and not to provide any assurance concerning such internal control.

We are responsible for communicating significant matters related to the audit that are, in our professional judgment, relevant to your responsibilities in overseeing the financial reporting process. However, we are not required to design procedures specifically to identify such matters.

We have noted the following instance of noncompliance with laws and regulations during the course of our audit, which is a repeat item from previous years:

The Academy failed to comply with certain debt covenants related to the bond on the building in the year ended June 30, 2024. As a result, the Academy's administration will need to continue to work closely with the lender to obtain a waiver or change the terms of the covenants for the future. Due to the acceleration of the reporting of the bonded debt as a current liability in the General Fund, the Academy has a deficit in fund balance, which is a violation of state law. The State is aware of this situation and is also aware that the Academy is working to develop a plan with the bondholders.

Our audit of the Academy's financial statements has also been conducted in accordance with *Government Auditing Standards*, issued by the Comptroller General of the United States. Under *Government Auditing Standards*, we are obligated to communicate certain matters that come to our attention related to our audit to those responsible for the governance of the Academy, including compliance with certain provisions of laws, regulations, contracts, and grant agreements; certain instances of error or fraud; illegal acts applicable to government agencies; and significant deficiencies in internal control that we identify during our audit. Toward this end, we issued a separate letter dated October 25, 2024 regarding our consideration of the Academy's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements.

Planned Scope and Timing of the Audit

We performed the audit according to the planned scope and timing previously communicated to you in our letter about planning matters on August 21, 2024.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. In accordance with the terms of our engagement letter, we will advise management about the appropriateness of accounting policies and their application. The significant accounting policies used by the Academy are described in Note 2 to the financial statements.

No new accounting policies were adopted, and the application of existing policies was not changed during 2024.

We noted no transactions entered into by the Academy during the year for which there is a lack of authoritative guidance or consensus.

We noted no significant transactions that have been recognized in the financial statements in a different period than when the transaction occurred.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected.

The most sensitive estimates affecting the financial statements were the Academy's share of the MPSERS net pension liabilities and other postemployment benefit (OPEB) plan assets recorded on the government-wide statements related to GASB Statement Nos. 68 and 75, respectively. The Academy's estimates as of June 30, 2024 were approximately \$1.0 million and \$18,200 for the pension and OPEB plans, respectively, based on data received from the Office of Retirement Services. We evaluated the key factors and assumptions used to develop the accounting estimates in determining that they are reasonable in relation to the financial statements taken as a whole.

The disclosures in the financial statements are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in performing and completing our audit.

Disagreements with Management

For the purpose of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. We did not detect any misstatements as a result of audit procedures.

Significant Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, business conditions affecting the Academy, and business plans and strategies that may affect the risks of material misstatement, with management each year prior to our retention as the Academy's auditors. However, these discussions occurred in the normal course of our professional relationship, and our responses were not a condition of our retention.

Following is a summary of significant issues that were discussed or were the subject of correspondence with management prior to or during our audit:

The current nature of the bonded debt, the enrollment levels not growing at a sustained pace, and the financial assistance received from the MISD during the year, when considered in the aggregate, indicate a substantial doubt about the Academy's ability to continue as a going concern for a reasonable period of time, particularly if the debt is called. The effect on the financial statements is the inclusion of an emphasis of matter paragraph in the report letter, as well as a note disclosure (see Note 11) in the financial statements.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated October 25, 2024.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a second opinion on certain situations. If a consultation involves application of an accounting principle to the Academy's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

This information is intended solely for the use of board of directors and management of the Academy and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Plante & Moran, PLLC

Chris Geck

Informational Items

Managing the Changing Financial Resources Landscape

As fiscal year 2024/2025 kicks off, the school funding landscape is changing. Since 2020, the Academy has faced a continuously changing environment. The pandemic created significant uncertainty, followed by a significant infusion of federal resources, and ultimately a stable and growing fiscal platform for the state budget. As new resources were added, new challenges were created to effectively plan, develop, deliver, evaluate, and account for the programs and services. Beginning with the 2024/2025 school aid budget, we have observed a change in the budget strategy. Projections suggest a slowing growth pattern for the School Aid Fund. For the first time in several years, the governor and Legislature were faced with difficult choices regarding what initiatives to fund or cut and where to modify funding levels, including the evaluation of initiatives that were borne out of the pandemic. While overall the School Aid Fund is as large as it ever has been, the ability to spread the funding to all desired initiatives is no longer realistic and academies will have to monitor how funding changes will impact educational initiatives.

We understand the unique challenges academies face within the changing funding landscape. We continue to work closely with state and federal decision-makers to both understand the changes and provide insight into potential implications. As a strategic partner and advocate for charter education, we continue to meet with decision-makers before actions are finalized so that these groups can be well informed of the implications their actions will have on the students, your business office, and your financial statements. Our work continues with federal and state agencies as new or revised accounting and compliance guidance is developed so we can help academies be better equipped to manage the new rules and requirements. As guidance is updated and opportunities are identified, we will continue to provide updates to aid the Academy in managing changes and navigating complexities. We understand that the last several years have required substantial extra effort by the Board of Education, administration, teachers, and support staff to bring the Academy through one of the most extraordinary times in education. We also understand that the work is not done, and we appreciate the opportunity to work side by side with your team during this next chapter.

School Funding - School Aid in Depth

The 2023/2024 fiscal year began the process of exiting the pandemic-related funding environment. Funding continued to include significant state-sourced increases, significant new education investments, and some significant one-time resources. While the 2023/2024 School Aid Fund suggested state fiscal sustainability, the 2024/2025 School Aid Fund estimates suggested the School Aid Fund is moving toward slower growth rates. As a result, while the 2023/2024 budget provided significant new resources for education, the development of the 2024/2025 school aid budget required more creativity. This comes at a time when federal pandemic-related funding ends at September 30, 2024 with the conclusion of the federal ESSER programs.

2023/2024 State Funding: The May 2023 Consensus Revenue Estimating Conference identified availability of significant new resources. This allowed the State to continue to make investments in education, shore up funding for long-standing programs, make investments where new needs were identified, and respond to the changing financial structure as federal pandemic-related funding begins to come to a close. Key highlights impacting the Academy's funding for 2023/2024 included the following:

- **Foundation Allowance:** Increased the target foundation allowance by \$458 per pupil to \$9,608, a 5 percent increase. Cyber schools did not receive an increase and continued at \$9,150.
- **Pupil Count:** Continued the traditional blended pupil count methodology, with 90 percent weighting for the October 2023 count and 10 percent weighting for the February 2023 count. However, for declining enrollment districts, a provision was added to use a two-year blended count to slow the impact of the decline on current year revenue. A district qualified if its 2023 final membership count was lower than the 2022 final membership count. In this case, an academy received additional funding through Section 29.

- **Special Education:** Special education funding is now fully treated as categorical and is not using foundation allowance amounts to supplement its required payments under the Headlee Amendment. In 2023/2024, special education funding provided by the State was provided from Section 51 of the State Aid Act. In the past, a portion of the funding was provided from Section 20, where the foundation allowance is determined.
- **At-Risk:** Increased funding for Section 31a/At-Risk programs and used an opportunity index to better weight funding based on need
- **Mental Health and School Safety:** Additional one-time funding infusion for student mental health and school safety services
- **Retirement:** Increased allocation for contributions to the retirement system to reduce its long-term cost

2024/2025 State Funding: As the 2023/2024 school year was coming to a close, the May 2024 Consensus Revenue Estimating Conference predicted that there will be sufficient resources for current programs but suggested that the revenue growth in the School Aid Fund will continue at a slower pace than the previous two years. As a practical matter, the conference conclusions suggest the funding growth will mirror more closely the pre-pandemic growth levels. As schools entered the 2024/2025 fiscal year, the School Aid Bill was completed and signed into law. The bill provided for some funding increases and resources to fund new initiatives agreed to by the governor and Legislature. It also reduced the allocation for some one-time categoricals. It increased resources provided for retirement, and it did not provide a foundation allowance increase, except for charter schools. Some key highlights of the School Aid Bill include the following:

- Charter schools received a 3.9 percent increase in their target foundation, estimated at \$9,983.
- Funding continues for declining enrollment districts to smooth the impact of resulting revenue decline.
- GSRP receives an increase in funding and provides for more families to be eligible for free preschool. Now, families who are less than four times the federal poverty level will be eligible for free service.
- At-risk funding is now over \$1 billion. Revisions to the program include new flexibility provisions to reduce teacher-student ratio and support retention and recruitment efforts.
- Categoricals continuing without substantive change include, but are not limited to, the following: Transportation, Future Educator Fellowship, Student Teacher Stipend, and ISD Operations support.
- Many smaller categoricals were eliminated or had reduced funding. However, the most significant funding reduction was for mental health and school safety. Since this program was considered a one-time program, it was not considered a cut; however, academies that built programming around this funding will need to determine if other sources can be used to fund the programs.
- **Special Education Services:** In 2023/2024, use of the foundation allowance to contribute to the State's support of special education ceased, and the State's contribution to support special education is paid entirely from a categorical allocation. These changes in the funding formula will have the effect of providing more state support to cover the cost of special education operations. The implication to the Academy will be that more funds will be freed up to support other general education activities. The actual amount of the shift varies by academy and requires some analysis. This funding methodology continued for 2024/2025.

Many of these initiatives have their roots in the education issues encountered during the pandemic, along with the desire to continue to address the recommendations first identified in the Michigan School Finance Collaborative, which outlined priorities for responding to education needs. Careful planning to effectively leverage these funding sources, along with managing programs initiated during the pandemic, will be critical for academies throughout the 2024/2025 school year.

Looking Forward to 2025 and Beyond

The May 2024 Consensus Revenue Estimating Conference provided a look into 2025, 2026, and 2027. Essentially, the conclusion from the conference indicates the expected funding levels are beginning to level off. The key implication is that it is unlikely that the School Aid Fund will be able to provide the same growth in resources available to charter schools as we move into the future. Given that, in the last few years, several categoricals were added to the funding scheme, as well as significant increases to the foundation allowance, the revenue estimates suggest that funding modifications may be required. Since many of the added categoricals were labeled as one-time categoricals, it appears that these programs may be most at risk of adjustment in the future. For 2024/2025, we have already seen such an adjustment for mental health and school safety, where the funding levels were significantly reduced. Key themes that continue to be areas of emphasis when evaluating future spending decisions include the following:

- **Federal Pandemic Resources:** The last major funding source is ARP ESSER III. It was funded as part of the Education Stabilization Fund and sunset on September 30, 2024. Some of the funding may have been used by the Academy to fund recurring costs of operations. This date, referred to as the funding cliff, will require each academy to evaluate its budget strategy to determine if resources supported recurring operations, and what resources will be available to fund continuing operations once the funds are depleted. The Academy will need to closely evaluate the impact of the sunset of the ESSER funds on future budgets.
- **Sustainability of Initiatives from 2023/2024:** There were several initiatives included in the 2023/2024 amendments to the State Aid Act. Revenue projections continued to show significant growth, creating room to fund recent and new initiatives. Many of the initiatives result from common themes, including the pandemic, mental health concerns of students and staff, addressing the teacher shortage, school security, continuing investment in preschool, vocational/career training, beginning to focus on educational infrastructure investment, meeting the special education funding requirements with categorical funds, and providing free meals to all students (new Section 30d). Many of these initiatives were carried forward and continued in the 2024/2025 amendments to the State Aid Act, but some were not due to resource constraints. The biggest example is the reduction in previously labeled one-time funding for mental health and school safety. Each initiative required assessment and planning by individual academies. With new resources comes new responsibility to determine the most effective way to leverage these funds for the benefit of the students, staff, and the Academy. The same challenges exist as academies assess the content of the 2024/2025 amendments to the State Aid Act.
- **Pupil Count Trends:** During the pandemic, most charter schools across Michigan experienced a decline in enrollment. Statewide enrollment has historically been slightly under 1.5 million students. Prior to the pandemic, annual enrollment figures were declining annually at about 10,000 students per year. However, during the pandemic, statewide enrollment decreased in excess of 50,000 students. As part of the Consensus Revenue Estimating Conference process, total enrollment is tracked and estimated. A key consideration in the projections continues to be to what extent the 50,000 student reduction will recover. Current data suggests that some portion returned as the rate of decline slowed, but enrollment will not recover to pre-pandemic levels. While this data is important statewide, it is very important at the local academy level. Since the foundation allowance is computed on a per pupil basis, a stable and predictable enrollment will have a substantial impact on the financial picture. As a practical example, on average, it takes about 10 students to fully fund a teacher position. As academies continue to operate in the post-pandemic period, continued focus on recruiting and retaining students and families will be essential to improving student enrollment.

The key lesson from the 2024/2025 budget cycle is that, since resources provided in the School Aid Fund are projected to return to a pace similar to pre-pandemic levels, the governor and Legislature will once again be forced to make difficult choices in deciding how to fund programs. In turn, academies will be required to adjust to changes in funding priorities and ultimately how resources will be used for local academy operations. Some of those challenges include the following:

- The impact of a recession on school funding, if it were to occur
- Fully utilizing the ESSER III allocation and how it will impact recurring operations once funding ends
- Staff retention and recruitment, including use of novel approaches, some of which are funded by state categoricals, for as long as they are in place
- Continued efforts at attracting and retaining students to the Academy
- Pupil count trends and projections for academies and school buildings to better plan staffing, infrastructure, and operational needs
- Evaluating programs addressing learning loss, including funding of programs once pandemic-related funding is concluded
- Planning for potentially expanded preschool services funded under an expanded GSRP, including identification and equipping of facilities
- Assessing food service operations as entering the second year of the new state-funded free breakfast and lunch program
- Potential staffing cost increases
- Operating cost increases resulting from inflation
- Technology cost increases and access to technology learning tools
- Costs for school security and mental health services, especially with the reduction in funding in 2024/2025
- Identifying, recruiting, and retaining staff to provide mental health and school security services
- Cost trends for the retirement system and the extent to which state support is used from the School Aid Fund

The next Consensus Revenue Estimating Conference will occur in January 2025. As academies move into the 2024/2025 school year, they will need to carefully plan for how best to use current resources as well as begin to plan for potential adjustments going forward as state funding growth begins to slow.

Prevailing Wage Requirements

When utilizing federal funding for projects that fall under the definition of construction in the Davis Bacon provisions, there are specific guidelines that may apply, such as the prevailing wage requirement. Prevailing wage requirements will apply when an academy utilizes federal funding for remodeling, renovation, repair, or construction contracts over \$2,000. The Academy must ensure the contract terms include the requirement to comply with prevailing wages, as well as ensure that certified payrolls were completed and subsequently reviewed by the Academy.

Upcoming Accounting Pronouncements

There are several upcoming accounting pronouncements that will have an impact on future financial statements of the Academy.

GASB Statement No. 101 - Compensated Absences

Academies have historically been required to account for certain types of accumulated employee leave time in their financial statements; however, the existing standards were written many years ago, and significant changes have occurred since then related to the various types of compensated absences that exist today. The GASB adopted a new pronouncement that addresses the accounting for compensated absences, which include vacation, sick, and other paid leave time. Under GASB 101, the Academy will record a compensated absence liability in the full accrual financial statements for leave time that (1) is attributable to services already rendered, (2) accumulates, and (3) is more likely than not to be used for time off or otherwise paid in cash or settled through noncash means. The liability is to be recorded each reporting period, in the full accrual statements only, using each employee's pay rate as of the date of the financial statements. The new standard also removes the historic requirement related to disclosing the gross additions and reductions to the compensated absence liability in the financial statements, and, instead, an academy can disclose only the net change during the year. The new standard also removes the previous requirement to disclose which funds are responsible for liquidating compensated absence liabilities as they are paid.

This statement is effective for the Academy's year ending June 30, 2025. The Academy should begin to review the requirements of this new pronouncement, as it may have an impact on how the Academy accounts for its compensated absence liability, including the cumulative effects of the accounting change on net assets as of July 1, 2024. Adoption will require assessments of historical data, and management should ensure this data is readily available to formulate assumptions.

GASB Statement No. 102 - Certain Risk Disclosures

This standard establishes financial reporting requirements for risks related to vulnerabilities due to certain concentrations or constraints. For those meeting the definition in the standard, the Academy will disclose the concentration or constraint, related events that could have a substantial impact, and actions taken to mitigate the risk. The Academy will need to carefully review the definition of concentrations and constraints to properly identify those that may require disclosure. This new standard is effective for the Academy's June 30, 2025 year end.

GASB Statement No. 103 - Financial Reporting Model Improvements

The objective of this standard is to make improvements to the financial reporting model, including Statement 34, *Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments*, and other reporting model-related pronouncements. A key change to this standard from the exposure draft is the removal related to the recognition in and the presentation of governmental funds. The standard's scope includes management's discussion and analysis (MD&A); proprietary fund financial statement presentation, particularly the operating/nonoperating classification; budgetary comparisons; major component unit information; and the presentation of unusual or infrequent items. This statement requires that the MD&A be limited to the five topics noted in the standard and provides further guidance on how the MD&A should be written. For proprietary fund financial reporting, the statement defines operating and nonoperating revenue and expense. It also requires a new subtotal for operating income (loss) and noncapital subsidies. The statement prescribes that the budgetary comparison be reported only in the required supplementary information section of the statements and dictates what variance information to be included. Next, the statement requires that major component unit information be presented separately in the statements of net position and activities, with a caveat for readability. Lastly, the statement describes unusual and infrequent transactions and outlines how they should be presented separately. This new standard will be effective for the Academy's June 30, 2026 year end.

OMB Revisions to the Uniform Guidance

In April 2024, the Office of Management and Budget (OMB) released revisions to the Uniform Guidance (UG) for federal grants and agreements. The guidance clarifies the applicability of requirements and terminology and includes some relaxation and clarification of certain requirements that required prior approval from federal regulators. Changes to certain administrative requirements are effective for grants received on or after October 1, 2024. One key change to audit requirements relates to the increase of the single audit threshold from \$750,000 to \$1 million. The Type A threshold for federal programs also increases from \$750,000 to \$1 million. This change is effective for fiscal year ends starting on or after October 1, 2024 and, therefore, would be applicable for the Academy's fiscal year ending June 30, 2026.

Capitalization Thresholds Under Uniform Grants Guidance

The April 2024 Uniform Grants Guidance Revision that is described above resulted in the equipment capitalization threshold increasing from \$5,000 to \$10,000. This threshold applies to the value of equipment that at the end of the grant period may be retained, sold, or otherwise disposed of with no further responsibility to the federal agency. In addition to considering this UG threshold related to federal grants compliance, it may be a good time for the Academy to re-evaluate the capitalization thresholds, understanding that there are various factors to consider. Ultimately, an academy will be required to track equipment purchases below \$10,000 for grant compliance purposes if the Academy's policy is set below this new federal floor.

**Summary Schedule of Prior Audit Findings
June 30, 2024**

Prior Year Finding Number:
2023-001

Fiscal Year in Which the Finding Initially Occurred:
2018

Federal Program, CFDA Number and Name:
N/A - financial statement finding

Original Finding Description:

The Academy is in violation of certain financial covenants associated with its bonded debt. Due to those violations, the bonded debt has been classified as currently due and payable. The Academy continues to make payments under the original debt schedule, as funds are available.

Status/Partial Corrective Action (as applicable):
Not corrected

Planned Corrective Action:

The Academy will continue to communicate with the bank, the chartering agency and other interested parties in order to resolve the debt covenants or find alternate funding solutions.

Macomb Academy
June 30, 2024
Corrective Action Plan

Finding Number: 2024-001

Condition: The Academy is currently in default on the financial covenants associated with the bonded debt and has the principal payment for 2019 in arrears, although all other payments to date have been made timely.

Planned Corrective Action: The Academy's management is working to develop a long-term solution to ensure debt compliance and sufficient cash flows for operations going forward.

Contact person responsible for corrective action: Paul Bodiya continues to work with the leadership of the Academy and the chartering organization and bond counsel to appropriately resolve the matter.

Anticipated Completion Date: Discussions are ongoing with an anticipated plan by June 30, 2025. The Academy continues to stay current with all required payments under the original amortization schedule, other than the missed 2019 principal payment.
