

From the Nurse's Desk - Parent Reminders

1. Remember to keep your child home if they have a fever of 100 degrees or higher or if they are sick.
2. If a student becomes sick at school, please have a plan to pick your student up promptly. Parents are encouraged to take their student to their primary care physician or urgent care.
3. The student may return to school when they are no longer sick if they do not have Covid-19.
4. If the student tests positive for Covid-19 they will need to quarantine for 10 days. They may return to school on day 11 if they have no fever without fever reducing medicine and their symptoms have improved.
5. If your student is required to quarantine, they cannot participate in extracurricular activities until their quarantine days are complete.
6. Please remember to have the Medication Authorization form signed by your child's doctor along with your signature before bringing any medications to the school nurse. Remember to bring only unopened, new bottles of medication.

*For any question or concerns, contact your student's school administrator.
