ARISTOTLEK12

A PRODUCT OF SERGEANT LABORATORIES

1. Complete Device Control

Equip educators with complete device control. With live, full-screen visibility, educators can view the entire class' screens and monitor an individual student's screen. Additionally, educators can close tabs, open websites, share their screens, limit access to an individual website or list of pre-selected websites, lock devices and send in-class announcements. All device controls can be applied to the entire class or an individual student.

2. Multi-Lingual Capabilities

Built to accommodate students of all backgrounds, AristotleK12 interprets and translates, displaying the preferred language to the student and educator, breaking down language barriers and improving student outcomes. Quickly translate text, video chat, chat transcripts, and videos shown to the class in real-time, allowing multi-lingual students and educators to communicate in any language.

3. Behavior Reports

Get further insight into students' online behavior. Educators and admins alike can view behavior trends for students for the entirety of the school year.

4. In-Class Educator Filter Controls

Educators can block or allow necessary websites and applications without disrupting the school-wide filter, helping to reduce reliance on IT and allowing the educator to continue with their lesson plan. Filter controls can be applied to the entire class, specified students, or an individual student.

5. Third-Party Compatible

AristotleK12 integrates with various third-party tools to elevate the user experience, including Google Classroom®, Microsoft® Education, Clever®, OneRoster®, and ClassLink®.

6. Test Proctoring

Ensure a secure testing environment with test mode. Educators can lock down the browser, ensuring students can only access the test or limit the students to pre-selected websites.

7. Customizable Experience

With over thirty-five different color combinations to choose from, educators can make their class dashboard uniquely theirs. Also, educators can arrange the student tiles in any arrangement they prefer. The options are limitless.

8. Co-Teacher Ready

Co-teachers can quickly be added by IT professionals or the primary teacher, ensuring the proper personnel has prompt access to the required classes.
