## **QUESTION AND ANSWER SHEET**

**QUESTION: Submitted on November 15, 2024**

1. Good afternoon on page 15 starts the fire suppression spec's on page 18 Brand Fogmaker North America water mist fire suppression system or approved equal. My question does this have to be a water mist system or can this be a dry system. Thank you look forward to your response.

**ANSWER: Answered on November 22, 2024**

**MCPSS requires a water base system because it's easy to clean up. Any dry system will leave a foam or powder on the equipment that would require extra time to clean up.**
