TROY TROJAN SHOUT-OUTS

OCTOBER 2026 • Growing, learning & doing great things!

KINDERGARTEN

Kindergarten has been working hard this month on identifying letter names and sounds, identifying rhyming words, and counting syllables in words. We went on a field trip to the pumpkin patch to pick out pumpkins, walked through a maze, and took a hay ride. We just finished Pumpkin Math day to show reading and math skills with 1st and 2nd grade. In Social Studies we have been working on how we are similar and different. Making the connection how even though we are different on the outside we are still the same on the inside. In Science, the Kindergarten class has been working hard to understand how we can reduce human impact on our environment during our everyday lives. Mrs. Heath is so proud of you. Keep up the great work! Have a fun and safe Halloween!

FIRST GRADE

In October, first grade learned all about adding and subtracting by counting on and back using, number lines, doubles, and models to solve problems. In ELA, they just finished rhyming. Rhyming has been fun and they're doing it every chance they can. First graders have enjoyed learning how to read maps, identify water and land, and now the continents and oceans in social studies. In science, they learned that vibrations make sound. We got to celebrate pumpkin math day today and they are continuing to practice T.R.O.Y. expectations in all school environments. Mrs. Heath is so proud of you all! Please have a safe and fun Halloween!

SECOND GRADE

Second grade has had a wonderful October! They enjoyed visiting Spring Valley Tree Farm for the pumpkin patch, hayride, and hay maze and chose some excellent pumpkins for pumpkin math day today. In math they have been learning all about money. They have been working hard to count it and add and subtract with money. In ELA they have been answering questions about texts and are now making tests for each other using question words about their research. In science they are learning about quick and slow changes to the earth. Second grade is rocking AR tests and Ms. Hazeltine is so proud of their behavior and positive attitudes. Let's give them a Trojan cheer!

THIRD GRADE

Third grade has been busy! In math they learned multiplication and division word problems, unit fractions, multiples of 10, and fact families! In ELA they have been paraphrasing stories and working hard on their benchmark reviews. In Social Studies, they learned about the geography of Latah County and chose where they would like to live based on the landforms. In Science, they are studying inherited traits and variation. They traveled to Dworshak Dam and Canoe Camp to learn about hydroelectricity and the Lewis and Clark exploration. Third grade continues to grow and show their TROY Expectations. Miss Loy is so proud of them and all their accomplishments! Way to go third grade!

FOURTH GRADE

Fourth grade has had another busy month! Students have been enjoying reading Tales of a Fourth Grade nothing by Judy Blume. In ELA they worked hard to learn how to find themes and summarize fictional passages. In Math, they learned how to do long division and now are learning how to find prime and composite numbers. In science, 4th graders learned about animal senses and created posters highlighting animals with extraordinary senses. In Social Studies, they researched the Lewis and Clark Expedition and made videos about the three regions of Idaho. Ms. Renfrow and Ms. Young are very proud of the work done in 4th grade

FIFTH GRADE

5th Grade has been class of the month for October and has enjoyed reading the morning announcements. They have been so busy this month learning so many new things. They have been practicing the Preamble of the United States Constitution to get ready for the Veterans Day assembly. In math, they have started to learn how to add and subtract fractions with unlike denominators. In ELA, they are finishing a five paragraph essay about which animal they believe makes the best pet. In science, they are learning about how all energy starts with the Sun and flows through the environment. Keep up the good work 5th grade. Mrs. Bohman is very proud of you.

SIXTH GRADE

Sixth grade just finished up a great science unit on space and our solar system and it was amazing to learn just how big it is! We are taking our test on Canada next week after learning about the resources, people, and cultures of our neighbor to the north. This week we started ALGEBRA and now there are letters and numbers in math. Whew, it’s a lot of work, but also a little fun. Mrs. Tibbals is proud of our hard work and the kindness she sees every day! Let’s have a Trojan Cheer!

Keep up the great work, Trojans!

Once a Trojan, always a Trojan!
