# Compare Like Fractions

Directions: Compare the fractions by comparing the common numerators or common denominators. Write  $<$ ,  $>$ , or  $=$ .

1.  $\frac{2}{4} \bigcirc \frac{2}{8}$

7.  $\frac{1}{3} \bigcirc \frac{1}{7}$

13.  $\frac{5}{8} \bigcirc \frac{4}{8}$

2.  $\frac{5}{9} \bigcirc \frac{5}{8}$

8.  $\frac{7}{16} \bigcirc \frac{10}{16}$

14.  $\frac{3}{5} \bigcirc \frac{1}{5}$

3.  $\frac{3}{8} \bigcirc \frac{2}{8}$

9.  $\frac{2}{3} \bigcirc \frac{2}{12}$

15.  $\frac{3}{8} \bigcirc \frac{6}{8}$

4.  $\frac{4}{6} \bigcirc \frac{2}{6}$

10.  $\frac{1}{7} \bigcirc \frac{2}{7}$

16.  $\frac{2}{5} \bigcirc \frac{2}{8}$

5.  $\frac{1}{7} \bigcirc \frac{1}{12}$

11.  $\frac{3}{8} \bigcirc \frac{4}{8}$

17.  $\frac{1}{4} \bigcirc \frac{1}{7}$

6.  $\frac{1}{5} \bigcirc \frac{3}{5}$

12.  $\frac{1}{4} \bigcirc \frac{2}{4}$

18.  $\frac{5}{7} \bigcirc \frac{5}{9}$

Think it Over: Use the rectangle to model  $\frac{1}{4}$  and then draw lines to create eighths. Describe the size of fourths compared to eighths.
