

DAY

10

NAME _____

Ostrich

The ostrich is native to the savanna and desert regions of Africa. They are omnivores and eat what is available. They mostly eat plants, roots, and seeds, but also eat insects, snakes, and lizards.

The ostrich is the tallest and heaviest bird in the world. They use their wings for balance instead of flying.

Instead of flying they can run at fast speeds for long periods of time. Their stride length can be 10 to 16 feet long. That is longer than most classrooms!

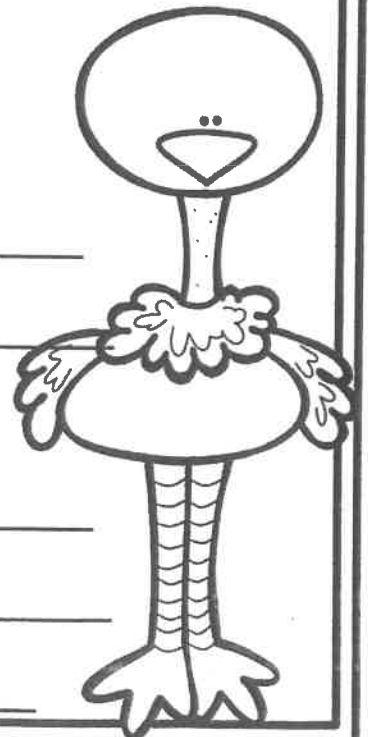

It was once called the "camel bird" because of its long eyelashes, tolerance of high temperatures, and its ability to go long periods of time without water.

For protection, an ostrich runs at fast speeds and uses its powerful feet to kick predators. They have been known to kill lions with their kicks!

Using the passage, what are two facts you learned about the ostrich?

1. _____

2. _____

Name: _____

Date: _____

Add:

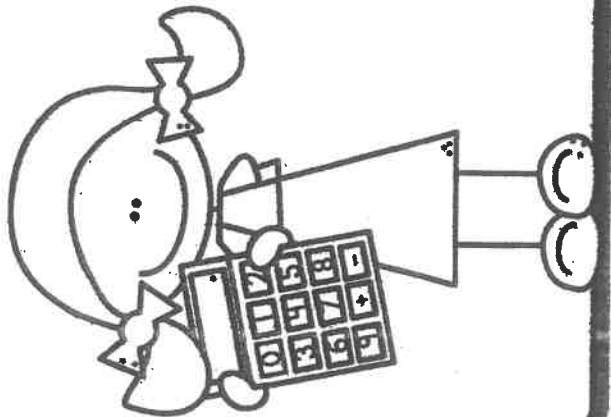

1. $18 + 51 =$ _____

2. $54 + 29 =$ _____

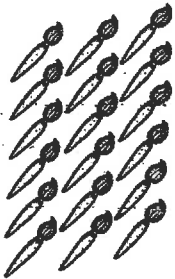

Subtract:

3. $85 - 23 =$ _____

4. $65 - 38 =$ _____

5. Write an equation to show how many brushies.

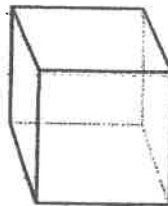

____ + ____ + ____ = ____

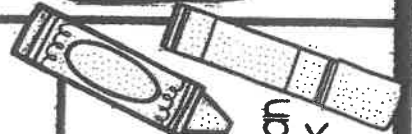

6. Write the number below in numerals.

three hundred sixty-two

7. How many faces does a cube have?

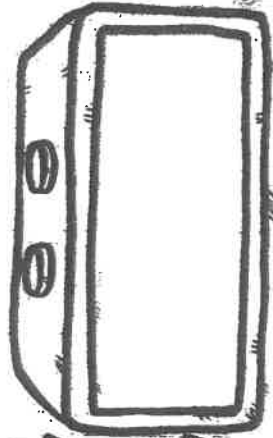

8. There are 52 markers and 28 crayons in Nick's desk. How many more markers than crayons does Nick have?

9. How many more 3rd graders would rather read than write?
