

ADDENDUM 2

Questions regarding IT25.03.10.2 Website Content Management System & Web Hosting

QUESTIONS

1. In Section V Specification of Services, there are a few questions where the language sounds like there is interest in one-way mass notification functionality. For example, if our platform has the ability to integrate with an SIS like PowerSchool.

Under Features / question 33, we are happy to provide additional pricing for other components of Apptegy's platform that were not specifically mentioned in this RFP. Would you be able to clarify or expand on if you would like pricing for our mass communications (Alerts) part of the platform to be kept separate, or would there be benefit in seeing a bundled pricing option for Website CMS & Web Hosting Services plus Mass Notifications Alerts?

A. Please provide the information for the Mass Communication separately on the bid response form with other services offered. You may also attach to the bid response a bundled pricing option IF that would affect the cost of the service.

2. Is the district's preference a locally hosted solution.

B. Services requested are for a complete hosted solution, not a locally hosted solution.
