# AVID Parent Night Third Grade Mrs. Fenton Mrs Knox Mrs. Davis

- Red Folders for Communication—we use a RED folder for communication. This folder is expected to come back and forth to school and home daily. This is a great place for you to place notes to the teacher or office, to place lunch money in an envelope, or any other documents you need to send to school. Your student needs to take these out of the folder and give them to the teacher when they get to class. Your students will bring notes and work home in this folder. These folders should be checked daily and the "keep at home" papers taken out.
- Read at Home started September 1st. This year, we will be using a monthly calendar.
  The students are expected to read for at least 20 minutes every night and then have
  an adult sign for that day's date. If students read enough times during a month, they will
  get to participate in a reward at the end of the month.
- Fluency Reading The third grade goal is for students to be reading 139 words per minute by the end of the year. We do monthly progress monitoring to check their progress and that information will be shared with you at student led conferences.
- **Timed Math Facts** Each week students will do a timed math fact sheet. All students start in addition. Once they pass with 98% or higher 3 times they then move to subtraction. After they also pass that 3 times at 98% or higher and then move to multiplication. For multiplication and division they need to pass 3 at 96% or higher. **The third grade goal is to be passing division by the end of the year.**
- Homework You should have noticed that students have been bringing home homework now. They will bring home homework on Monday and it is due back by Thursday. Also, on Thursday they will bring homework that is due back Monday. These are meant to be quick reviews and should take no more than 20 to 30 minutes. Break it up in smaller increments of time to complete the work if that works better for your family evening times.

- Thursday Notes Starting in October on Thursdays you'll see another piece of
  communication coming home in the form of a Thursday Note. This will let families know
  if their child has completed their work for the week and how their behavior skills have
  been applied for the week. This will give families time to help their child get caught up in
  work or have discussions about how to improve their behavior.
- Grades -correcting work students will be bringing home graded work in their red
  folders almost daily. This is a great way to check on their progress in class. Any
  assignments that are sent home the students do have the option of redoing for a better
  grade. If they correct the assignment and turn it back in to their teacher we will adjust
  the grade in the gradebook. This is only for daily assignments and not tests or
  assessments.
- ParentVue Another way for parents to check on their students' grades and progress in class is through ParentVue. Each of the teachers updates that regularly and should have fairly current grades shown. The grades are A, B, C, or BG. If you have questions about ParentVue please ask the office.
- Dojo Class Dojo is the best way to keep connected with the teacher and reminders of
  what is happening in class. If you have not yet got connected with your student's
  teacher please ask before you leave tonight and we can help you to get set up. Email is
  another great way to connect the teacher. These two methods are going to be the
  quickest way to communicate with the teacher.
- Student Led Conferences The next time we will officially meet will be on November 2nd or 3rd. These will be the dates for our first Student Led Conferences. We look forward to having your student share with you how they have been doing in 3rd Grade.

## 3<sup>rd</sup> Grade Language Arts Common Core Standards: At-A-Glance

## **Reading: Literature**

## **Key Ideas & Details**

- 1. Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.
- 2. Recount stories, including fables, folktales, and myths from diverse cultures; determine the central message, lesson, or moral and explain how it is conveyed through key details in the text.
- 3. Describe characters in a story (e.g., their traits, motivations, or feelings) and explain how their actions contribute to the sequence of events.

#### Craft & Structure

- 4. Determine the meaning of words and phrases as they are used in a text, distinguishing literal from nonliteral language.
- 5. Refer to parts of stories, dramas, and poems when writing or speaking about a text, using terms such as chapter, scene, and stanza; describe how each successive part builds on earlier sections.
- 6. Distinguish their own point of view from that of the narrator or those of the characters.

#### Integration of Knowledge & Ideas

- 7. Explain how specific aspects of a text's illustrations contribute to what is conveyed by the words in a story (e.g., create mood, emphasize aspects of a character or setting).
- 8. Not Applicable
- 9. Compare and contrast the themes, settings, and plots of stories written by the same author about the same or similar characters (e.g., in books from a series).

## Range of Reading & Complexity of Text

10. By the end of the year, read and comprehend literature, including stories, dramas, and poetry, at the high end of the grades 2-3 text complexity band independently and proficiently.

## **Reading: Informational Text**

## **Key Ideas & Details**

- 1. Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.
- 2. Determine the main idea of a text; recount the key details and explain how they support the main idea.
- 3. Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.

#### **Craft & Structure**

- 4. Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.
- 5. Use text features and search tools (e.g., key words, sidebars, hyperlinks) to locate information relevant to a given topic efficiently.
- 6. Distinguish their own point of view from that of the author of a text.

### Integration of Knowledge & Ideas

- 7. Use information gained from illustrations (e.g., maps, photographs) and the words in a text to demonstrate understanding of the text (e.g., where, when, why, and how key events occur).
- 8. Describe the logical connection between particular sentences and paragraphs in a text (e.g., comparison, cause/effect, first/second/third in a sequence).
- 9. Compare and contrast the most important points and key details presented in two texts on the same topic.

## Range of Reading & Complexity of Text

10. By the end of the year, read and comprehend informational texts, including history/social studies, science, and technical texts, at the high end of the grades 2-3 text complexity band independently and proficiently.

## **Reading: Foundational Skills**

## **Phonics & Word Recognition**

- 3. Know and apply grade-level phonics and word analysis skills in decoding words.
  - a. Identify and know the meaning of the most common prefixes and derivational suffixes.
  - b. Decode words with common Latin suffixes.
  - c. Decode multisyllable words.
  - d. Read grade-appropriate irregularly spelled words.

#### Fluency

- 4. Read with sufficient accuracy and fluency to support comprehension.
  - a. Read grade-level text with purpose and understanding.
  - b. Read grade-level prose and poetry orally with accuracy, appropriate rate, and expression.
  - c. Use context to confirm or self-correct word recognition and understanding, rereading as necessary.

## Writing

## **Text Types & Purposes**

- 1. Write opinion pieces on topics or texts, supporting a point of view with reasons.
  - a. Introduce the topic or text they are writing about, state an opinion, and create an organizational structure that lists reasons.

- b. Provide reasons that support the opinion.
- c. Use linking words and phrases (e.g., because, therefore, since, for example) to connect opinion and reasons).
- d. Provide a concluding statement or section.
- 2. Write informative/explanatory texts to examine a topic and convey ideas and information clearly.
  - a. Introduce a topic and group related information together; include illustrations when useful to aiding comprehension.
- b. Develop the topic with facts, definitions, and details.
- c. Use linking words and phrases (e.g., also, another, and, more, but) to connect ideas within categories of information.
- d. Provide a concluding statement or section.
- 3. Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.
  - a. Establish a situation and introduce a narrator and/or characters; organize an event sequence that unfolds naturally.
  - b. Use dialogue and descriptions of actions, thoughts, and feelings to develop experiences and events or show the response of characters to situations.
  - c. Use temporal words and phrases to signal event order.
  - d. Provide a sense of closure.

#### **Production & Distribution of Writing**

- 4. With guidance and support from adults, produce writing in which the development and organization are appropriate to task and purpose.
- 5. With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, and editing.
- 6. With guidance and support from adults, use technology to produce and publish writing (using keyboarding skills) as well as to interact and collaborate with others.

### Research to Build & Present Knowledge

- 7. Conduct short research projects that build knowledge about a topic.
- 8. Recall information from experiences or gather information from print and digital sources; take brief notes on sources and sort evidence into provided categories.
- 9. (Begins in Grade 4)

### Range of Writing

10. Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

## **Speaking & Listening**

## **Comprehension & Collaboration**

1. Engage effectively in a range of collaborative discussions (one-on- one, in groups, and teacher-led) with diverse partners on grade 3 topics and texts,

building on others' ideas and expressing their own clearly.

- a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion.
- b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion).
- c. Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others.
- d. Explain their own ideas and understanding in light of the discussion.
- 2. Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
- 3. Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.

### Presentation of Knowledge & Ideas

- 4. Report on a topic or text, tell a story, or recount and experience with appropriate facts and relevant, descriptive details, speaking clearly at an understandable pace.
- 5. Create engaging audio recordings of stories or poems that demonstrate fluid reading at an understandable pace; add visual displays when appropriate to emphasize or enhance certain facts or details.
- 6. Speak in complete sentences when appropriate to task and situation in order to provide requested detail or clarification.

## Language

### **Conventions of Standard English**

- 1. Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
  - a. Explain the function of nouns, pronouns, verbs, adjectives, and adverbs in general and their functions in particular sentences.
  - b. Form and use regular and irregular plural nouns.
  - c. Use abstract nouns (e.g., childhood).
  - d. Form and use regular and irregular verbs.
- e. Form and use the simple (e.g., I walked; I walk; I will walk) verb tenses.
- f. Ensure subject-verb and pronoun-antecedent agreement.
- g. Form and use comparative and superlative adjectives and adverbs, and choose between them depending on what is to be modified.
- h. Use coordinating and subordinating conjunctions.
- i. Produce simple, compound, and complex sentences.
- 2. Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.
  - a. Capitalize appropriate words in titles.

- b. Use commas in addresses.
- c. Use commas and quotation marks in dialogue.
- d. Form and use possessives.
- e. Use conventional spelling for high-frequency and other studied words and for adding suffixes to base words (e.g., sitting, smiled, cries, happiness).
- f. Use spelling patterns and generalizations (e.g., word families, position-based spellings, syllable patterns, ending rules, meaningful word parts) in writing words.
- g. Consult reference materials, including beginning dictionaries, as needed to check and correct spellings.

#### **Knowledge of Language**

- 3. Use knowledge of language and its conventions when writing, speaking, reading, or listening.
  - a. Choose words and phrases for effect.
  - b. Recognize and observe differences between the conventions of spoken and written standard English.

#### **Vocabulary Acquisition & Use**

- 4. Determine or clarify the meaning of unknown and multiple- meaning word and phrases based on *grade 3 reading and content*, choosing flexibly from a range of strategies.
  - a. Use sentence-level context as a clue to the meaning of a word or phrase.
- b. Determine the meaning of the new word formed when a known affix is added to a known word (e.g., agreeable/disagreeable, comfortable/uncomfortable, care/careless, heat/preheat).
- c. Use a known root word as a clue to the meaning of an unknown word with the same root (e.g., company, companion).
- d. Use glossaries or beginning dictionaries, both print and digital, to determine or clarify the precise meaning of key words and phrases.
- 5. Demonstrate understanding of figurative language, word relationships and nuances in word meanings.
  - a. Distinguish the literal and nonliteral meanings of words and phrases in context (e.g., take steps).
  - b. Identify real-life connections between words and their use (e.g., describe people who are friendly or helpful)
  - c. Distinguish shades of meaning among related words that describe states of mind or degrees of certainty (e.g., knew, believed, suspected, heard, wondered).
- 6. Acquire and use accurately grade-appropriate conversational, general academic, and domain-specific words and phrases, including those that signal spatial and temporal relationships (e.g., After dinner that night we went looking for them).

# 3<sup>rd</sup> Grade Math Common Core Standards: At-A-Glance

## **Operations & Algebraic Thinking**

## Represent and solve problems involving multiplication and division.

- 1. Interpret products of whole numbers, e.g., interpret  $5 \times 7$  as the total number of objects in 5 groups of 7 objects each. For example, describe a context in which a total number of objects can be expressed as  $5 \times 7$ .
- 2. Interpret whole-number quotients of whole numbers, e.g., interpret  $56 \div 8$  as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each. For example, describe a context in which a number of shares or a number of groups can be expressed as  $56 \div 8$ .
- 3. Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.
- 4. Determine the unknown whole number in a multiplication or division equation relating three whole numbers. For example, determine the unknown number that makes the equation true in each of the equations  $8 \times ? = 48$ ,  $5 = n \div 3$ ,  $6 \times 6 = ?$ .

## Understand properties of multiplication and the relationship between multiplication and division.

- 5. Apply properties of operations as strategies to multiply and divide. Examples: If  $6 \times 4 = 24$  is known, then  $4 \times 6 = 24$  is also known. (Commutative property of multiplication.)  $3 \times 5 \times 2$  can be found by  $3 \times 5 = 15$ , then  $15 \times 2 = 30$ , or by  $5 \times 2 = 10$ , then  $3 \times 10 = 30$ . (Associative property of multiplication.) Knowing that  $8 \times 5 = 40$  and  $8 \times 2 = 16$ , one can find  $8 \times 7$  as  $8 \times (5 + 2) = (8 \times 5) + (8 \times 2) = 40 + 16 = 56$ . (Distributive property.)
- 6. Understand division as an unknown-factor problem. For example, find  $32 \div 8$  by finding the number that makes 32 when multiplied by 8.

### Multiply and divide within 100.

7. Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that  $8 \times 5 = 40$ , one knows  $40 \div 5 = 8$ ) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers.

## Solve problems involving the four operations, and identify and explain patterns in arithmetic.

8. Solve two-step word problems using the four operations. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation

strategies including rounding.

9. Identify arithmetic patterns (including patterns in the addition table or multiplication table), and explain them using properties of operations. For example, observe that 4 times a number is always even, and explain why 4 times a number can be decomposed into two equal addends

## **Numbers and Operations in Base Ten**

Use place value understanding and properties of operations to perform multi-digit arithmetic.

- 1. Use place value understanding to round whole numbers to the nearest 10 or 100.
- 2. Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.
- 3. Multiply one-digit whole numbers by multiples of 10 in the range 10–90 (e.g., 9  $\times$  80, 5  $\times$  60) using strategies based on place value and properties of operations.

## **Numbers and Operations - Fractions**

## Develop understanding of fractions as numbers.

- 1. Understand a fraction 1/b as the quantity formed by 1 part when a whole is partitioned into b equal parts; understand a fraction a/b as the quantity formed by a parts of size 1/b.
- 2. Understand a fraction as a number on the number line; represent fractions on a number line diagram.
  - a. Represent a fraction 1/b on a number line diagram by defining the interval from 0 to 1 as the whole and partitioning it into b equal parts. Recognize that each part has size 1/b and that the endpoint of the part based at 0 locates the number 1/b on the number line.
  - b. Represent a fraction a/b on a number line diagram by marking off a lengths 1/b from 0. Recognize that the resulting interval has size a/b and that its endpoint locates the number a/b on the number line.
- 3. Explain equivalence of fractions in special cases, and compare fractions by reasoning about their size.
  - a. Understand two fractions as equivalent (equal) if they are the same size, or the same point on a number line.
  - b. Recognize and generate simple equivalent fractions, e.g., 1/2 = 2/4, 4/6 = 2/3). Explain why the fractions are equivalent, e.g., by using a visual fraction model.
- c. Express whole numbers as fractions, and recognize fractions that are equivalent to whole numbers. Examples: Express 3 in the form 3 = 3/1; recognize that 6/1 = 6; locate 4/4 and 1 at the same point of a number line diagram.

d. Compare two fractions with the same numerator or the same denominator by reasoning about their size. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with the symbols >, =, or <, and justify the conclusions, e.g., by using a visual fraction model.

## **Measurement and Data**

## Solve problems involving measurement and estimation of intervals of time, liquid volumes, and masses of objects.

4727 6×8=

My Class

- 1. Tell and write time to the nearest minute and measure time intervals in minutes. Solve word problems involving addition and subtraction of time intervals in minutes, e.g., by representing the problem on a number line diagram.
- 2. Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (I). Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem.

#### Represent and Interpret Data

- 3. Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step "how many more" and "how many less" problems using information presented in scaled bar graphs. For example, draw a bar graph in which each square in the bar graph might represent pets.
- 4. Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Show the data by making a line plot, where the horizontal scale is marked off in appropriate units—whole numbers, halves, or quarters.

## Geometric Measurement: understand concepts of area and relate area to multiplication and addition.

- 5. Recognize area as an attribute of plane figures and understand concepts of area measurement.
  - a. A square with side length 1 unit, called "a unit square," is said to have "one square unit" of area, and can be used to measure area.
  - b. A plane figure which can be covered without gaps or overlaps by *n* unit squares is said to have an area of *n* square units.
- 6. Measure areas by counting unit squares (square cm, square m, square in, square ft, and improvised units).
- 7. Relate area to the operations of multiplication and addition.
  - a. Find the area of a rectangle with whole-number side lengths by tiling it, and show that the area is the same as would be found by multiplying the side lengths.

- b. Multiply side lengths to find areas of rectangles with whole number side lengths in the context of solving real world and mathematical problems, and represent whole-number products as rectangular areas in mathematical reasoning.
- c. Use tiling to show in a concrete case that the area of a rectangle with whole-number side lengths a and b+c is the sum of  $a\times b$  and  $a\times c$ . Use area models to represent the distributive property in mathematical reasoning.
- d. Recognize area as additive. Find areas of rectilinear figures by decomposing them into non-overlapping rectangles and adding the areas of the non-overlapping parts, applying this technique to solve real world problems.

## Geometric measurement: recognize perimeter as an attribute of plane figures and distinguish between linear and area measures.

8. Solve real world and mathematical problems involving perimeters of polygons, including finding the perimeter given the side lengths, finding an unknown side length, and exhibiting rectangles with the same perimeter and different areas or with the same area and different perimeters.

## Geometry

### Reason with shapes and their attributes.

- 1. Understand that shapes in different categories (e.g., rhombuses, rectangles, and others) may share attributes (e.g., having four sides), and that the shared attributes can define a larger category (e.g., quadrilaterals). Recognize rhombuses, rectangles, and squares as examples of quadrilaterals, and draw examples of quadrilaterals that do not belong to any of these subcategories.
- 2. Partition shapes into parts with equal areas. Express the area of each part as a unit fraction of the whole. For example, partition a shape into 4 parts with equal area, and describe the area of each part as 1/4 of the area of the shape.
