Classroom News

Kindergarten

Welcome back!
Your Kindergarten teachers are excited and looking forward to a great school year. Parents please make sure you download the class Dojo app as your child's teacher will provide you with the classroom code. This is how you will be communicating with your child's teacher. Please make sure you are signing up for "Parent Portal " in order to access/ monitor your child's grade. This is going to be a great school year. Thank you in advance for your continued support as we navigate throughout the school year.

Team Kindergarten.

First Grade

Welcome Back Families. Our team of 1st Grade teachers are so excited to begin our journey this school year! We will begin with reviewing all the skills learned in Kindergarten. Students will get adjusted to having a real desk (which is major), working independently and collaboratively, and becoming responsible for their own learning. New routines and new teachers and new classmates will all take awhile to get used to, so, we are not going to rush our new 1st Graders, however, we will be moving them along. Please remember to use our methods of communication when you have questions, concerns, or suggestions. This is going to be an exciting school year!

Classroom News

Second Grade

For the month of September, second graders will become familiar with classroom procedures, routines and rules. Students will be introduced to many skills and tools that will help them become more responsible for their own learning. This school year will be filled with engaging and meaningful learning experiences for your child! Beginning of the year testing will begin on August 21st. It is **IMPORTANT** that your student is present on

testing days. Here are upcoming testing days:

Ready Reading: Wednesday, August 21st

Ready Math: Thursday, August 29th

BOY Writing: Thursday, August 21st

BOY Science: Wednesday, August 28th

STAR Reading: Tuesday, September 3rd

STAR Math: Thursday, September 5th

Our transdisciplinary theme for the next six weeks will be "Who We Are". In reading, students will be learning about main story elements and how to determine the plot and theme of a text. In math, we will be learning how to add and subtract with facts up to 20. We will be exploring the human body in science. Second graders will learn of the major organs in the body and how they function. As we set the atmosphere for treating each other fairly and being respectful, students will learn about culture and how families around the world are the same and different. Parents are encouraged to stay connected to Classdojo and reach out to their child's teacher if they have any questions or concerns.

Looking forward to a wonderful school year. Let Go Silver Streaks!!

Third Grade

Third grade has been off to a great start with procedures and beginning of the year testing. We are so excited with the progress that the students are showing so far in the skills we have been practicing. We will be focusing on how the world works for our transdisciplinary theme. We will still be focusing on the interaction between the natural world (physical and biological) and human societies across all subjects. The students will be learning about how different cultures and landmarks can help them understand different cultural backgrounds, identifying and classifying the different states of matter, identifying contributions from various ethnic groups around the world to the United States and understanding place value with addition and subtraction for multi-digit numbers and their different forms. The students will work on the key concepts of connection, function and perspective through open-minded thinking and inquiring skills during the month of September.

Some important dates are:

PM 1 FAST testing Reading September 10th

PM 1 FAST testing Math September 11th

OPEN HOUSE September 12th

Classroom News

Fourth Grade

Team Fourth-Grade is excited to welcome our new scholars! We have been hard at work building a strong sense of belonging in our classrooms by establishing a positive culture. In so doing, we have incorporated team-building exercises that promote collaboration, social skills, and communications skills. We also meet to discuss day to day happenings during our morning classroom group chats. Please ensure your child is at school early, so that they do not miss out on those experiences and opportunities to build a good rapport with their peers.

Classroom and homework routines, as well as expectations have been established and we look forward to a strong and productive school year!

Please sign up for your child's teacher's class dojo if you have not done so already. This is a vital form of communication for not just the classroom, but our school as a whole.

Fifth Grade

Fifth grade kicked off the year with a field trip to MOSI in Tampa with our fourth graders. It was the perfect way to jump into our Earth Space unit in Science. While at MOSI students were able to enjoy the Planetarium and Mission Moonbase as well as the other hands-on stations throughout the museum. Students have been working hard learning about the IB Learner Profiles and Approaches to Learning. Each fifth grader was asked to choose one Learner Profile that they felt embodied them the most, and another one they would like to work on throughout this school year. In math, class students have been showing off their artistic abilities with a symmetry lesson where they had to draw half of their faces recognizing that humans as well as shapes have lines of symmetry. We are looking forward to an exciting school year and will be diving into our first IB Unit of Inquiry.

Read 30 minutes each night.

Those who read regularly are shown to have an improved vocabulary. Being exposed to new words regularly and hearing from varying authors and characters is a great way to expand your personal vocabulary. Read every day and soon you'll be the most articulate and verbose person you know!

Frequently asked questions about the Primary Years Programme

What is the Primary Years Programme?

The PYP is a curriculum framework for young learners aged 3–12. Like all International Baccalaureate (IB) programmes, the IB learner profile permeates all facets of school life in the PYP.

The PYP is based on the recognition of a child's natural curiosity, creativity and ability to reflect. It generates a stimulating, challenging learning environment to nurture the whole child and foster a lifelong love of learning for all. The PYP is transdisciplinary, meaning students learn across subject areas while inquiring into big ideas.

Does the PYP have a specific set of standards?

The IB standards offer rigorous guidelines that allow for school and classroom practices to align with the IB educational philosophy and values. The PYP is a framework for schools and their approach to learning and teaching. Students explore significant concepts through units of inquiry. The six transdisciplinary themes that guide units of inquiry in each school year* are:

- Who we are
- Where we are in place and time
- How we express ourselves
- How the world works
- How we organize ourselves
- Sharing the planet

**Students aged 3 to 5 engage in four themes per year.*

Units of inquiry authentically interweave ideas and skills from the relevant subject areas:

- language
- social studies
- mathematics
- arts
- science
- personal, social and physical education

This approach encourages students to make their own connections between what they know and how it relates to the world around them.

The school outlines its specific knowledge content and academic curriculum within the framework of the PYP including:

- Knowledge content **organized** by the transdisciplinary themes. Each school decides specific concepts and topics studied through each theme based on their local context.
- Approaches to learning skills aimed to help students become independent, self-motivated learners.
- Action initiated by learners that is authentic, meaningful, mindful, responsible and responsive of their learning and the world they live in.

What are the advantages of an IB education?

- IB students develop a sense of the world around them and their responsibility to it. (See “[What is an IB Education?](#)”)
- IB World Schools (the only schools authorized to offer IB programmes) are subject to a strict accreditation process monitored by the IB, ensuring that schools provide a high-quality education.
- IB approaches to learning and teaching are research-based and draw from the best educational practices from around the world.
- IB teachers are required to participate in many professional development opportunities to continually improve their awareness of current educational practices and new thinking by connecting with the global IB community.
- IB programmes are recognized internationally and ease the educational transitions of mobile students so that their education is not adversely affected if their families relocate.

Does implementing an IB programme mean my child’s school will not teach local or national standards such as the Common Core?

The IB is committed to making sure that students in IB programmes meet and exceed local or national standards. With the implementation of any IB programme, schools are required to examine their curriculum carefully to ensure that there is alignment with local, state or national standards. More information on the IB and the Common Core is available at www.ibo.org.

Are IB programmes considered, “gifted”, programmes?

The PYP is implemented schoolwide and adapted by teachers to meet the learning needs of all students. All PYP teachers are required to participate in collaborative planning and reflection to meet those needs, and to foster a holistic approach to education. A growing body of evidence suggests a positive relationship between teacher collaboration and student achievement.

Have studies been done on the impact of the PYP?

The IB places great value on external validation of its programmes, curriculums and professional development. A recent Global International Schools' Assessment study found that PYP students outperformed non-IB students in mathematics, reading and writing. Additional studies on programme impact, quality assurance, programme development and assessment research are available at www.ibo.org/research.

When do students start and finish the PYP? When do they transition to the MYP?

The PYP is designed for students aged 3–12 (preschool and primary grades). The MYP spans students aged 11–16, and the Diploma Programme (DP) and Career-related Programme (CP) is for the last two years of high school, students aged 16–19.

Do IB teachers receive special training?

All PYP teachers receive professional development in IB’s approaches to teaching and approaches to learning from certified IB workshop leaders. This is a requirement for IB World Schools implementing the PYP.

What is my role in the PYP? How can I learn more about the IB and PYP?

Parents and caregivers are important members of the PYP learning community. All members of the learning community from the youngest learners to school leaders to parents, educators and beyond, have a responsibility to be guided by the IB and the learner profile attributes. To learn more:

Title I Parent and Family Engagement Plan Summary

Dear Parents,

Thank you for taking the time to read this Parent and Family Engagement Plan Summary. Below are brief summaries of how your child's school plans to support parent and family engagement, as well as how the Lake Wales Charter Schools District will support schools, parents, and families.

Engaging parents in the education process is essential to improve academic success for students.
