

Additional Q & A:

- You had responded that the curriculum is reviewed every 7 years. Do you know when it was last reviewed? I believe Math and Science were just completed, History is up this year for a change in the 225-2026 school year (this is K-12, I believe)
- Regarding Func 3100 Food Service Operations, do you know why that's part of the general fund and not the lunch fund? This fund isn't in the GF, it is the Hot Lunch fund which includes the salaries, food supply, etc. Typically, we do a transfer from GF to HL fund at the end of each year. We could potentially look at removing salaries/benefits from this fund, to make it more realistic "food" cost or keep it to show the entire picture of what it costs our district in all aspects of the Kitch operations.
- State aid: if we can keep the same payment made last year, then next year can we continue keeping it the same as "last year" (which is this year) if our enrollment continues to decline? State aid is based upon enrollment and will change every year, I think you are referring to general fund taxes, and yes you could continue to levy the same amount if the taxable valuation stays the same or goes down.
- NDSBA brochure: I'd be curious to know what an option 3 without a brochure would cost. I am unsure if this is an option, however I will ask and bring it to the meeting.
- There are 9 fewer students in the district this year, but reasons were only given for 3 of them. I believe we have a couple move out of the district (I think 2 to Dickinson and the additional might have been foster kids)
