REGULATION

REFERRALS TO OTHER AGENCIES

(Community Based Behavioral Health Providers – Parental Consent and Surveys)

Parental Consent

Annually, at student enrollment, the Superintendent will provide parents an opportunity to opt- in to school based behavioral health referrals.

Surveys

By statute, school districts are required to have a process for conducting a survey and reporting the results to Arizona Health Care Cost Containment System (AHCCCS). The Superintendent may rely on the AHCCCS generated survey, found here: <https://forms.gle/siXH3bgmn3xfw9qk9>. (See JLDAB-E). This survey reports the required data to AHCCCS in real time eliminating the need for end of the year reporting.

The Superintendent may develop a process which includes the AHCCCS survey being administered by partnering community based behavioral health providers. If the Superintendent chooses to conduct their own survey, they must report it to Arizona Health Care Cost Containment System as required by law, report to BHschools@azahcccs.gov.
