

CCBOE Exemplary Committee Self-Assessment

4/18/2022 - 6/30/2022

Coffee County Schools

The governance team self-assessment, which is based upon the Georgia State Board of Education Standards for Effective Governance, will provide the board and superintendent a status review on implementation of identified best governance practices. The roles and responsibilities of the governance team are clarified and quantified. The self-assessment instrument is not intended to be utilized as an evaluation instrument. However, it is design to provide benchmarks for the governance team and for their consideration in establishing improvements of governance best practices.

The self-assessment instrument can be used by the governance team internally, or an internal review committee or an external review committee.

After completion of the review, recommendations and action plans should be developed for the board's consideration. The recommendation may impact the system's strategic planning goals, the superintendent evaluation instrument, policy changes and financial planning.

Domain 1. Governance Structure

Description

The board of education and superintendent form the governance leadership team of the local school system, and act in a manner that focuses on improving student achievement and organizational effectiveness.

Board: The local board of education has "legislative," "executive" and "judicial" duties or functions in exercising control and management over a school district. A local board's "legislative" function is to adopt policies to govern the operation of the schools and have the authority to determine the amount of school taxes to be levied upon property in the school district. A board's "executive" function includes the employment and assignment of personnel on the recommendation of the superintendent, acquiring or disposing of real estate and other property, construction of facilities, preparation and adoption of an annual budget using the procedures mandated by the State Board of Education, entering into contracts, and borrowing money and signing promissory notes, subject to certain limitations. The "judicial" role of the board is to serve as a tribunal or school law court in order to resolve local matters of school law when specifically authorized or required by Georgia law.

Superintendent: The school superintendent is appointed by the board and who "shall be the executive officer" of the board of education. The "fundamental role" of a superintendent is to administer the implementation of policy established by the local board. In addition the superintendent serves as secretary to the board and is responsible for maintaining the minutes of board meetings. Additionally, the superintendent serves as the liaison between the State School Superintendent, makes all employment and assignment recommendations of school system personnel to the local board for approval, signs all employment contracts on behalf of the board, is responsible for any money borrowed and received by the school district to the same extent that the superintendent is responsible for other public school funds, signs notes along with the board chair to borrow money for the school system, acts as the agent of the board in procuring school equipment and materials, is responsible for ensuring that students receive and use prescribed textbooks, enforces all rules and regulations of the State School Superintendent and the local board according to the laws of the State, visits all schools in the school system; counsels with the faculty; files reports with the State Department of Education required by the State Board of Education from time to time; and performs any additional duties and responsibilities prescribed by the local board of education as part of the job description of the superintendent or contained within the contract of the superintendent.

Domain 2. Strategic Planning

Description

The governance leadership team, in collaboration with the community, adopts and enacts a planning process that results in an adopted system strategic plan designed to improve student achievement and organizational effectiveness.

Board: The board members participate in the development of the strategic plan and as a board adopts the system strategic plan based upon the superintendent's recommendations. Monthly, quarterly, but at least annually, the board reviews the performance measures of the strategic plan and reports to the community the results.

Superintendent: The superintendent participates in the development of the strategic plan and recommends to the board the adoption of the system strategic plan. The superintendent, as chief executive officer, implements, monitors, provides data reports on the strategic plan performance measures and makes recommendations to the board for consideration to improve the system's student achievement and effectiveness.

Domain 3. Board and Community Relations

Description

In order to ensure improved student achievement and organizational effectiveness, the governance leadership team creates and sustains healthy community relations, models professional relationships, creates a culture of mutual respect, and serves as a public school advocate for effective collaboration and engagement of internal and external stakeholders.

Board: As the elected officials charged with the constitutional authority to "manage and control" our state's public school districts, school board members have an obligation to communicate what they are doing to the citizens in the communities they serve. Effective communication, media relations, advocacy, crisis communications and planning, community relations, public engagement, outreach -- school board members must plan for and engage in these activities if they are to reach a level of excellence in governance.

Superintendent: The superintendent, with board guidance will develop, recommend and implement a communications plan for the school district and board to promote better public understanding and accountability. This communication plan needs to build relationships with the school district staff, the community, parents, legislators, county and city governments, community groups and more so that there is mutual trust and opportunities for information to be exchanged, not just handed out.

Domain 4. Policy Development

Description

The board adopts, revises, and follows written policies in accordance with laws and state board rules that include but are not limited to those that support improved student achievement, fiduciary responsibility, community and stakeholder engagement, organizational effectiveness, and continuous improvement.

Board: The Georgia Constitution delegates the control and management of public schools to local boards of education. The board is a group of individuals operating as a single entity through the policies it adopts or let stand. Board policies carry the force of law in the school system. Policies are principles and goal statements adopted by the board to define the parameters within which the superintendent and staff carry out their assigned duties. Policies, then, are statements describing what the board expects and requires. Once adopted, they continue in effect until revised or rescinded.

Superintendent: Regulations are the superintendent's plan to meet the policy expectations and requirements of the board. As long as the administration operates within the guidelines of policy adopted by the board, it may issue regulations without prior board approval unless board action is required by law or unless the board has specifically directed that certain types of regulations be submitted to the board for approval. The superintendent recommends policy actions to the board for adoption.

Domain 6. Personnel

Description

The Board of Education employs, sets performance expectations for, and evaluates the work of the superintendent; sets personnel policies and approves or denies personnel actions recommended by the superintendent in order for him/her to manage the system workforce to improve student achievement and organizational effectiveness.

Board: The school superintendent is appointed by the board and who "shall be the executive officer" of the board of education. Georgia Law [§ GA Code 20-2-210] requires the board to conduct an annual evaluation of the superintendent and, if deficiencies are noted, to prepare a professional development plan.

Additional Summary Points

- Evaluations shall be performed by the local board of education and trained to conduct evaluation
- Instrument must be a board approved instrument
- Performance evaluation records shall be part of the personnel evaluation file and shall be confidential

The board reviews and updates personnel policies to be in compliance with state statutes and state board rules. The board practices the board member code of ethics policy and maintains confidentiality pertaining to personnel. As with student records, in a rare case, the board may have a need to review a teacher's evaluation or a group of evaluations in order to carry out its lawful duties. In that case, the board may require the teacher evaluations to be produced to the board for its inspection or review during an executive session.

Superintendent: The "fundamental role" of a superintendent, as executive officer, is to administer the implementation of policy established by the local board. She/he assists the board in the development of an evaluation instrument which measures the board goals, strategic plan goals and system's operational effectiveness. The superintendent recommends to the board personnel policies for adoption, implements adopted policies, recommends personnel actions to the board and provides personnel data reports.

Domain 7. Financial Governance

Description

The board provides guidance to the superintendent and sets sound fiscal policy so that the school system is an effective steward of all resources to support student achievement and organizational effectiveness.

Board: One of the most important tasks for a local board is adopting the budget. The budget authorizes the targeted expenditure of revenue available to the school district, serves as a vehicle to control spending and clarifies the strategic goals and priorities of the school system. The board approves a process for budget development, community input and adopts each fiscal year budget consistent with strategic plan goals and State law provisions. The board adopts fiscal management policies to ensure effectiveness and efficiency for the implementation of adopted fiscal year budget.

Superintendent: The superintendent follows the board budget development processes as prescribed by board, state law provisions and recommends to the board the fiscal year budget. The superintendent provides monthly, quarterly, annual budget reports to the board, monitors the budget and makes budget recommendations when needed, manages the effectiveness and implements the budget accordingly to the state provisions and local board policies.
