

Free COVID Testing: Opt-In / Opt-Out

With COVID-19 and its variants still circulating, our school district understands the challenges of having maintaining an open and safe environment to learn. Having a sick child brings on multiple challenges for parents, their family, and the district at large. With that awareness, we would like to help break down some of those obstacles by offering students the convenience to be tested for COVID-19 at school, 100% for free.

We will have rapid COVID-19 testing available, with PCR test follow-ups to confirm any positive results, for those who choose to be tested. These rapid tests are lower nasal test and will not cause pain or discomfort. They are not the old test that are performed deeper into nose. If you would like this as an option for your child, written consent must be obtained before testing can occur.

A copy completed of this form **MUST BE RETURNED** by the next school day. Please help us reach our goal of 80% of students in our district being tested on a weekly basis. It is only at that level we can be confident of catching outbreaks early and keeping our schools, extra-curriculars and sports open and safe.

Check One

YES, I would like to enroll my child in the free, noninvasive, COVID-19 testing program. **Please sign and return this form**

NO, I do not wish to enroll your child in testing. I understand that by checking this box I am opting out of the testing program.
