## ROBBINS STATE REPORT CARD

OVERALL SCORE - 2023

# 70

Robbins earned a 70/C on the 2022-2023 state report card. This is an 8-point decrease from last school year. The letter grade reflects the overall score for our school, which is a combination of measures of achievement, growth, and chronic absenteeism. Each section of this newsletter will explain how the report card score was calculated and how we can work together to improve.

**Academic growth is based on how much students have grown from the previous year on the ACAP state test. Robbins earned 87.39 out of 100 points in growth. This is a decrease from 100% of students showing growth last year. Our goal is for ALL students to show growth!**

### HOW YOU CAN HELP US IMPROVE

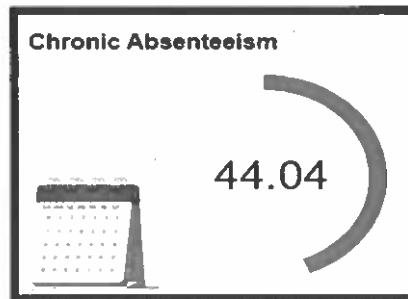

- Make sure your child comes to school every day!
- Monitor your child's academic progress.
- Talk with your child's teacher to find out ways to help them improve.
- Encourage your child to do their best in school.

## ATTENDANCE MATTERS!

Robbins earned 54.70 points out of 100 in achievement. This is based on student proficiency on the ACAP state test. Students in grades 2-5 take this test each spring. To be proficient, students must score a Level 3 or Level 4.

- 79 students in grades 2-5 who took the ACAP state test last year were chronically absent.  
Reading - 67% were NOT proficient.  
Math - 81% were NOT proficient.  
These students counted against us in attendance, achievement, and growth.

Chronic absenteeism refers to students who miss 18 or more days of school in a year.

- Last year 122 students were chronically absent, totaling 4,157 missed days of school. These students are at serious risk of falling behind in school. This is a serious problem!
- So far this year, we have 15 students who are chronically absent and will count against us. 41 more are at risk having missed more than 10 days of school.

**CHRONIC ABSENTEEISM = LOW ACHIEVEMENT & LOW GROWTH**
