 306 S. Ohio, Wanatah  
 219-733-2755

**Many area Pharmacies now have Immunization Clinics. Call to set up an appointment.**

The Vaccines for Children (VFC) program is a federally-funded program which provides vaccines free of charge to children 0-18 years of age who qualify for the program. Your local health department and medical provider may be enrolled in the program. These providers can offer vaccinations to children who are Medicaid eligible, uninsured or have health insurance that does not cover the cost of any or all vaccines. For more information on this program, please visit the IN State Department of Health website at: <http://www.in.gov/isdh/17203.htm>

**\*Underinsured children have private (commercial) health insurance but the coverage does not include all (or selected) vaccines, or children whose insurance coverage caps at a certain amount. This does not include children with a high-deductible health plan who have not yet met their deductible for insurance coverage.**

**\*\*Some, but not all, local health departments in the state of Indiana can bill private insurance carriers.**

**\*\*\*Local health departments can offer vaccinations required for entry to enrolled high school students ages 19 & older who are Medicaid eligible or are underinsured or uninsured**
