CONSTRUCTION UPDATES:

Safety Grant: The District is ready to move forward on plans for Safety Vestibules for each of the buildings. Drawings were received from Garrison Architects to complete the vestibules and install Access Control Systems for the doors and Security Cameras. Using the Camden County Educational Services Cooperative Pricing system, a quote has been received to complete the brick-and-mortar portion of the vestibules that is within the funding limit of the Safety Grant Award. We will look for additional funding sources to complete the project at a later date but are moving forward with this critical project so that we can get this into the construction material supply chain.

Informational: ROD and Non-ROD Grants

District Consultant Frank Domin has established contact with and conducted meetings with the official at the School Development Authority (SDA) charged with the Paulsboro projects that are jointly funded by the 2015 Bond Referendum and SDA. All parties are reviewing and familiarizing themselves with the projects since they have been dormant for approximately four years.

The first task is to assemble all of the required documents to apply for reimbursement from SDA for projects that are at the 65% completion level. When this information is submitted to and approved by SDA, reimbursement will be paid to the district.

The second task is to determine what facilities upgrade are included in the application to SDA. It appears that some of the items in the application to SDA were not part of the original scope of the bond referendum. On the other hand, some items included in the original scope of the project seem to have been “de-scoped” which removed them from funding consideration by SDA. Mr. Domin, working with representatives of SDA and School Architect Robert Garrison has resolved these concerns. All parties now agree that the project is now just as it was presented to the public for the 2015 bond referendum.

The SDA official emphasized the importance of beginning work on those items that all parties agree are within the scope of the projects. The work needs to be completed quickly for two reasons. First, the projects are critical repairs to district facilities. Second, to protect the funding available by SDA. Mr. Domin is now working with the School Architect and Camden County Special Services School District in order to restart projects. It seems likely that within a month or two, the Board of Education will be able to award contracts for projects such as heater controls, drainage projects, etc. so that the work begun in 2015 can move forward.
