**ANNOUNCEMENTS**

Girls! Are you curious about a future career in engineering? Engineers are creative problem solvers who invent solutions to everyday problems, help save lives and make a difference. With the goal being to encourage diversity in the engineering field by demonstrating how many opportunities there are and by showing that engineering is more than just being good at math and science, Michigan State University calls students to hear about a future in Engineering. This information session will be held from 2:30-3:30pm on Thursday, November 21st, in the media center. Broadening Participation K-12 and Women in Engineering will be presenting about all the different engineering majors at Michigan State! See you then!
