Looking to procure security gateways for threat detection and mitigation as well as granular insight and control of network traffic. Needs to support traffic control to offload vlan routing from our switches. Should be able to detect and handle all types of threats including but not limited to intrusion, viruses, zero-day threats, malicious sites, and exploits.

High Schools & Central Office (x5)	Should achieve 3Gbps throughput when all threat management capabilities are enabled
Middle & Elementary Schools (x3)	Should achieve 1Gbps throughput when all threat management capabilities are enabled
