

Chemistry I

Chemistry I curriculum is based solely off the TN state standards. Our adopted curriculum is from TN SAVVAS Chemistry and purchased by the Chester County School System.

Chemistry II (CLEP aligned)

Chemistry II is a course where students have the opportunity to take a free CLEP exam at the end to potentially earn college general chemistry I & II credits. While the class is built on the same framework described above for chemistry I, it is supplemented by modern college-level chemistry resources, such as Khan Academy and OpenStax.

The modern states program is used to obtain the free CLEP.
