

Subscribing Districts:

The School Board regards its annual budget as a policy document, through which the District's plans for the improvement of the secondary school program are expressed, as well as K-12 Pupil Services and RSSC Services. The operation and maintenance of school plant and equipment shall set high standards for safety, to promote the health of students and staff, to reflect prudent management of available resources, and to environmentally support efforts of the staff to provide a good education.

The Board of Education recognizes that money and money management comprise the foundation of the school District's educational programs and shall work with town boards and elected officials to provide adequate appropriations in support of these programs. To make that support as effective as possible, the Board of Education shall:

1. Encourage advance planning through the best possible budget procedures.
2. Explore all practical sources of revenue.
3. Guide the expenditure of funds so as to extract the greatest educational returns within the ability of the community to pay.
4. Establish top quality, accepted accounting and reporting procedures.
