

Privacy & Security Center

Google is committed to building products that help protect student and teacher privacy and provide best-in-class security for your institution. You can trust that Google for Education products and services continuously protect users, devices, and data from increasingly complex threats.

[Learn more](#)

VISIBILITY AND CONTROL

Get more visibility and control over your security

Breach and data loss prevention

Keep data safer with automated security features like data loss prevention (DLP) and Verified Boot.

Secure-by-design infrastructure

Get multilayered security for your entire IT stack.

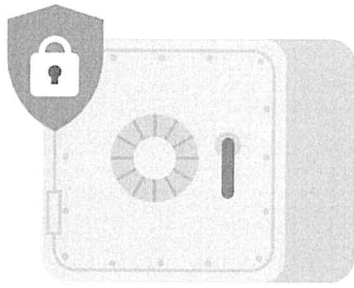

Data ownership

You own and control your Customer Data associated with your Google Workspace for Education account.

Real-time alerts and archiving

Vault and alert center enable real-time alerts and archiving so you can take action immediately to protect and preserve data.

DATA SECURITY

Protect your school's data with security built for educational organizations

Built-in protections

Safeguard user data with Gmail encryption and identity and access management.

Strong compliance

Our data protection practices comply with rigorous privacy and security requirements, and they're audited regularly by third-party organizations.

No ads

There are no ads in Google Workspace for Education Core Services, and core service data is not used for advertising purposes. Also in Additional Services, K-12 (primary and secondary school) students' personal information is not used for ads targeting.

Data transparency

Schools own their data — it's our responsibility to keep it secure. Google operates our own secure servers and platform services, and we make it easy for admins to manage data security.

THREAT PROTECTION

Take an actionable stance against threats with premium features in Google admin console

≡ Google for Education

Proactive tools

Upgrade to Google Workspace for Education Standard or Google Workspace for Education Plus for capabilities that allow you to respond faster to active threats, protect against future ones, and help you make informed security decisions.

Unified management

Get Chrome Education Upgrade to allow admins access to management tools and dashboards from a single console, making it easier to keep track of devices, usage, and data.

GOOGLE PRODUCTS

Take a deeper look at Google for Education products and security offerings

Google Workspace for Education

Chromebooks

Education Fundamentals

Alert center

Provides a complete view into security with notifications, alerts, and actions

Identity and access management

Manage access to tools with two-factor authentication, single sign-on, and password management

Data loss protection (DPL)

Helps prevent the loss or theft of data by allowing you to set your own rules and policies

Vault
