

Catching the Wave of Literacy and Learning This Summer!!

What an incredible start to our Summer Reading Camp and Summer Enrichment Programs across Calhoun County Public Schools!

Our students are actively engaged in meaningful learning experiences that are strengthening literacy, mathematics, critical thinking, creativity, and confidence. From phonics and reading comprehension to hands-on STEM activities, interactive learning games, writing experiences, and collaborative problem-solving, our students are making the most of every instructional minute.

I am especially proud of our administrators, dedicated teachers, support staff, and families who are working together to ensure student success. The excitement, engagement, and growth we are seeing in our classrooms are a testament to the commitment of everyone involved.

As we continue "Catching the Wave of Literacy and Learning," we remain focused on helping every student build the skills necessary for future success while creating joyful and memorable learning experiences along the way.

Thank you to our Summer Program Directors and staff for your leadership and dedication to our students. The future is bright because of the work happening in our schools each day!

Dr. Wanda Green-Adams,
District Summer Program Director
