

## **Mandatory Parent Notification from Recent Legislation**

### ***Synthetic Drugs***

AB 889 requires that CA public school districts, county offices of education, and charter schools annually inform parents/guardians of the dangers associated with using synthetic drugs and post this information on their web sites. Dangers to health and welfare of students can occur when an individual is using synthetic drugs that are not prescribed by a physician, such as fentanyl, and there is a possibility that dangerous synthetic drugs can be found in counterfeit pills. Please have a conversation with your health care professional for more information.
