

PARENT ACCESS TO SCHOOLOGY

Follow these five steps to gain access to your MCPSS Schoology parent account. All MCPSS parents and guardians should follow these instructions to access their parent accounts – even if they already had Schoology access this year or last year.

- Step 1: Visit <https://app.schoology.com>. Note that this is not the same address that students and teachers use to access Schoology.
- Step 2: Select “Forgot Your Password”. Select the “forgot your password” link directly under the Email and Password fields.
- Step 3: Enter Your Email. Enter the email address you used to register your child for this school year and click the “Send My Login Info” button.
- Step 4: Check Your Email. Check your email from Step 3 for further instructions for creating your own password. Check your spam folder if necessary. If you do not receive a reset link, contact your child’s school to verify your contact information.
- Step 5: Sign In to Schoology. Revisit <https://app.schoology.com> and sign in with your email address and new password.

With your MCPSS Schoology parent account, you can check your child’s individual assignment grades and course averages. It provides 24/7 access to your child’s grades and progress.
