

A Note from Miss Day's Science/Social Studies Class

Check out some vital information below. It's going to be a great year!

- In Social Studies, Students will learn about the 2nd Industrial Revolution to present day. Students will take their own written notes in class. Students may choose to print off notes AT HOME to bring to class that day. PowerPoints can be found under Presentations/Nine Weeks. Study Guides for ALL tests are already on my website. Other assignments included are Escapes, Vocabulary, Graphic Organizers, Projects, Menus, etc.
- In Science, Students will learn about Earth Processes and Systems. This includes rocks, weather, space/astronomy, oceans, tectonic plates, earthquakes, and volcanos. Students also take Notes in class, Doodle Notes, Research, Webquests, Projects, and STEM Days.
- Grading: Major-50% (tests & projects) Minor-50% (quizzes/in class assignments)
HW-5% would be a part of the Minor 50%.
- Assigned homework will typically be assignments that were not finished in class, Vocabulary words (if not finished in class), and projects.
- The homework grade starts off as a 100, and each signature in my HW Notebooks takes off 5 points off their homework grade. This is classified as a MINOR grade.
- Please try to have your child in my class daily. Science and Social Studies class blocks are 9:30 to 11:40 and 11:50 to 1:30 daily.
- Students are **always** welcome in my room in the mornings for questions, help, and make up work. If needed, we can schedule a day for make ups.

If you have any questions or concerns about my class, please feel free to contact me at taylor.day@acboe.net, through ClassDojo, AND join remind Send @missday707
