To Whom it may concern,

The Student Government of Frazier School District is holding its very first golf outing. We will use this fundraiser each year to benefit our whole student population. This year we will be raising money to support the purchase of a newer Drivers Education car. We are Thankful that Mr. Turek was able to bring this back to our school and that we have a great teacher Mr. Premus,

We are writing to ask for donations for our Chinese auction that will be held that day. Frazier School District appreciates all the community help and support! Reach out for donation drop off or pick up details.

Facts and Statistics on how Drivers Education Class helps students:

Teen Drivers and Crashes:

A study by the University of Nebraska-Lincoln found that teens who didn't take driver's ed were 75% more likely to get a traffic ticket, 24% more likely to be involved in a fatal or injurious crash, and 16% more likely to have a crash in general.

Graduated Licensing Systems:

All 50 states have created graduated driver licensing systems that limit high-risk driving situations for new drivers, which can reduce a teen's risk by as much as 50%.

Insurance Discounts:

Many insurance companies offer discounts to drivers who have completed a driver's education course, as they view these drivers as being less risky and more likely to be safe on the road.

State Requirements:

Most states require students to take a driver's education class, but even if yours doesn't, it's important to take an official course.

Failure Rates:

Data gathered by USA Today from state organizations showed that, of the 34 states providing comprehensive results, 65.2% of people passed their knowledge or skills tests, while 34.7% failed.

Let's make this a fun and beneficial day for our students and community!
