**APPENDIX A to Amended Executive Order No. 1**  
**Emergency Public Health Measures**  
**To Detain, Quarantine, and Isolate**

Authority

By the Public Health Emergency Declaration issued March 20, 2020, the Governor and Council authorized the Emergency Operations Center (EOC) to detain, isolate, and control freedom of movement as necessary to protect the community from the threat of an infectious, deadly disease.

The EOC has authority to detain and isolate people within the Pueblo's jurisdiction believed to have been exposed to the virus that causes COVID-19 until they are shown to have tested negative for the virus or have remained in quarantine beyond the incubation period and no longer represent a public health threat in accordance with the following procedures.

Procedure

1. Contact tracers authorized by the EOC will ask people who they believe have been exposed to the COVID-19 to obtain a free medical test and remain in self-quarantine, isolated from other people, until the results of the test are received. Pueblo staff will provide information and support until they are no longer a potential threat to public health.
2. If someone refuses to obtain a medical test when requested by authorized contact tracers, a written referral shall be made to the Public Safety Department (PSD) and the EOC providing the basis for believing that the person may have been exposed to the COVID-19 virus and a description of efforts that were made to obtain voluntary testing.
3. After receiving a referral, the EOC will consider any additional information from PSD and the Community Health and Wellness Department (CHWD), and, if the EOC determines it necessary in order to protect the community against a public health threat, order PSD to detain the person in their home or other suitable facility where they will not be a potential public health threat until they obtain a negative COVID-19 test result or are no longer infectious.
4. If the EOC receives information that a person is positive for the COVID-19 virus and refuses to isolate themselves voluntarily, it may order PSD to detain the person in their home or other suitable facility where they will not pose a public health threat until they are shown to be no longer infectious; *provided* the EOC provides necessary financial, medical, subsistence, and communication support during isolation.
5. All orders of detention or isolation issued by the EOC shall be provided in writing to the individual being detained or isolated and shall include:
  - a. a reasonably specific explanation of the reason for the order;
  - b. a request for additional information that may disprove the need for detention or isolation; and
  - c. instruction on how to challenge the EOC order in Pueblo Court.

Only the EOC can order isolation pending a requested coronavirus test. No one has authority to force testing over the objections of an individual. Officials should report any suspected exposures to the COVID-19 virus to the PSD for investigation and referral to the EOC.
