Studying at saginaw valley state university to be a medical laboratory technician.	Not staying on top of my grades and giving up half way through.	Beautiful Things by Benson Boone	Mr. Gehoski had the biggest impact on me. Whenever I didn't think I could do something or had a question I couldn't answer it always made me angry. I never used to ask questions because I was afraid that in doing so I would look dumb and people would judge me. In reality I was naive about the fact that everyone was struggling with something in different classes. I'm very passionate about math and Mr. Gehoski helped me through my junior year. I was always able to ask him questions without him giving me the answer directly. This helped me develop problem solving skills for later. He didn't make me feel stupid either. I felt very good about my work and I wanted to thank him before the end of the year but never got the chance. So this is my thank you. You are an amazing teacher and I'm glad to say you helped me the most in high school not only academically but you taught me to be more confident in my abilities. High school goes by way faster than you think it will, so get involved. I tried 5 different sports and 4 clubs throughout high school and it was a blast. You will only regret the things you never put yourself out there for. And always remember, people wont remember your stats or achievements, they will remember how you made them feel.
I will be attending Michigan State's College of Natural Science majoring in Human Biology along the pre-med track.	I didn't go to enough sporting events.	We Are Young by fun.	Mr. Mac has had a huge impact on me as a student this senior year. Thank you message: Thank you Mr. Mac for making my senior year filled with both learning but also incorporating fun into the lessons. All the jokes you made just made the days that much brighter. There was a moment that I accidentally did the wrong homework, but you just laughed with me and then helped me out. I appreciate all you've done for me and my peers, and I will miss you next year when I'm off to college.	Glance towards your future, but look through the present. Primadonna - Marina and The Diamonds	She doesn't go here and doesn't even live in the state of Michigan but I am so grateful to my freshman year biology teacher for her kind words and for her comfort, she was my last class of the day and every day when the bell rang we had a habit of just talking for 5-10 min after class just about life and she let me feel heard.	The crowd you surround yourself with will be the biggest impact on every aspect of your future.
I will continue through the Early Middle College program and after I finish I plan on transferring to either MSU or U of M.	Not going to more school events.	n/a	A teacher that had a large impact on me as a student was Mr. Frye. He has had an overall positive impact on me and others in his classes.	Try to be as involved as possible.
I plan on taking a gap year and doing some job shadowing, then going back to high school, most likely Delta.	I regret not taking car care earlier, and doing Auto Tech	Sense by Last Dinosaurs	Thank you Mr. and Ms. Derees, you have been the best teachers. I have learned a lot of life skills, discipline, and how to work in a group because of you. Thank you.	Do classes you genuinely find interesting, and take every opportunity you can. High school is short, but one of the most developmental points in your life. Make sure you become someone you want to be, not someone others want you to be.
i am going to take a gap year and than go to UNOH in 2027	Not switching schools sooner to Dow	We are young Janelle Monae	Mr. Ransom is the teacher that impacted my life the most and im very grateful for him being my teacher my two years here at dow.	Stick through high school it gets ruff but find your group and stick with them.

I'm going to UNOH for High Performance Automotive	devoting too much to romantic relationships and not finding the balance	Change by Deftones	Mr. Ransom for being there for me when nobody else was, and just overall being the best teacher I've ever had Ms. Burr had a big impact on me. Thank you for making human body systems so fun. You were an amazing teacher you always made us laugh and the cheese bread you used to make was BOMB. You truly taught me so much in your class and it has made my college level nursing classes so much easier on me. Thank you. He has helped me so much this year (my last year) with just being an amazing teacher. He made this year special because he was there to help me with my bad days. He asked if I was okay and would just be there for me if I needed to talk. Overall, I am glad I was his student this year.	Never give up. Believe that you are more than what people may tell you. When life gets dark, just know there will always be light at some point in time. It may not be sooner but it will come.
After high school, I will be going to Delta College for the first two years and then travel to Eastern Michigan University to pursue a career in the Paralegal industry. "The Climb" by Miley Cyrus	Ms. Berg- I'm so thankful for having you three of my four years at Dow. I plan on getting my associates in art at Delta, then transferring to Columbia College Chicago to major in fashion.	Not doing dual enrollment my junior year	Landslide - Fleetwood Mac		One of the most important advices which I wished I had listened to when I was a freshman is that you should try out as many different things as you can. This is so much easier to do when you are a freshman or sophomore than when you are a senior and not only will this build your experience in various areas, but it will help you determine what kinds of things you enjoy doing.
I will be attending Alma College to study in Pre-Physical Therapy and play on the Women's Soccer Team.				
I plan to go to University of Toronto for computer science with the eventual goal of becoming a software engineer.	Not getting involved in more non-academic related activities like clubs and personal projects earlier in high school

I'm not sure where yet, but I'm planning on getting a job as a veterinary assistant once I graduate. I'm probably going to take a few months to myself and adjust to life before applying to anywhere.

I cared too much about what people thought of me.

Mr. Thomas Evans was a great teacher. I know there were a ton of rumors going around about him, but I never, not for a second, believed those rumors. It is absolutely horrible that he got removed from our school because of the kids who started these disgusting rumors. They were just rumors, and I know he would have never done anything like what these students said he did. I cannot believe that some people, especially in high school, are so immature as to make rumors about such a kind man. All he wanted to do was teach; he wanted to help people learn and succeed in their academics, but he no longer can because of the rumors made about him. Thank you, Mr Evans, for being such an amazing teacher and person.

Going to Delta to get my BSN in nursing and a degree in Journalism. Then, my (very low) hopes are to attend Yale or Harvard to further continue studying Journalism.	Letting other people's opinions of me—real or not—shape who I was.	Patience by Tame Impala	I would say I have to thank two teachers, because they equally helped me push through and make my years at Dow High the most impactful. First, I want to thank Mr. Karapas, who unfortunately isn't employed through Dow anymore. Although I only had two years with him, he was such a charismatic, caring, and involved teacher who wanted nothing but the best for his students. He put himself in the middle of any conflict and immediately knew how to resolve it or help defeat it. He kept his classroom fun and engaging while making sure that his students were completing work and giving their best performance—and the performance knew they had. Secondly, I want to thank Mrs. Swanson. She was my teacher my senior year for Advanced Senior English, and although the year felt extremely short, I made a big connection with her. She would be the first friend to make sure everything is okay. She would notice every tiny detail about emotions and difficulties people might be experiencing just by the way people walked into the room. She gives amazing advice on how to handle assignments when stress becomes evident and gives amazing explanations on instructions for an assignment that may not be so clear at first glance. She is one of the most helpful, dedicated, and kind teachers I have ever had the pleasure of learning from. I give my thanks to both of these amazing educators as they have given a big part of themselves towards helping me figure out who I am and what I want to do after graduation.	Don't let the internet or your peers influence your likes or dislikes; be true to YOU.
I am going to go to SVSU and study to become an upper elementary school teacher	Not spending more time socializing			Spend time living, not just studying (but studying is important too).

Don't procrastinate and make sure to study for exams well ahead of time, even if you don't feel like you need to.

Going to Michigan Tech for Mechanical Engineering	Not taking classes as seriously	Southern Nights	Corey Spurling. I cannot put into words the level of impact you've had not only on my education and on my character and how I present myself. I could not have gotten the internship or networking opportunities I have without your guidance and teachings. How you teach and care for your students is truly special. I've been able to share my experiences with fellow students and other members of the community with pride acknowledging that my skills and abilities come from you. Thank you so much for all you've done for not only me, but all of your students. You've made an unforgettable impact on the students at Dow and have helped shape some phenomenal future engineers.	Don't underestimate your classes, grades aren't the point, learning the material is. Don't stress over a letter, stress over your understanding.

I will never forget what you did for not only me but all your students. You put so much effort and passion into what you do. You deserve all the praise for it but I hope you are taking on less nowadays. I saw how stressful it was to keep up on all that you took on but you will always have an army of willing students to assist you like me, Nick and Victor did in return for everything. Plus, the volunteering really helps us on our resumes. Anyways, again, thank you and please never lose your love for science.	schoolwork is not as important as you think, its a floor, It won't push you.
