

HOME BASE POWERSCHOOL PARENT PORTAL

See Parent Portal [Video](#)

[Video](#) del portal para padres

To create a Parent Portal account, add your child to the account, and begin accessing your child's school information, please follow the steps listed below. If you already have a Parent Portal ID and password, you may log in here.

The Home Base "Parent Portal" is a statewide student information system that gives parents and students access to real-time information including attendance, grades, and state and local test scores. With Home Base, powered by Pearson's PowerSchool application, everyone stays connected: Students stay on top of assignments, parents are able to track their child's progress, and teachers can instantly share information from their gradebook with parents and students.

Step 1. Contact the school data manager for your student's individual access code. There may be times that the school sends the code without you asking; the process below will work the same regardless.

Step 2. Obtain the Parent Portal letter from the school.

You will receive from the school a page that includes your access ID and password. If you misplace your access ID and password, please contact the school.

Step 3. Create a Parent Portal account.

Use the information you received in your letter from the school to create your "Parent Portal" account and add your child to the account. When you are ready, you can create an account **here**.

Step 4. Link an additional child to the account (If you have more than one child in RCSS).

Once you have created your Parent Portal account and added a child to the account, you do not need to repeat the entire process to add another child. Just log in to the Parent Portal account you created and use the access ID and password provided on the new child's letter from the school to add the child.

If your access ID and password do not work, please be sure you have first created your Parent Portal account.
