Description	Intensive Classroom Management Strategies is aimed at providing educators the skills to create a positive learning environment while using research-based methods to effectively deliver course content. Creating a safe learning environment is essential to the academic and social-emotional well-being of all children. Our goal is not to only deliver methods, but to teach the core principles and encourage educators to develop their own methods within program guidelines. While this course is rich in content, collaboration is key to making the most out of the program!
