

Patricia Ogletree

Mrs. Patricia Ogletree was born in Orlando, Florida. She graduated from Warner Robins High School. She received a Bachelor of Science in Education in 1982 from the University of Georgia. She later received a Master in Education from Mercer University.

Mrs. Ogletree began her teaching career at Northside High School in 1984 where she taught all grade levels throughout her 38 years as an Eagle. She retired from the Houston County School District in 2019 and continued to teach part-time until

2022. During her time in the District, she received several honors including STAR Teacher multiple times, Northside High School Teacher of the Year, and Tandy Technology Scholar. She also received the National Hewlett-Packard Graphic Calculator Grant. At Northside, she was the Math Club sponsor for many years and partnered with Parkwood Elementary School to mentor at-risk students through an after-school program.

Mrs. Ogletree and her husband, Jeffrey, have been married for 40 years and live in Fort Valley. Mr. and Mrs. Ogletree have one son. She loves to read, watch movies, and vacation with her sisters.

“ Patricia Ogletree possesses something unique that elite educators must have - the special balance of subject mastery with an uncanny ability to care for and connect with students from all backgrounds. She gave the same time, attention, and patience to all students, from those needing help with the most basic concepts of addition and subtraction to the most complicated Calculus concepts that are the foundation of the technology which permeates our lives today. I knew I wanted to become an engineer in high school, but little did I know that what I learned over 20 years ago in her classroom would still be serving me today. I am forever indebted for her care and instruction.

Dr. Anthony Hylick

“ Patricia Ogletree is not only one of the best math teachers I have observed, but one of the all-around best educators I had the pleasure of meeting. Among her math cohort, she was highly respected and revered for her teaching ability, strong leadership skills, steadfast work ethic and caring attitude for all. She had a keen ability to understand when a student or staff member needed a little support or mentorship. As an administrator, I would often find notes of encouragement on my desk from her at just the right moment. She made my job as a principal much easier, but she also helped make me a better administrator.
