Learning for Tomorrow, Today

Re-Opening Plan 2022-2023 School Year

The Fannin County School System (FCSS) offered face-to-face instruction for all students during the entire 2020-2021 school year with a virtual option for students and parents who preferred a virtual environment.

FCSS followed all Department of Public Health (DPH) COVID-19 contact tracing and quarantining protocols during the 2020-2021 school year.

All FCSS facilities were provided with a fogging and disinfecting system. These systems were utilized to disinfect certain classrooms and areas of the facilities after a known positive COVID-19 case.

The FCSS custodial staff and maintenance team followed all normal cleaning and disinfecting procedures during the 2020-2021 school year.

Following these protocols and procedures helped to mitigate the spread of COVID-19 within our schools and keep the number of positive COVID-19 cases low amongst our students and employees even in the height of the COVID-19 pandemic.

The Fannin County School System (FCSS) will offer face-to-face instruction for all students P-12 for the 2022-2023 school year.

All FCSS facilities will continue to disinfect certain classrooms and areas of the facilities after a known positive COVID-19 case.

The FCSS custodial staff and maintenance team will continue to follow all normal cleaning and disinfecting procedures during the 2022-2023 school year.

Given the success that FCSS had at mitigating the spread of COVID-19 and keeping the number of positive COVID-19 cases low during the 2020-2021 and 2021-2022 school years, we predict that we will also have success following the protocols and procedures described above for the 2022-2023 school year.
