

Greetings!

Welcome to the Public Service Pathway!

As the Instructor, my goal is to present general aspects of courses and programs in the Public Service Industry. I believe learning is a never ending process and through a lifelong process we build a frame work that is essential to developing our students into intelligent and responsible adults that are capable to contribute to the future public service industries and society.

In my class, my philosophy of learning is simple. After 48 years in Public Service, "I believe everyone can learn, they just learn differently". So, it is my responsibility to deliver problem solving skills through a menu of different strategies and applications to our students, hopefully discovering a way students become able to learn certain aspects of Public Service careers, whether it be Admin-

You can see the experiences provided to our students are not only real-world practices, but opportunities that provide them with a sense of purpose and accomplishment.

Fire Science:

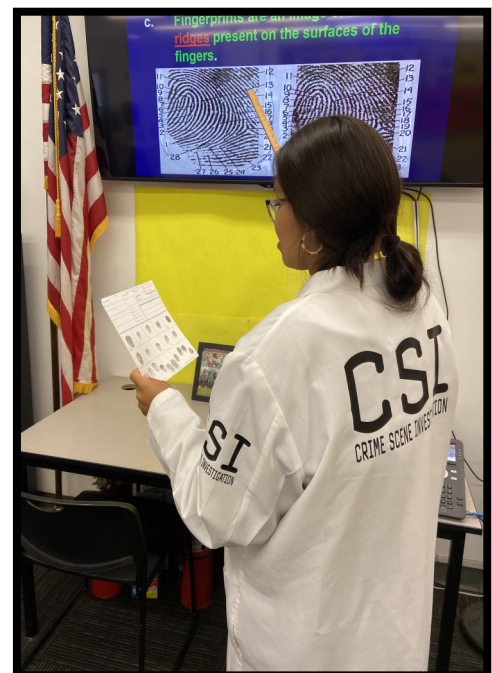

Micah Ignacio (above)

Taking fire equipment inventory for the upcoming Wildland Fire Academy; lead by the BIA Wildland Fire Service, Southern Division, in Riverside, California.

Fire Science: Dep Auguh (above)
