

5th Grade Newsletter

August 15-19

Mrs. Carter-Math

We will begin the year by learning estimating skills. Estimation will help us throughout the year to determine whether our solutions make sense. We will then multiply 2- and 3- digit whole numbers.

Mrs. Harbuck-Reading & LA

This week we will start getting into a routine working on spelling, editing, and daily lessons. We will read a nonfiction text and discuss character traits and adjectives.

- This week's homework will be to study spelling, vocabulary, and read AR books.

Mrs. Canady- Science

This week we will begin building science skills. Students will work with scientific tools and learn how to measure properly. Students will use qualitative and quantitative observations. We will take a beginning of the year science readiness assessment Thursday. This will not count as a grade. This assessment will be used to determine what skills we need to work on this year, and which have already been mastered. We will use it as a comparison throughout the year.

Social Studies

Students will learn about the various types of maps and map tools. They will apply this knowledge to obtain geographic data from various sources.

Important Dates & Notes:

- Schoolwide reading night is each Wednesday! A reading log will be sent home!
- BOY Map Assessments- 8/31, 9/1, 9/2
- Thank you so much for a wonderful first week of school. Your kids are amazing! Please return the "Parent Homework Letter" if you have not already done so.
