Page	Reference	Instructions	Significant Change
		We provide these instructions to help charter schools (charters) prepare the Charter School Annual Financial Report (AFR). Within the forms, blue font indicates that an instruction is linked to that specific line. The instructions button links to any general instructions or to the first instruction for a page. To return to the related forms after reviewing the instructions, simply click on the form's tab at the bottom of the Excel screen or press the Alt and back arrow keys.	
		The AFR presents condensed financial activity (i.e., beginning and ending balances, revenues and expenses, and budget to actual comparisons of expenses for the fiscal year) of the Charter for comparison purposes. This information assists sponsors, charter governing boards, administrators, ADE, legislators, other governmental agencies, and taxpayers in determining whether charters are meeting their stewardship responsibilities.	
		The Charter should complete the Cover, School listing, and Accounting data tabs first. This file has been designed to populate most amounts automatically based on provided accounting data. The Charter must manually enter amounts to the nearest dollar in the orange highlighted cells. Do not enter information in the shaded areas or protected cells and do not change formulas. Charters must follow all instructions to ensure uploaded files will pass validation checks.	
	General	All actual revenues, expenses, and account balances presented on the AFR must agree with the Charter's accounting records as of June 30, 2023. Revenue and expense account codes used in the AFR agree with the <i>Uniform System of Financial Records for Arizona Charter Schools</i> (USFRCS) Chart of Accounts. Charters that are exempted from all or part of the USFRCS in accordance with A.R.S. §15-183(E)(6) must use an accounting system that allows them to report financial data in the AFR standard expense types and functional uses. See the USFRCS Chart of Accounts for more information on project, function, and object codes and descriptions at https://www.azauditor.gov/reports-publications/charter-schools/manuals-memorandums. Charters should ensure their budget amounts agree to their most recently revised or adopted FY 2023 budget that was submitted to ADE.	
		Revenues must include cash receipts through June 30, 2023, and accrued revenues received after the end of the fiscal year. Examples of accrued revenues are cost reimbursement and entitlement programs, interest earned on investments, and FY 2023 Classroom Site Project revenues.	
		Expenses consist of all expenses incurred during the fiscal year, including expenses for goods and services received on or before June 30, 2023, but not paid for by that date. Examples of items requiring such treatment are included in the USFRCS, pages VI-G-8 and 9.	
		Alerts will appear on the cover page and throughout the form when areas of the AFR are not completed or do not appear to be accurately reported. The alerts will disappear as they are resolved. Detailed descriptions of the alerts, as well as guidance on how to resolve the alerts, can be found on the Alerts tab. Charters should complete all areas of the AFR that apply to their operations, whether or not the item is listed in the alert. These alerts do not replace the need for a separate employee to review the AFR for accuracy and completeness. Charters should ensure that no alerts remain on the cover page before uploading the files.	
Cover Name, county, CTDS numb		The charter name, county, and CTDS number should be entered on the cover page of the AFR. The CTDS number should not contain any slashes, dashes, etc., and must be exactly 9 digits. Zeros should be entered to fill the school portion of the number on the cover page. This information will be automatically transferred to other sheets in the file.

0		ADE will use the information included on this page to complete the National Public Education Financial Survey (NPEFS) and Form 33 issued by the National Center for Education Statistics. All charters are required to submit NPEFS data, which is used to calculate a State per pupil expenditure amount that is used in the formula for allocating a number of federal program funds to states and local education agencies, including Title I, Impact Aid, and Indian Education. Other programs use State per pupil expenditure data indirectly because their allocation formulas are based, in whole or in part, on State Title I allocations. The NPEFS and Form 33 data is also used by researchers and government policymakers to address important education policy and research issues.	
		Report all amounts from Projects 1000 through 1999 on this page. Do not include principal payments.	
		If the charter has a negative amount in cell G25 (supplies from State and local sources), the negative amount is likely from an adjustment made to recognize spending from Child nutrition program revenues reported in the afr23-food service.xlsx file as federal spending rather than State and local spending where the Food Service Project is initially reported. If there is a negative amount in cell G25:	
		1. Note the amount of the negative balance and add that amount at the end of the formula in cell G25 (for example "+200") to clear the negative. Then you must subtract that amount in total (for example "-200") at the end of the formula(s) for one or more of the other State and local spending cells (D25 through F25 or H25 through K25), without creating a negative balance in any of those cells.	
		2. Finally, to complete this adjustment, add the adjustment amount(s) from step 1 above to the applicable federal source columns by object code in cells D24 through K24.	
9		Property disbursements should include actual payments made during the year for capital acquisitions, not including related capital lease or other debt service payments. Property disbursements for nonfixed (movable) equipment in programs 100 through 600 should be allocated to functions 1000 through 4000 based on the intended use of the equipment. All other property disbursements for these programs should be included in function 4000.	
9	Property disbursements by type	Property disbursements for buildings should include only disbursements for the purchase of existing buildings. All disbursements for construction services for buildings and building improvements (whether or not construction is in progress at year-end) should be included on the construction line. Do not include capital lease or other debt service payments. Total property disbursements in this table should equal the sum of property disbursements in the 2 preceding tables above. If no disbursements were made during the year, enter a 0 value in each line.	
9	Debt service	Debt service amounts should include interest, redemption of principal, and other expenses for programs 100-630. Interest should be expenses charged to object code 6850. Redemption of principal should include payments made during the year for principal on capital leases and other long-term debt that were recorded as a reduction of the related liability. All other expenses coded within the 6800 object range, function 5000, should be included in line 6800 Other.
