

Calhoun County Public Schools Summer Programs Continue to Inspire Learning and Achievement

Week Two Highlights: Striving for the B.E.S.T. Summer of Learning

Calhoun County Public Schools celebrated another successful week of summer learning through its Summer Reading Camp, Summer Enrichment Program, and High School Summer School.

At St. Matthews K-8, students strengthened literacy skills through engaging reading activities, novel studies, and hands-on lessons. Highlights included *Reading with the Superintendent*, the "Seas the Day" celebration, and *Ice Cream Thursday*.

At Sandy Run K-8, students participated in literacy-rich, STEM-focused learning experiences, including ocean-themed activities, literature studies, and a hands-on ice cream-making lesson. Students also enjoyed a special read-aloud with Superintendent Dr. Tullock and received books to encourage reading at home.

At Calhoun County High School, students continued working toward graduation and credit recovery goals through personalized support and progress monitoring. This week, seven students successfully completed their required seat time.

Across all programs, students are growing academically, building confidence, and demonstrating perseverance. Calhoun County Public Schools thanks its dedicated staff, families, and community partners for helping make this a truly B.E.S.T. summer of learning.

Capturing the B.E.S.T. in CCPS
