

*Sarah Skemp, School Counselor*

**JDPS Students are a RAINBOW of Possibilities.** April brings showers...which can bring rainbows. What do the colors of the rainbow represent? **Red:** enthusiasm and passion. **Orange:** endurance and perseverance. **Yellow:** awareness and cheerfulness. **Green:** growth and health. **Blue:** calm and peace. **Indigo:** intuition and wisdom. **Violet:** creativity and imagination. Taking all of the colors, our students can consider all of their possibilities. to be a better person, to make progress with their current academics, to become excited about the next grade level, to dream of the future. What can the adults in our students lives do to support these possibilities? Encourage believing, assist your child in becoming stronger in their academics, be a role model of a kind and giving human being. Be the one that still finds awe in the beauty of rainbows and promote the meanings of each color.
