## IPM statement

It is the goal of Oak Valley School District to implement IPM by focusing on long-term prevention or suppression of pests through accurate pest identification, by frequent monitoring for pest presence, by applying appropriate action levels, and by making the habitat less conducive to pests using sanitation and mechanical and physical controls. Pesticides that are effective will be used in a manner that minimizes risks to people, property, and the environment, and only after other options have been shown ineffective.

Our pest management objectives are to: *(Example: Focus on long-term pest prevention)*

Eliminate or maintain a low population of pests in and around our school facilities. All while using industries best practices

## IPM team

In addition to the IPM Coordinator, other individuals who are involved in purchasing, making IPM decisions, applying pesticides, and complying with the Healthy Schools Act requirements, include:

Name and/or Title	Role in IPM program
Lionel Preciado/ Maintenance supervisor	Applicator
Luis Vela / Maintenance	Applicator
Brian Viera/ Grounds	Applicator

## Pest management contracting

- Pest management services are contracted to a licensed pest control business.  
Pest Control Business name(s): ResCom Pest Control
- Prior to entering into a contract, the school district has confirmed that the pest control business understands the training requirement and other requirements of the Healthy Schools Act.

## Pest identification, monitoring and inspection

Pest Identification is done by: ResCom Pest Control

*(Example: College/University staff, Pest Control Business, etc.)*

Monitoring and inspecting for pests and conditions that lead to pest problems are done regularly by Maintenance Staff and results are communicated to the IPM Coordinator.

*(Example: District staff title, e.g. Maintenance staff)*

Specific information about monitoring and inspecting for pests, such as locations, times, or techniques include:

*(Example: Sticky monitoring boards are placed in the kitchen and are checked weekly by custodial staff.)*

Pests are monitored by use of sticky traps after reports have been made from daily custodial cleanings in addition to work orders submitted by various staff. Inspections of traditional "hot spots" are conducted monthly by pest control service.
