IT'S TIME TO SCREEN

Detecting a Heart Condition Early
Could Save Your Child's Life

Devon was 10 years old when he collapsed at school. At first, everyone thought it was from dehydration but that didn't make sense to his mom. If it weren't for his parents insistence, they might never have found out he had Long QT syndrome. His doctor said he was at high risk for sudden cardiac arrest. He was lucky to be alive because most of the time the first warning sign is death.

Fast forward 9 years and Devon is doing great. He's even playing football for Quincy University. Having testing available like MyHeartCheck is essential in uncovering hidden heart defects. Devon's mom now advocates that all kids have their hearts checked and not wait until you get a call from the school nurse.
