### HUNTLAND SCHOOLS' ATHLETE PARENT CODE OF ETHICS

I hereby pledge to provide positive support, care, and encouragement for my child participating in Huntland Schools' athletic program by following this Parent Code of Ethics:

- I will recognize as a parent the tremendous influence I have on the education of my student-athlete, and I will not place the value of winning above the value of instilling the highest ideals of character for my child or other student-athletes; therefore, I will strive to set an example for the highest ethical and moral conduct.
- I will support the coaches and coaching staff in order to encourage a positive and
  enjoyable experience for all; therefore, I will refrain from coaching my child or other
  student-athletes during all sporting events.
- I will adhere and uphold all policies, procedures, and bylaws of Huntland Schools, The Franklin County Board of Education, and TSSAA.
- I will respect the authority of referees, umpires, officials, administrators, and coaches by not engaging in questions, confrontations, or discussions regarding a conflict at any sports event. Should I wish to discuss an issue, I will make appointment for a later date to meet with the coach, athletic director, or administration respectively.
- I will inform the coach of any physical disability or ailment that may affect the safety of my child and other student-athletes.
- I will be a role model and demonstrate good sportsmanship regardless of the situation for my child's team by treating other student-athletes, parents, referees, umpires, officials, spectators, administrators, and coaches with respect at all times.
- I understand that the sports environment for my child will be free from drugs and alcohol; therefore, I will refrain from their use at all sporting events.
- I am aware that should I fail to abide and uphold the aforementioned Parent Code of Ethics, I will be subject to disciplinary action that may include, but is not limited to, a verbal warning from a/an referee, umpire, official, administrator, or coach, a written warning, a disciplinary meeting with the administration, ejection from sporting event, required to pay monetary fee, game forfeit, suspension from athletic season events, and exclusion from the campus of Huntland School.

### CONCUSSION

### INFORMATION AND SIGNATURE FORM FOR STUDENT-ATHLETES & PARENTS/LEGAL GUARDIANS

(Adapted from CDC "Heads Up Concussion in Youth Sports")

Public Chapter 148, effective January 1, 2014, requires that school and community organizations sponsoring youth athletic activities establish guidelines to inform and educate coaches, youth athletes and other adults involved in youth athletics about the nature, risk and symptoms of concussion/head injury.

### Read and keep this page. Sign and return the signature page.

A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by a bump, blow or jolt to the head or body that causes the head and brain to move rapidly back and forth. Even a "ding," "getting your bell rung" or what seems to be a mild bump or blow to the head can be serious.

#### Did You Know?

- Most concussions occur without loss of consciousness.
- Athletes who have, at any point in their lives, had a concussion have an increased risk for another concussion.
- Young children and teens are more likely to get a concussion and take longer to recover than adults.

### WHAT ARE THE SIGNS AND SYMPTOMS OF CONCUSSION?

Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury.

If an athlete reports **one or more** symptoms of concussion listed below after a bump, blow or jolt to the head or body, s/he should be kept out of play the day of the injury and until a health care provider\* says s/he is symptom-free and it's OK to return to play.

SIGNS OBSERVED BY COACHING STAFF	SYMPTOMS REPORTED BY ATHLETES
Appears dazed or stunned	Headache or "pressure" in head
Is confused about assignment or position	Nausea or vomiting
Forgets an instruction	Balance problems or dizziness
Is unsure of game, score or opponent	Double or blurry vision
Moves clumsily	Sensitivity to light
Answers questions slowly	Sensitivity to noise
Loses consciousness, even briefly	Feeling sluggish, hazy, foggy or groggy
Shows mood, behavior or personality changes	Concentration or memory problems
Can't recall events prior to hit or fall	Confusion
Can't recall events after hit or fall	Just not "feeling right" or "feeling down"

<sup>\*</sup>Health care provider means a Tennessee licensed medical doctor, osteopathic physician or a clinical neuropsychologist with concussion training

#### **CONCUSSION DANGER SIGNS**

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention after a bump, blow or jolt to the head or body if s/he exhibits any of the following danger signs:

- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that not only does not diminish, but gets worse
- Weakness, numbness or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Becomes increasingly confused, restless or agitated
- Has unusual behavior
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

### WHY SHOULD AN ATHLETE REPORT HIS OR HER SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brains. They can even be fatal.

#### Remember:

Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

# WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care provider\* says s/he is symptom-free and it's OK to return to play.

Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration such as studying, working on the computer or playing video games may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.

\* Health care provider means a Tennessee licensed medical doctor, osteopathic physician or a clinical neuropsychologist with concussion training.

### Student-athlete & Parent/Legal Guardian Concussion Statement

## Athlete/Parent/Guardian Sudden Cardiac Arrest Symptoms and Warning Signs Information Sheet and Acknowledgement of Receipt and Review Form

### What is sudden cardiac arrest?

Sudden cardiac arrest (SCA) is when the heart stops beating, suddenly and unexpectedly. When this happens, blood stops flowing to the brain and other vital organs. SCA doesn't just happen to adults; it takes the lives of students, too. However, the causes of sudden cardiac arrest in students and adults can be different. A youth athlete's SCA will likely result from an inherited condition, while an adult's SCA may be caused by either inherited or lifestyle issues. SCA is NOT a heart attack. A heart attack may cause SCA, but they are not the same. A heart attack is caused by a blockage that stops the flow of blood to the heart. SCA is a malfunction in the heart's electrical system, causing the heart to suddenly stop beating.

### How common is sudden cardiac arrest in the United States?

SCA is the #1 cause of death for adults in this country. There are about 300,000 cardiac arrests outside hospitals each year. About 2,000 patients under 25 die of SCA each year. It is the #1 cause of death for student athletes.

#### Are there warning signs?

Although SCA happens unexpectedly, some people may have signs or symptoms, such as:

- fainting or seizures during exercise;
- unexplained shortness of breath;
- dizziness:
- extreme fatigue;
- chest pains; or
- · racing heart.

These symptoms can be unclear in athletes, since people often confuse these warning signs with physical exhaustion. SCA can be prevented if the underlying causes can be diagnosed and treated.

What are the risks of practicing or playing after experiencing these symptoms? There are risks associated with continuing to practice or play after experiencing these symptoms. When the heart stops, so does the blood that flows to the brain and other vital organs. Death or permanent brain damage can occur in just a few minutes. Most people who

experience SCA die from it.

### Public Chapter 325 – the Sudden Cardiac Arrest Prevention Act

The act is intended to keep youth athletes safe while practicing or playing. The requirements of the act are:

All youth athletes and their parents or guardians must read and sign this form. It must be
returned to the school before participation in any athletic activity. A new form must be
signed and returned each school year.

Adapted from PA Department of Health: Sudden Cardiac Arrest Symptoms and Warning Signs Information Sheet and Acknowledgement of Receipt and Review Form. 7/2013

- The immediate removal of any youth athlete who passes out or faints while participating in an athletic activity, or who exhibits any of the following symptoms:
  - (i) Unexplained shortness of breath;
  - (ii) Chest pains;
  - (iii) Dizziness
  - (iv) Racing heart rate; or
  - (v) Extreme fatigue; and
- Establish as policy that a youth athlete who has been removed from play shall not return to the practice or competition during which the youth athlete experienced symptoms consistent with sudden cardiac arrest
- Before returning to practice or play in an athletic activity, the athlete must be evaluated
  by a Tennessee licensed medical doctor or an osteopathic physician. Clearance to full or
  graduated return to practice or play must be in writing.

I have reviewed and understand the symptoms and warning signs of SCA.

> I unde	rstand that the athletic insurance carried by the school system is a secon meaning it pays only after the parents' primary coverage pays.  rstand that the responsibility to file the proper forms for payment is the possibility.	
I have	received a copy of the "Steps for Parents to Follow" form that tells me injury requires medical treatment from a doctor or emergency room.	what to do in

# Steps for Parents to Follow in Case of an Injury to a Student Athlete

- 1. File claim with your personal insurance carrier immediately (Primary Insurance).
- 2. Parent will receive claim forms through the mail form the school system's insurance and these must be completed and returned to the insurance company with ninety (90) days of the injury (Secondary Insurance).
- 3. Parent may receive claim forms through the mail from Loomis and Lappann, Inc. which is the catastrophic insurance carrier through TSSAA in case treatment of injury should exceed \$10,000. Complete and return these claim forms to Loomis and Lappann, Inc. with ninety (90) days of the injury (Catastrophic Insurance).
- Parents must send bills and EOB's (Explanation of Benefits) to VR Williams Insurance and/or call (931) 967-2268 or fax (931) 967-1128.

It is the parent's responsibility to file all claim forms in the ninety (90) day time frame for Each Injury that may occur with each insurance company to avoid issues of proper insurance notification and payment. Don't forget to make copies for your records of all claim forms submitted, bills received, and EOB forms received.

Following each step above will not guarantee every dollar of every injury will be covered by insurance, however, it will insure that no injury will be a financial disaster to any of our families.
