STUDIES CENTER

Honey & Hives Road Show

Do you want to educate others about the importance of honey bees?

Do you want to understand how beekeepers care for their hives?

If so, then the Environmental Studies Center's Honey & Hives Road Show is for you!

About the ESC

The Environmental Studies Center is a natural sciences education facility designed to provide unique learning experiences. Featuring over 350 acres of rich woodlands, the Center affords teachers, students, and the general public an opportunity to experience firsthand the natural environment. Natural resources include pine and bay forests, swamps, freshwater streams, carnivorous plant bog, and a twenty-acre lake.

In addition, wildlife rehabilitation plays a vital role each day at the Center. The wildlife rehabilitation program is dedicated to the care and potential release of injured and orphaned native wildlife. The wildlife rehabilitation program receives over 600 wild patients a year. These animals all need food, care, and shelter to survive. The program relies upon donations from people like you for its operation.
