Welcome Back Hornets 2021

AP Calculus Teacher Ecstatic to Have Students Back in the Classroom

Mrs. Agnew said, "These kids have had anything but a normal high school experience. The last year that they had a full normal year was when they were freshmen. But, that hasn't stopped them from learning, working, and challenging themselves. We were reviewing some important functions and graphing terminology that they'll need throughout Calculus. They had discussions and debates with their classmates and felt comfortable asking questions of each other. I am so excited to spend the rest of the year with such a bright and inquisitive bunch!"

Business Academy Students use Summer Olympics to Study Marketing

Mr. Lipske's Sports and Entertainment Marketing Class looked at how large of a role marketing played in the Olympics, primarily the partners and sponsors of the Olympics. They

also discussed the impact the games have on the economy of each city where they take place, including infrastructure, restaurants, and lodging.

Early Childhood Education Academy Creating Future Educators

Mrs. Smith's Early Childhood Education students participated in a closed picture sort where they had an assigned group of pictures to place in one of three categories, Health, Safety or Nutrition as they relate to teaching K-3 children. There were no right or wrong answers, but they had to justify why they placed each picture in the category they selected. Students discussed how some pictures could fall into two or all categories to stress the importance that health, safety, and nutrition are all interrelated. They modeled this activity to do with children ages Pre-K-3rd grade.

Hornet Battalion Participates in Summer STEM Camp

The Hornet Battalion participated in the Summer 2021 JROTC STEM Camp. It is designed to engage freshman and sophomore JROTC cadets in STEM content, skills and fields of study that are in demand by business and industry today. In this hands-on camp, Baker cadets participated in leadership development, critical thinking and STEM skills, participating in engineering-focused design challenges and leadership activities.

AP Capstone Students Enter College with a Head Start

[Lauren Olzinski](#) is a prime example of what AP CAPSTONE students at Baker High School can accomplish. Upon graduation, she has received 14 college credits towards her Major and will skip over 1.5 years of her degree. It's not just about college credits. She can walk on campus with confidence that she is ready to overcome any obstacles.
