

## IU1 Assistive Technology Considerations Checklists

These are generic feature descriptions of AT options generally listed from no-high tech.

These checklists may be useful when generating AT action plans and describing AT in the student's IEP.

## **AT Intervention for Communication**

Picture symbols Photos/digital pictures Use a communication board with pictures, text, or objects Symbol-authoring software to create boards/activities Eye-gaze frame with pictures or text Pen and paper to communicate with text or drawings Portable keyboard or computer to type messages during conversation Sign-assisted speech to enhance a student's receptive communication Single-level, voice-output communication aid (VOCA) Multi-level, voice-output communication aid (VOCA) Voice-output communication aid (VOCA) with icon sequencing Voice-output communication aid (VOCA) with dynamic display
OS-level accessibility options for keyboarding (e.g., Sticky Keys, repeat rate) Abbreviation expansion (AutoCorrect or Replace) to reduce keystrokes AutoText to reduce keystrokes Word prediction to reduce keystrokes or assist spelling and word use Keyguard to assist users in making direct selections Arm or chair supports to promote proper positioning Track ball, joystick, or other alternative mouse in place of a standard mouse Touchscreen monitor as an alternative input device Keytop overlays to label keys in both cases Keytop overlays to promote finger positioning/hand use Onscreen keyboard for typing Alternate keyboard or keyboard layout Head mouse or pointer to type on an onscreen or standard keyboard Switch as a primary input device Switch interface for multiple switches and functions Scanning (auditory, step, radial, etc.) as a means of input

☐ Voice recognition software as a primary means of input

## **AT Intervention for Mathematics** Graph paper for spacing or alignment ☐ Formatted paper (e.g., guideline papers formatted for an algorithm) ■ Vertically lined paper to aid alignment/place value ■ Abacus or math line for calculations Enlarged work materials (for clarity or spacing) Calculator or coinulator for computation activities Calculator that is capable of printing results Calculator with speech output capability Calculator with enlarged keys or displays Measurement tools that feature tactile guides Measurement tools with speech output capability ☐ Math notation software as an alternative to pencil-and-paper Drawing or graphing software as an alternative to pencil-and-paper ☐ Virtual manipulatives to provide an access alternative to physical ones AT Intervention for Organization ☐ Print, picture, or tactile schedule Color-coding- to organize books, folders, and other materials ■ Markers, removable tape, or acetate line guides to highlight text Recorded messages to prompt student behaviors or tasks Paper organizers for assignments and tasks ■ Electronic organizers/software for assignments and tasks Hand-held device with a touch screen interface for assignments, tasks, and productivity Use software to generate graphic organizers (concept development or organization) AT Intervention for Reading Predictable books to assist in decoding & comprehension Decodable text Styles to maximize accessibility of word-processed documents among potential users ■ Reading guides/windows ■ Scoptic (colored filter) overlays Altered word spacing □ Altered line spacing □ Altered text size or color ■ Symbol-writing software to pair text with symbols or pictures ■ Electronic tool for pronunciations, spellings, or meanings

Digital imaging software to digitize documents
 Optical character recognition (OCR) software to digitize and manipulate text (trial w/ OT)

Single-word/line scanners to read text aloud
 Audio books to supplement printed text
 Audio books to replace printed text

☐ Text-to-speech software to read typed text aloud

	Scan-and-read software to access and annotate text
	Books adapted for independent page-turning
	Electronic books to allow for easy magnification/transportation
	DAISY-formatted text and readers (may be subject to eligibility requirements)
	NIMAS file sets (subject to eligibility requirements)
AT	Intervention for Seating and Positioning
	Adjustable chair
	Adjustable desk or workstation
	Foot rest or stool
	Solid wedge to promote back extension
	Lordosis roll to support back and provide extension
	Tactile cushion
	Chair with armrests or supports
	Supportive chair (e.g., Rifton, Kaye, Thera-Adapt, Lecky)
	Chair with additional supports (e.g., laterals, headrest, hip abductor, pelvic belt, chest harness)
	Tray or table-top support
	Chair with tilt/recline capabilities
	Modified work tray, table, or work station
	Mounting system (e.g., desktop, rigid, swing-away, folding)

	Open-captioned materials Closed-captioned materials Personal amplification devices (personal FM, infrared system) (Educational Audiologist coming to Evaluate) Real-time captioning or computer-assisted real time (CART) to transcribe lectures or discussions Computer-aided note taking systems OS-level accessibility options for audible/visual messages Handheld or stationary magnifiers Large-print materials Braille materials for reading (or labels on keyboards) Raised-line materials Tactile graphics Adjusted screen contrast for improved visibility Screen magnification software or hardware for monitor visibility Screen reading software for access to on-screen content

## **AT Intervention for Writing**

Adaptive or alternative grips, pencils, and pens - *prefers markers
Harder/softer lead weight to result in lighter/darker line
Non-slip surfaces or clipboards to stabilize materials
Adapted paper (e.g., graph paper, raised-line paper, or highlighted-line paper) to assist with spacing
and organization
Adjusted seat and/or desk heights for adequate posture and support
Slantboard for optimal writing angle tried with little success
List of prewritten words/phrases
Graphic organizer to structure ideas and content
Cloze notes to reduce the amount of material to be written
Access to full notes as a back-up to student-generated notes
Scribe services when there is no independent means for a student to record notes or ideas
Analog or digital recording device to record lectures/commentary
Printed labels to provide legible answer choices
Label machine to generate legible answers independently
Video pen and paper to capture notes and/or recordings
Portable keyboard
Portable keyboard with text-to-speech capability
Access to a desktop, laptop, netbook, or tablet computer
Spelling and grammar checker
Word prediction software
Text-to-speech software to provide audible reinforcement
Digital imaging (scanning) software to annotate scanned documents
Scan-and-read software to annotate and manipulate contents of scanned documents
Grid-based word processor for composition
Cloze-style word processor for note taking or assessment purposes
Speech recognition software for extensive writing tasks
