Bus Routes and Schedules

The Superintendent's designee is responsible for scheduling bus transportation, including determination of routes and bus stops. Such routes are subject to approval of the county transportation committee. The purpose of bus scheduling and routing is to achieve maximum service with a minimum fleet of buses consistent with providing safe and reasonably equal service to all bus students.

In order to operate the transportation system as safely and efficiently as possible, the following factors shall be considered in establishing bus routes:

1. A school bus route shall be established with due consideration of the sum total of local conditions affecting the safety, economic soundness, and convenience of its operation, including road conditions, condition of bridges and culverts, hazardous crossings, presence of railroad tracks and arterial highways, extreme weather conditions and variations, length of route, number of families and children to be serviced, availability of turnaround points, capacity of bus, and related factors.
2. The District may extend a bus route across another transportation service area, if it is necessary in order to provide transportation to students in the District's own transportation service area. A district may not transport students from outside its transportation service area.
3. No school child attending an elementary school shall be required to ride the school bus under average road conditions more than one (1) hour without consent of the child's parent or guardian.
4. School bus drivers are encouraged to make recommendations in regard to establishing or changing routes.
5. Parents should be referred to the Superintendent for any request of change in routes, stops, or schedules.

The Board reserves the right to change, alter, add, or delete any route at any time such changes are deemed in the best interest of the District, subject to approval by the county transportation committee.

Bus Stops

Buses should stop only at designated places approved by school authorities. Exceptions should be made only in cases of emergency and inclement weather conditions.

Bus stops shall be chosen with safety in mind. Points shall be selected where motorists approaching from either direction will have a clear view of the bus for a distance of at least three hundred (300) to five hundred (500) feet.

School loading and unloading zones are to be established and marked to provide safe and orderly loading and unloading of students. The principal of each building is responsible for the conduct of students waiting in loading zones.

Delay in Schedule

The driver is to notify the administration of a delay in schedule. The administration will notify parents on routes and radio stations, if necessary.

Responsibilities – Students

Students must realize that safety is based on group conduct. Talk should be in conversational tones at all times. There should be no shouting or loud talking which may distract the bus driver. There should be no shouting at passersby. Students should instantly obey any command or suggestions from the driver and/or his/her assistants.

Responsibilities – Parents

The interest and assistance of each parent is a valued asset to the transportation program. Parents' efforts toward making each bus trip a safe and pleasant experience are requested and appreciated. The following suggestions are only three of the many ways parents can assist:

1. Ensure that students are at the bus stop in sufficient time to efficiently meet the bus.
2. Properly prepare children for weather conditions.
3. Encourage school bus safety at home. Caution children regarding safe behavior and conduct while riding the school bus.

Safety

The Superintendent will develop written rules establishing procedures for bus safety and emergency exit drills and for student conduct while riding buses.

If the bus and driver are present, the driver is responsible for the safety of his/her passengers, particularly for those who must cross a roadway prior to loading or after leaving the bus. Except in emergencies, no bus driver shall order or allow a student to board or disembark at other than his/her assigned stop unless so authorized by the Superintendent. In order to assure the safety of all, the bus driver may hold students accountable for their conduct during the course of transportation and may recommend corrective action against a student. Bus drivers are expressly prohibited from using corporal punishment.

The bus driver is responsible for the use of the warning and stop signaling systems and the consequent protection of his/her passengers. Failure to use the system constitutes negligence on the part of the driver.

Inclement Weather

The Board recognizes the unpredictability and resulting dangers associated with weather in Montana. In the interest of safety and operational efficiency, the Superintendent is empowered to make decisions as to emergency operation of buses, cancellation of bus routes, and closing of school, in accordance with his or her best judgment. The Board may develop guidelines in cooperation with the Superintendent to assist the Superintendent in making such decisions.

NOTE: To receive full state/county reimbursement, budgets must have enough funds to cover the costs of any changes to the route.

NOTE: The county transportation committee has authority to establish transportation service areas, should circumstances and/or geography (demographics) warrant.

Transportation of Students With Disabilities

Transportation shall be provided as a related service, when a student with a disability requires special transportation in order to benefit from special education or to have access to an appropriate education placement. Transportation is defined as:

- (a) Travel to and from school and between schools;
- (b) Travel in and around school buildings or to those activities that are a regular part of the student's instructional program;
- (c) Specialized equipment (such as special or adapted buses, lifts, and ramps) if required to provide special transportation for a student with disabilities.

The Evaluation Team that develops the disabled student's Individualized Education Program will determine, on an individual basis, when a student with a disability requires this related service. Such recommendations must be specified on the student's IEP. Only those children with disabilities who qualify for transportation as a related service under the provisions of the IDEA shall be entitled to special transportation. All other children with disabilities in the District have access to the District's regular transportation system under policies and procedures applicable to all District students. Utilizing the District's regular transportation service shall be viewed as a "least restrictive environment."

Mode of Transportation

One of the District's special education buses will be the preferred mode of transportation. Exceptions may be made in situations where buses are prohibited from entering certain subdivisions due to inadequate turning space, or when distance from school may seriously impact bus scheduling. In such situations other arrangements, such as an individual transportation contract, may be arranged with parents. Such voluntary agreement will stipulate in writing the terms of reimbursement.

District-Owned Vehicles

The District owns and maintains certain vehicles. Included among them are pickups, school buses, and vans. These are for use by properly authorized personnel of the District for District business purposes.

Any driver who receives a citation for a driving violation while operating a District vehicle shall personally pay all fines levied. All citations received while the driver is a District employee, whether operating a District vehicle or not, must be reported and may result in disciplinary action up to and including termination.

Bus and Vehicle Maintenance, District

Buses used in the District's transportation program shall be in safe and legal operating condition. All buses shall be inspected by the Department of Justice, Montana Highway Patrol, before the beginning of each semester. The Superintendent will establish a specific list of tasks bus drivers will perform on a daily basis. All other District vehicles shall be maintained following established programs developed by the Superintendent.

Driver Training and Responsibility

Bus drivers shall observe all state statutes and administrative rules governing traffic safety and school bus operation. At the beginning of each school year, the District will provide each driver with a copy of the District's written rules for bus drivers and for student conduct on buses.

School bus drivers must hold a valid Montana school bus certificate for a district to receive state reimbursement for that driver's bus routes. Qualifications for bus drivers are prescribed by 20-10.103, MCA, and by the board of Public Education in Arm 10.64.201. The first aid certificate required by ARM 10.64.201 must include instruction in adult and pediatric CPR, be signed by a certified instructor, and be received after an initial in-person training of at least four hours. The certificate must be renewed every two years.

A school bus driver is prohibited from operating a school bus while using a cellular phone, including hands free cellular phone devices, except:

- (1) During an emergency situation;
- (2) To call for assistance if there is a mechanical breakdown or other mechanical problem;
- (3) When the school bus is parked.

A driver may not operate a school bus without a valid, current certificate.

A teacher, coach, or other certified staff member assigned to accompany students on a bus will have primary responsibility for behavior of students in his or her charge. The bus driver has final authority and responsibility for the bus. The Superintendent will establish written procedures for bus drivers.

Maximum Driving Time

The District recognizes from a risk management and student safety standard the importance of driver safety while transporting students. Therefore, the district will:

- 1) Meet the federal standard on maximum driving time for drivers.

Student Conduct on Buses

The general student code of conduct is applicable to conduct on school buses.

The Superintendent may establish written rules of conduct for students riding school buses. Such rules will be reviewed annually by the Superintendent and revised if necessary. If rules are substantially revised, they will be submitted to the Board for approval.

At the beginning of each school year, a copy of the rules of conduct for students riding buses will be provided to students, and the classroom teacher and bus driver will review the rules with the students. A copy of the rules will be posted in each bus and will be available upon request at the District office and in each building principal’s office.

The bus driver is responsible for enforcing the rules and will work closely with a parent and building principal to modify a student’s behavior. Rules shall include consistent consequences for student misbehavior. A recommendation for permanent termination of bus privileges, accompanied by a written record of the incident(s) that led to the recommendation, shall be referred to the Superintendent for final determination. The student’s parent or guardian may appeal a termination to the Board. No further appeal shall be allowed.

Air Quality Restrictions on Outdoor Activities, Practice and Competition

Each school district is responsible for ensuring the safety of its students and student athletes when participating in physical education, recess, practices or athletic contests.

The East Glacier Park Grade School District Board of Trustees and Administration will use the Recommendations for Outdoor Activities Based on Air Quality for Schools guidelines, developed by the Montana Department of Environmental Quality (DEQ) and the DEQ's Air Data Map, as the determining factor when making a decision to allow or not allow students to participate in outdoor activities and contests.

The East Glacier Park Grade School District Board of Trustees and Administration have developed the following protocol for determination of allowing students and student athletes to participate in outdoor activities when Air Quality Restrictions have reached the Unhealthy for Sensitive Groups or higher categories as indicated on the DEQ guidelines.

1. The East Glacier Park Grade School District will use the accuweather air quality monitor and/or the East Glacier Park geographical spot on the todaysair.mt.gov website to determine the air quality for our school district.
2. The Principal/Superintendent will make the decision to hold or cancel outdoor activities, practices, or contests:
3. The decision to hold or cancel outdoor activities will be made in advance of the activity.
4. The notice to hold or cancel an outdoor activity will be communicated to Students, Staff, Coaches, Parents and the Community through:
 - a. Remind App
 - b. Facebook website
 - c. KSEN Radio
 - d. Additional phone calls or text messages to Staff and Coaches if needed.

Tobacco Free Policy

The District maintains tobacco-free buildings and grounds. Tobacco includes but is not limited to cigarettes, cigars, snuff, pipe smoking tobacco, smokeless tobacco, vapor product, alternative nicotine product, or any other tobacco or nicotine delivery innovation.

Use of tobacco or nicotine products in a public school building or on public school property is prohibited, unless used in a classroom or on other school property as part of a lecture, demonstration, or educational forum sanctioned by a school administrator or faculty member, concerning the risks associated with using tobacco products or in connection with Native American cultural activities.

For the purpose of this policy, “public school building or public school property” means:

- Public land, fixtures, buildings, or other property owned or occupied by an institution for the teaching of minor children, that is established and maintained under the laws of the state of Montana at public expense; and
- Includes playgrounds, school steps, parking lots, administration buildings, athletic facilities, gymnasiums, locker rooms, and school vehicles.

Violation of the policy by students and staff will be subject to actions outlined in District discipline policies.

Use of FDA-approved cessation devices may be permitted at school buildings and on school grounds with the approval of the building administrator.

Risk Management

The Board believes that the District must identify and measure risks of loss which may result from damage to or destruction of District property or claims against the District by persons claiming to have been harmed by action or inaction of the District, its officers or staff. The District will implement a risk management program to reduce or eliminate risks where possible and to determine which risks the District can afford to assume. Such program will consider the benefits, if any, of joining with other units of local government for joint purchasing of insurance, joint self-insuring, or joint employment of a risk manager. The Board will assign primary responsibility for administration and supervision of the risk management program to a single person and will review the status of the risk management program each year.

The District will purchase surety bonds for the Clerk, and such other staff and in such amounts as the Board shall from time to time determine to be necessary for honest performance of the staff in the conduct of the District's financial operations.

Security

Security means not only maintenance of buildings, but also protection from fire hazards, intruders, damage, vandalism, and faulty equipment. The District shall implement safe practices in the use of electrical, plumbing, and heating equipment. The Board requires close cooperation with local police, fire, and sheriff departments and with insurance company inspectors.

Access to school buildings and grounds outside of regular school hours shall be limited to staff completing official duties and authorized individuals or entities requiring access. An adequate key control system shall be established which shall limit access to buildings to authorized staff, individuals, and entities and shall safeguard against the potential entry of unauthorized persons.

Records and funds shall be kept in a safe place and under lock and key when required.

Locks and other protective devices designed to be used as safeguards against illegal entry and vandalism shall be installed when appropriate to the individual situation. Employment of security officers may be approved in situations where special risks are involved. All incidents of vandalism, unauthorized access and burglary shall be reported to the Superintendent immediately and to law enforcement agencies as appropriate.

District Safety

For purposes of this policy, “disaster means the occurrence or imminent threat of damage, injury, or loss of life or property”.

The Board recognizes that safety and health standards should be incorporated into all aspects of the operation of the District. Rules for safety and prevention of accidents will be posted in compliance with the Montana Safety Culture Act and the Montana Safety Act. Injuries and accidents will be reported to the District office.

The board of trustees has identified the following local hazards that exist within the boundaries of its school district: Fire, Earthquake, Avalanche, High Winds, Intruders, Firearms, Flood, Train Derailment, and Hazardous Chemical Spills.

The Building Administrator shall design and incorporate drills in its school safety or emergency operations plan to address the above stated hazards. The trustees shall certify to the office of public instruction that a school safety or emergency operations plan has been adopted. This plan and procedures will be discussed and distributed to each teacher at the beginning of each school year. There will be at least eight (8) disaster drills a year in a school. All teachers will discuss safety drill procedures with their class at the beginning of each year and will have them posted in a conspicuous place next to the exit door. Drills must be held at different hours of the day or evening to avoid distinction between drills and actual disasters. A record will be kept of all fire drills.

The trustees shall review the school safety or emergency operations plan periodically and update the plan as determined necessary by the trustees based on changing circumstances pertaining to school safety. Once the trustees have made the certification to the office of public instruction, the trustees may transfer funds pursuant to Section 2, 20-1-401, MCA to make improvements to school safety and security.

The Superintendent will develop safety and health standards which comply with the Montana Safety Culture Act. When the Superintendent provides District employees equipment, tools, and devices designed to ensure a safe and healthy workplace in accordance with this policy, then failure to use the provided equipment in a suitable or timely manner may be considered a violation of District policy. If a staff member requires equipment that is not available, an employee may submit a request to the administration in accordance with established District practice.

Lead Renovation

In accordance with the requirements of the Environmental Protection Agency (EPA), the East Glacier Park Grade School, School District 50 has this Lead Renovation Policy that is designed to recognize, control and mitigate lead hazards at all District owned facilities and grounds.

The Lead-based paint renovation, repair and painting program (RRP) is a federal regulatory program affecting contractors, property managers, and others who disturb painted surfaces. It applies to child-occupied facilities such as schools and day-care centers built prior to 1978.

“*Renovation*” is broadly defined as any activity that disturbs painted surfaces and includes most repair, remodeling, and maintenance activities, including window replacement.

The District has implemented this policy to identify, inspect, control, maintain and improve the handling of lead related issues across the district facilities and grounds. In an effort to reduce potential hazards, the District through training has put together maintenance programs that will not only better protect the environment, but the students and employees of the District as well.

The District’s Lead Renovation Policy shall apply too not only employees of the maintenance department but to outside contractors as well. No outside painting contractor will be permitted to work for the District after April 22, 2010 unless they can show proof of training relative to lead renovation or maintenance from an accredited training institution.

Information Distribution Requirements

No more than 60 days before beginning renovation activities in any school facility of the District, the company performing the renovation must:

1. Provide the Superintendent with EPA pamphlet titled *Renovate Right: Important Lead Hazard Information for Families, Child Care Providers and Schools*.
2. Obtain, from the District, a written acknowledgement that the District has received the pamphlet.
3. Provide the parents and guardians of children using the facility with the pamphlet and information describing the general nature and locations of the renovation and the anticipated completion date by complying with one of the following:
 - i. Mail or hand-deliver the pamphlet and the renovation information to each parent or guardian of a child using the child-occupied facility.
 - ii. While the renovation is ongoing, post informational signs describing the general nature and locations of the renovation and the anticipated completion date. These signs must be posted in areas where they can be seen by the parents or guardians of the children frequenting the child- occupied facility. The signs must be accompanied by a posted copy of the pamphlet or information on how interested parents or guardians can review a copy of the pamphlet or obtain a copy from the renovation firm at no cost to the parents or guardians.
4. The renovation company must prepare, sign, and date a statement describing the steps

performed to notify all parents and guardians of the intended renovation activities and to provide the pamphlet.

Recordkeeping Requirements *

All documents must be retained for three (3) years following the completion of a renovation.

- Records that must be retained include:
- Reports certifying that lead-based paint is not present.
- Records relating to the distribution of the lead pamphlet.
- Documentation of compliance with the requirements of the Lead-Based Paint Renovation, Repair, and Painting Program.

**Note: The MTSBA recommends that districts follow the same record retention schedule as they do for Asbestos abatement (forever).*

Service Animals

For the purposes of this policy, state law defines a service animal as a dog or any other animal that is individually trained to do work or perform tasks for the benefit of an individual with a disability. Federal law definition of a disability includes a physical, sensory, psychiatric, intellectual, or other mental disability.

The District shall permit the use of a miniature horse by an individual with a disability, according to the assessments factors as outlined in Policy 8425P, if the miniature horse has been individually trained to do work or perform tasks for the benefit of the individual with a disability.

The District will permit the use of service animals by an individual with a disability according to state and federal regulations. The School District will honor requests for service animals in accordance with the applicable Section 504 or Special Education policy adopted by the Board of Trustees. The work or tasks performed by a service animal must be directly related to the handler's disability.

Examples of work or tasks performed by the service animal to accommodate an identified disability include, but are not limited to, assisting individuals who are blind or have low vision with navigation and other tasks, alerting individuals who are deaf or hard of hearing to the presence of people or sounds, providing nonviolent protection or rescue work, pulling a wheelchair, assisting an individual during a seizure, alerting individuals to the presence of allergens, retrieving items such as medicine or the telephone, providing physical support and assistance with balance and stability to individuals with mobility disabilities, and helping persons with psychiatric and neurological disabilities by preventing or interrupting impulsive or destructive behaviors.

The crime deterrent effects of an animal's presence and the provision of emotional support, well-being, comfort, or companionship do not constitute work or tasks for the purposes of this definition.

The District may ask an individual with a disability to remove a service animal from the premises if:

- The animal is out of control and the animal's handler does not take effective action to control it; or
- The animal is not housebroken

The District is not responsible for the care or supervision of the service animal.

Individuals with disabilities shall be permitted to be accompanied by their service animals in all areas of the District's facilities where members of the public, participants in services, programs or activities, or invitees, as relevant, are allowed to go.

Service Animal Allowance Procedure

The School District will honor requests for service animals in accordance with the applicable Section 504 or Special Education policy adopted by the Board of Trustees. The following procedures have been developed which will help guide the administration when a request for the use of a service animal has been presented by an individual with a disability.

Inquiries: The administration shall not ask about the nature or extent of a person's disability, but may make two inquiries to determine whether an animal qualifies as a service animal. The administration may ask if the animal is required because of a disability and what work or task the animal has been trained to perform. The administration shall not require documentation, such as proof that the animal has been certified, trained, or licensed as a service animal. Generally, the administration may not make these inquiries about a service animal when it is readily apparent that an animal is trained to do work or perform tasks for an individual with a disability (*e.g.*, the dog is observed guiding an individual who is blind or has low vision, pulling a person's wheelchair, or providing assistance with stability or balance to an individual with an observable mobility disability).

Exclusions: The administration may ask the individual to remove the service animal from the premises if the animal is out of control and the handler does not take effective action to control it, or if the animal is not housebroken. If the administration properly excludes the service animal, it shall give the individual the opportunity to participate in the service, program, or activity without having the service animal on the premises.

Surcharges: The administration shall not ask or require the individual to pay a surcharge, even if people who are accompanied by pets are required to pay fees, or to comply with other requirements generally not applicable to people without pets. If the District normally charges individuals for the damage they cause, the individual may be charged for damage caused by his or her service animal.

Miniature horses assessment factors: In determining whether reasonable modifications can be made to allow a miniature horse into a specific facility, the District shall consider:

- The type, size, and weight of the miniature horse
- Whether the miniature horse is housebroken, and
- Whether the miniature horse's presence in a specific facility compromises legitimate safety requirements that are necessary for safe operation.

The District supports the use of therapy dogs and other therapy animals by teachers or other qualified school personnel (“Owner”) for the benefit of its students, subject to the conditions of this policy.

Therapy Animals

Therapy dogs and other therapy animals are family pets that are trained and registered or certified through therapy organizations. They are only half of the therapy team. The handler is the other half. Therapy teams enter the school by invitation or prior approval.

A therapy animal is not a service animal, and unlike a service animal, a therapy animal does not assist a person with a disability with activities of daily living, nor does it accompany a person with a disability at all times. Therapy animals do not have legal rights.

Requirements of Therapy Animals and User/Owners

Individuals with disabilities using therapy or companion animals are responsible for their animals at all times and must comply with the following requirements:

Request: An Owner must submit a written request to the Superintendent. The request must be renewed each school year or whenever a different therapy animal will be used.

Registration, Training and Certification: The Owner must register the therapy animal and provide documentation of the registration, certification, and training to the Superintendent. The registration and certification must remain current at all times.

Health and Vaccination: The therapy animal must be clean, well groomed, in good health, house broken, and immunized against diseases common to dogs. The Owner must submit proof of current licensure from the local licensing authority and proof of the therapy animal’s current vaccinations and immunizations from a licensed veterinarian.

Control: A therapy animal must be under the control of the “Owner”, at all times, through the use of a leash or other tether unless the use of a leash or other tether would interfere with the therapy animals’ safe, effective performance of its work or tasks.

Identification: The therapy animals must wear appropriate visible identification that identifies in writing that the animal is a therapy animal.

Behavior: The Owner must take responsibility for the behavior of the animal in private and public places, and for due care and diligence in the use of the animal on school district property.

Health and Safety: The therapy animal must not pose a health and safety risk to any student, employee, or other person at the school.

Supervision and Care of Therapy Animals: The Owner is solely responsible for the supervision and care of the therapy dog, including any feeding, exercising, and clean-up while the animal is in the school building or on school property. The school district is not responsible for providing any care, supervision, or assistance for a therapy animal.

Authorized Areas: The Owner shall only allow the therapy animal to be in areas in school buildings or on school property that are authorized by the school administrators.

Insurance: The Owner must submit a copy of an insurance policy that provides liability coverage for the therapy animal while on school property.

Exclusion or Removal from School. A therapy animal may be excluded from school property and buildings if a school administrator determines that:

- 1) A handler does not have control of the therapy animal;
- 2) The therapy animal is not house broken;
- 3) The therapy animal presents a direct and immediate threat to others in the school; or
- 4) The animal's presence otherwise interferes with the educational process.

The Owner shall be required to remove the therapy animal from school premises immediately upon such a determination.

Allergic Reactions. If any student or school employee assigned to a classroom in which a therapy animal is permitted, and suffers an allergic reaction to the therapy animal, the Owner of the animal will be required to remove the animal to a different location designated by an administrator.

Damages to School Property and Injuries: The Owner of a therapy animal is solely responsible and liable for any damage to school property or injury to personnel, students, or others caused by the therapy animal.

Therapy Animals in Training; This policy shall also be applicable to therapy animals in training that are accompanied by a bona fide trainer.

Automated External Defibrillators (AED)

The Board of Trustees of the East Glacier Park Grade School, School District 50 recognizes that from time to time emergencies may arise that justify the use of an Automated External Defibrillator (AED). The Board has purchased one or more of these units for use by qualified personnel. The Board of Trustees approves the use of AED units, subject to the following conditions:

1. Establish a program for the use of an AED that includes a written plan that must specify:
 - Where the AED will be placed;
 - The individuals who are authorized to operate the AED;
 - How AED use will be coordinated with an emergency medical service providing services in the area where the AED is located;
 - The medical supervision that will be provided;
 - The maintenance that will be performed on the AED;
 - Records that will be kept by the program;
 - Reports that will be made of AED use;
 - The name, location, and telephone number of a Medical Supervisor designated to provide medical supervision of the AED program; and
 - Other matters as specified by the Department of Public Health and Human Services;
2. Adhere to the written plan required by subsection (1);
3. Ensure that before using the AED, an individual authorized to operate the AED receives appropriate training approved by the DPHHS in cardiopulmonary resuscitation and the proper use of an AED;
4. Maintain, test, and operate the AED according to the manufacturer's guidelines and maintain written records of all maintenance and testing performed on the AED;
5. Each time an AED is used for an individual in cardiac arrest, require that an emergency medical service is summoned to provide assistance as soon as possible and that the AED use is reported to the supervising physician or the person designated by the physician and to the District as required by the written plan;
6. Before allowing any use of an AED, provide the following to all licensed emergency services and any public safety answering point or emergency dispatch center providing services to the area where the AED is located:
 - a. A copy of the plan prepared pursuant to this section; and
 - b. Written notice, in a format prescribed by the DPHHS rules, stating:
 - i. That an AED program has been established by the District;
 - ii. Where the AED is located; and
 - iii. How the use of the AED is to be coordinated with the local emergency medical service system.

Liability Limitations

An individual who provides emergency care or treatment by using an AED in compliance with this policy and an individual providing cardiopulmonary resuscitation to an individual upon whom an AED is or may be used are immune from civil liability for a personal injury that results from that care or treatment.

An individual who provides emergency care or treatment by using an AED in compliance with this policy and an individual providing cardiopulmonary resuscitation to an individual upon whom an AED is or may be used are immune from civil liability as a result of any act or failure to act in providing or arranging further medical treatment for the individual upon whom the AED was used, unless the individual using the AED or the person providing CPR, as applicable, acts with gross negligence or with willful or wanton disregard for the care of the person upon whom the AED is or may be used.

The following individuals or entities are immune from civil liability for any personal injury that results from an act or omission that does not amount to willful or wanton misconduct or gross negligence, if applicable provisions of this part have been met by the individual or entity:

- a. A person providing medical oversight of the AED program, as designated in the plan;
- b. The entity responsible for the AED program, as designated in the plan;
- c. An individual providing training to others on the use of an AED.

Cyber Incident Response

A cyber incident is a violation or imminent threat of violation of computer security policies, acceptable use policies, or standard computer security practices. An incident response capability is necessary for rapidly detecting incidents, minimizing loss and destruction, mitigating the weaknesses that were exploited, and restoring computing services.

The School District is prepared to respond to cyber security incidents, to protect District systems and data, and prevent disruption of educational and related services by providing the required controls for incident handling, reporting, and monitoring, as well as incident response training, testing, and assistance.

Responsibilities of Specific Staff Members

Individual Information Technology User:

All users of District computing resources shall honor District policy and be aware of what constitutes a cyber security incident and shall understand incident reporting procedures.

District Information Technology Director

Provide incident response support resources that offer advice and assistance with handling and reporting of security incidents for users of School District information systems. Incident response support resources may include, but is not limited to: School District information technology staff, a response team outlined in this policy, and access to forensics services.

Establish a Cyber Security Incident Response Team (CSIRT) to ensure appropriate response to cyber security incidents. The CSIRT shall consist of the Superintendent and the Business Manager/Clerk. CSIRT responsibilities shall be defined in the School District position descriptions.

District Superintendent:

Develop organization and system-level cyber security incident response procedures to ensure management and key personnel are notified of cyber security incidents as required.

Procedures

Designated officials within the District shall review and approve incident response plans and procedures at least annually. The incident response plans and/or procedures shall:

- Provide the District with a roadmap for implementing its incident response capability
- Describe the structure and organization of the incident response capability
- Provide a high-level approach for how the incident response capability fits into the overall organization
- Meet the unique requirements of the District, which relate to mission, size, structure, and functions
- Define reportable incidents
- Provide metrics for measuring the incident response capability within the organization

- Define the resources and management support needed to effectively maintain and mature an incident response capability

Upon completion of the latest incident response plan, designated officials shall:

- Distribute copies of the incident response plan/procedures to incident response personnel.
- Communicate incident response plan/procedure changes to incident response personnel and other organizational elements as needed.
- Provide incident response training to information system users consistent with assigned roles and responsibilities before authorizing access to the information system or performing assigned duties, when required by information system changes; and annually thereafter.
- Test the incident response capability for the information systems they support at least annually to determine effectiveness.
- Track and document information system security incidents.
- Promptly report cyber security incident information to appropriate authorities in accordance with reporting procedures.
